ABOUT THE ASSESSMENT

This assessment tool was developed for Autism Speaks through a contract with Virginia Commonwealth University’s Rehabilitation Research and Training Center. While a review of the literature did not produce an assessment tool that matched the needs of youth with Autism Spectrum Disorder (ASD), it did assist in illuminating the critical areas of functional life skills. The project selected these functional skills areas based upon the instruments that were reviewed and purported to contribute to the successful functioning of an individual into adulthood.

This tool was designed to assess an individual’s knowledge, skill and social communication abilities. A number of individuals worked on this product to include Carol Schall, Valerie Brooke, Paul Wehman, Sue Palko, Alissa Brooke, Whitney Ham, Staci Carr, Peter Gerhardt, Adam Dreyfus, and Holly Tate. Additional thanks go to Katherine Inge for her review of this document and to the number of individuals with ASD, their families and educators that trusted us with their time and talent as we worked collaboratively to shape this final product.

ABOUT THE VIRGINIA COMMONWEALTH UNIVERSITY REHABILITATION RESEARCH AND TRAINING CENTER

Established in 1983, the Virginia Commonwealth University Rehabilitation Research and Training Center (VCU-RRTC) serves as a center of national and international excellence in the field of disability and employment services. The VCU-RRTC played a major leadership role in designing and implementing supported employment, a program now found in every state across the country and over 30 countries worldwide. For over 30 years this center has stayed in the forefront of education and employment services to individuals with disabilities with a concentration on services and supports to individuals with autism. The Center’s professional team, led by Dr. Paul Wehman, are renowned experts and committed to developing and advancing evidence based practices to support and advance individuals with disabilities.

ABOUT AUTISM SPEAKS

Autism Speaks is the world’s leading autism science and advocacy organization. It is dedicated to funding research into the causes, prevention, treatments and a cure for autism; increasing awareness of autism spectrum disorders; and advocating for the needs of individuals with autism and their families. Autism Speaks was founded in February 2005 by Suzanne and Bob Wright, the grandparents of a child with autism. Mr. Wright is the former vice chairman of General Electric and chief executive officer of NBC and NBC Universal. Since its inception, Autism Speaks has committed more than $500 million dollars to its mission, the majority in science and medical research. Each year Walk Now for Autism Speaks events are held in more than 100 cities across North America. On the global front, Autism Speaks has established partnerships in more than 40 countries on five continents to foster international research, services and awareness. To learn more about Autism Speaks, please visit AutismSpeaks.org.

The contents were developed for Autism Speaks, “Functional Community Based Assessment”. Virginia Commonwealth University, School of Education and Department of Physical Medicine and Rehabilitation is an equal opportunity/affirmative action institution providing access to education and employment without regard to age, race, color, national origin, gender, religion, sexual orientation, veteran’s status, political affiliation, or disability. If special accommodations are needed, please contact Vicki Brooke at (804) 828-1851 VOICE or (804) 828-2494 TTY.
Introduction

The challenges associated with the transition from school services to adulthood for individuals with disabilities are well documented. The process can often be a very overwhelming and challenging one as families worry about the individual’s future: What kind of job will he have? Where will she end up living? Will he ever be independent? What will make her the happiest? Every individual with autism is different and as a result, there is no “one size fits all” plan for the path to adulthood. A transition plan involving job training and skill development that is fitting for one person with autism may be ineffective for another. The most important factor in creating a plan is to focus on the individual. His or her strengths, needs, challenges and preferences will play a critical role in ensuring a successful transition process.

A key ingredient in creating a transition plan for an individual with autism is a transition assessment that leads to comprehensive skill development in the final years of school. When a student turns 14, the focus of his or her Individualized Education Program will likely shift away from math and English to vocational training and community living skill development. This shift in focus necessitates a shift in assessment priorities. That is, instead of measuring what a student cannot do, it is time to measure the student’s interests, preferences, strengths and work habits and based on these factors, describe the supports and modifications that will be necessary for the student to be successful in the future.

What is an Assessment?

The Community Based Functional Skills Assessment for Transition Aged Youth with Autism was designed to help parents and professionals assess the current skill levels and abilities of individuals with autism beginning at age 12 and continuing into adulthood in order to develop a comprehensive plan. The purpose is to assist teams in identifying areas of instructional priority for the individual. While employment support needs of individuals are addressed through community-based internships and work experiences through school, this is the first tool to assess needs in the area of community-based living from transportation to financial management to peer relationships and more.

The tool is designed for transition aged youth and is divided into three levels based upon the age of the individual being assessed. This is important because the skills identified will be age-referenced based on the individual’s peer group. The levels and definitions are as follows:

- **Level 1 Life Aware:** This group includes youth ages 12 to 16 who are between middle school and sophomore year of high school.
- **Level 2 Life Explorer:** This group includes youth ages 17 to 22 who are in their junior or senior year of high school.
- **Level 3 Life Seeker:** This group includes individuals who are post high school and seeking postsecondary education and/or employment.
After conducting a careful analysis to illuminate the critical areas of functional life skills, eight skill sets were identified and collapsed into the categories below:

**CAREER PATH AND EMPLOYMENT** The items in this section assess the individual’s progress towards developing job seeking skills and/or employment. This section covers such job topics as: demonstrates work habits by performing chores at home, explores opportunities by job shadowing, volunteer or using a mentor, indicates personal strengths, completes a resume and secures a competitive job.

**SELF-DETERMINATION/ADVOCACY** The items in this section review the skills that youth with autism need to develop and the challenges that they will face living and working in the community. Specifically, this section will cover a variety of skills that would indicate that the individual is able to demonstrate some control of his or her life. This section covers skills such as: goal setting, IEP participation, choice making, self-regulation, problem solving, requesting support and disability awareness.

**HEALTH AND SAFETY** Assessment items in this area cover a vast range of independent living skills. These items include basic to advanced hygiene, fire safety, home safety, medication management, self-management and general sexuality information.

**PEER RELATIONSHIPS, SOCIALIZATION AND SOCIAL COMMUNICATION** This area is the most detailed section of the assessment. For individuals with ASD, the interaction between two or more people, requiring the processing of both verbal and nonverbal cues, can be an arduous task. It is important to assess skills across multiple environments because many people with ASD understand language so concretely that they may miss the subtle meanings of social information, as well as experience issues with generalization. This section covers skills across home, work and leisure/recreation environments while assessing if the individual can initiate a skill, as well as respond to a social communication situation.

**COMMUNITY PARTICIPATION AND PERSONAL FINANCE** This area focuses on a variety of independent living skills assessed across areas that include making decisions that affect an individual’s life, taking care of personal affairs and pursuing areas of personal interest. Community participation items assess the extent to which a youth with ASD uses and interacts with local restaurants, stores, parks, libraries, places of worship, community events, government activities and volunteering.

**TRANSPORTATION** Transportation can be confusing and frightening to many individuals with ASD, so this assessment item is of critical importance. Generally, these skills will have to be taught along with socially appropriate behavior requirements within each of these settings.

**LEISURE/RECREATION** Developing and engaging in leisure/recreation activities is important for all community members. As with other community members, when individuals with ASD join in a community event, they engage in a stress relief activity and have the opportunity to make new friends. Skills that are present in this section include: identifies preferred activities, uses technology for enjoyment and schedules opportunities for exercise and/or participation in community activities.

**HOME LIVING SKILLS** Whether an individual with ASD is living at home, in a group home or independently or with a roommate, home living skills are essential. This section will review both basic and advanced skill sets that include eating and preparing meals, cleaning tasks, doing laundry and home repair.
How does it work?

The assessment uses both a criterion-based observation and interview-based process to measure knowledge, skills and behaviors. Interviews will include obvious areas such as personal care and hygiene, but will also be used across all skill assessment categories. Observations will be purposeful and will occur in multiple settings including recreation/leisure, employment, education and home.

1. **ASSESSMENT AND OBSERVATION PLANNING TOOL**
   
   It is essential that the assessment and observation planning tool in this booklet is completed prior to doing any observations. It is recommended that this section be completed either over the phone or through email.

2. **SCHEDULING THE OBSERVATIONS**
   
   When administering this assessment, it is helpful to complete all of the observations first. When scheduling the observations with the individual with ASD, the family and the education or work site, it is important that the person completing the observations is familiar with the skills he or she will be observing. It is also important to schedule them during an activity that enables the observer to collect accurate information about the individual. For example, when conducting the leisure/recreation observation, try to ensure that it is an activity that allows for social interaction with the individual's peer group and involves the person using transportation into the community. Before conducting the observation at the person’s place of employment, be sure to communicate with the individual’s job coach and/or supervisor about the observation and ask if there is a good place for you to conduct the observation so that you are out of the way of other employees.

3. **CONDUCTING THE OBSERVATIONS**
   
   It is essential when conducting the observation section that enough time is allotted to observe all of the categories. Items that focus on social interaction such as peer relationships should be scored only after sufficient time has passed in order to obtain an accurate rating. It is recommended that the observations last at least an hour and a half. When completing the observation section, please be careful not to disrupt ongoing routines and activities. Be sure to complete all three observations before scheduling the interview process.

4. **CONDUCTING THE INTERVIEW**
   
   Interview times will need to be arranged with the individual, primary caregivers and a member of either the school or the employment site (job coach or supervisor). The interview session should be completed in a relaxed environment that is familiar and comfortable for the individual, ideally his or her home environment. There are 78 interview questions grouped into eight categories. The number of questions asked will depend on which of the three levels the individual is in. For example, under the category of self-determination, individuals in Level 1 will complete questions 11-17, while individuals in Levels 2 and 3 will complete questions 11-18.

5. **SCORING THE ASSESSMENT**
   
   When scoring items on the assessment, it is critical to stay mindful of both of the scoring scales. The first scale rates the level of independence with which the individual is able to perform the skills. The second scale rates the individual on the number of environments where he or she performs the skills. When scoring an item, always start with number 1 and continue up the scale until you find the score that corresponds to the individual’s level of performance.
Ratings are assigned in the following manner:

A rating of 1 is given when the individual does not perform the skill at all.

A rating of 2 is given when the individual requires physical prompting to perform the skill. An example of this would be hand over hand or full physical prompting.

A rating of 3 is given when the individual performs the skill but requires extensive prompting. Extensive prompting is defined as the use of three or more different types of prompts, modeling, pictorial, verbal or written.

A rating of 4 is given when the individual is able to perform the skill but requires limited prompting. Limited prompting is defined as the use of one or two of the following types of prompts: gestural, verbal, pictorial and/or written.

A rating of 5 is given when the individual is able to perform the skill with no prompts required. He or she may still need to have supervision but is performing the skill independently.

When scoring the Environmental Scale, start with a rating of 1 and continue upward until you obtain the correct score for the individual.

A rating of 1 is given when the individual does not perform the skill, therefore is not completing it in any environment.

A rating of 2 is given when the individual is performing the skill in one or two familiar environments.

A rating of 3 is given when the individual is performing the skill in three or more environments. The environments should include unfamiliar environments.

6. CALCULATING THE SCORE

After you have attained a final score for each of the individual items for each domain, you will total the scores across all items within a domain and place that score in the box over the total possible score for that domain. Calculate the total possible score by dividing the score the individual achieved by the total possible. See below for an example:

<table>
<thead>
<tr>
<th>LIFE SEEKER</th>
</tr>
</thead>
<tbody>
<tr>
<td>7. Demonstrates problem solving.</td>
</tr>
<tr>
<td>8. Demonstrates the ability to request help.</td>
</tr>
<tr>
<td>9. Indicates support needs.</td>
</tr>
<tr>
<td>TOTAL SCORE FOR SELF-DETERMINATION / ADVOCACY</td>
</tr>
</tbody>
</table>

Transfer the percentage for each domain and each observation and the interview for Level of Independence and Environments Performed to “Section I: 1. Percentage” at the back of the assessment.
Once you have completed this transfer, you may use the graphs in “Section I: 2. Visual Representation of the Results” to develop a visual representation of the focus person’s observed and described skill levels. You may draw the bars using marker or input the scores to the Excel spread sheet to have the graph self-populate. See example below:

A. **Home Observation**  Check the Level of Assessment that was administered: [ ] Life Aware  [ ] Life Explorer  [x] Life Seeker

![Graph Example]

The purpose of this graph is to provide the team with a visual representation of the focus person’s relative strengths related to each of the domains across the observations and interview. This should allow the team to discuss the focus person’s strengths and needs with greater understanding.

7. **CONVENING A TEAM MEETING (SECTION II)**

Once you have completed Section I, you will then convene a team meeting to discuss the results and formulate plans and goals for the focus person’s Individualized Plan. This tool was designed with the sections of the Individualized Education Program in mind, however, the questions addressed in Section II: Part 1 (Team Analysis, Consideration and Discussion) and Part 2 (Bridging the Gap from Analysis to Planning and Goal Setting) are applicable to any individualized planning process, including an Individualized Plan for Employment or an Individualized Plan for Community or Home Independence. If it is difficult to convene a team meeting to discuss these questions in person, the administrator of the tool may contact team members separately to gather thoughts on the questions and issues presented in Section II.

8. **CREATE YOUR PLAN!**

Upon completion of Section II, the team will be prepared to develop an individualized plan to assist the focus person in achieving greater independence across all of the skill sets included in the tool. Armed with knowledge of the individual’s strengths, challenges, skills and interests, you and your team are ready to set him or her on the path to adulthood. Remember – there is no right transition plan for everyone and each transition plan is always a work in progress. Goals are set in order to move forward and with a proper plan, the individual will reach new heights.

C. INTEREST AND PREFERENCES

1. What are your strengths?

2. Who do you spend your free time with and what do you like to do?

3. What are your short term and long term goals? Include career goals.
4. What places have you thought about working? 

5. What jobs would you like to learn more about? 

6. What, if any, interfering behaviors do you have? 

7. How do you reduce anxiety? 

8. Additional Comments: 

---

**D. ** **EDUCATION**

Graduate from high school?  
☐ YES  ☐ NO  
Projected Date:

Diploma Received:  
☐ Standard  ☐ GED  ☐ Modified 

**E. ** **MEDICAL INFORMATION**

Do you have any medical, environmental, sensory or physical restrictions?  
☐ YES  ☐ NO 
If yes, please explain:

Are you currently taking or have you taken (in the past) any prescribed medications?  
☐ YES  ☐ NO 
If yes, please list current medications and describe any adverse side affects:

Do you have a history of seizure activity?  
☐ YES  ☐ NO 
If yes, describe seizure protocol:
Do you have a history of substance abuse? □ YES □ NO
If yes, please describe:

Are you currently or have you in the past attended therapy? □ YES □ NO
If yes, please describe:

F. Benefit Status

Do you receive Supplemental Security Income (SSI)? □ YES □ NO
Do you receive Social Security Disability (SSDI)? □ YES □ NO  Amount: ______________
Is this a survivor benefit? □ YES □ NO
Check if you receive any of the following:
☐ Medicare  ☐ Public Assistance
☐ Medicaid  ☐ Other disability related income benefits
☐ Food Stamps  ☐ Ticket to Work
Check organization which you receive services from:
☐ State Department of Rehabilitation Services
☐ State Department of Blind and Visually Impaired
☐ Centers for Independent Living
☐ Department of Mental Health
☐ Intellectual Disability/Developmental Disability Services
☐ One Stop Career Centers
☐ Assistive Technology Services

## Interview

### Career Path and Employment

For individuals in Level 1 LIFE AWARE, please complete questions 1-6. Individuals in Level 2 LIFE EXPLORER, please complete questions 1-10. Individuals in Level 3 LIFE SEEKER, please complete questions 1-5 and 7-10.

1. **What chores does the person do around the house and how often?**
   - NOTES:
   - Level of Independence: 1, 2, 3, 4, 5
   - Environments Performed: 1, 2, 3

2. **Does the person know why one works and what one receives through working?**
   - NOTES:
   - Level of Independence: 1, 2, 3, 4, 5
   - Environments Performed: 1, 2, 3

3. **Indicate the type of supports required by the person in various activities (home, leisure, work).**
   - NOTES:
   - Level of Independence: 1, 2, 3, 4, 5
   - Environments Performed: 1, 2, 3

4. **Discuss how the person demonstrates appropriate work habits, including:**
   - punctual
   - organized
   - accuracy
   - accepts feedback
   - systematic
   - efficient
   - time management
   - neat and clean
   - problem solving
   - NOTES:
   - Level of Independence: 1, 2, 3, 4, 5
   - Environments Performed: 1, 2, 3

SECTION I: PART 2. VISUAL REPRESENTATION OF RESULTS

A. **Home Observation**
   - Check the level of assessment that was administered:
     - Life Aware
     - Life Explorer
     - Life Seeker
   - Graph showing Home Living Skills, Leisure/Recreation, Peer Relationships, Social Communication, Health and Safety, Self-Determination/Advocacy.

B. **Leisure/Recreation Observation**
   - Check the level of assessment that was administered:
     - Life Aware
     - Life Explorer
     - Life Seeker
   - Graph showing Home Living Skills, Leisure/Recreation, Peer Relationships, Social Communication, Health and Safety, Self-Determination/Advocacy.

C. **Work/Education Observation**
   - Check the level of assessment that was administered:
     - Life Aware
     - Life Explorer
     - Life Seeker
   - Graph showing Leisure/Recreation, Transportation, Community Participation and Personal Finance, Peer Relationships, Socialization, Social Communication, Self-Determination/Advocacy, Career.
D. **Interview**

Check the level of assessment that was administered: [ ] Life Aware [ ] Life Explorer [ ] Life Seeker

- Home Living Skills
- Leisure/Recreation
- Transportation
- Community Participation and Personal Finance
- Peer Relationships, Socialization, Social Communication
- Health and Safety
- Self-Determination/Advocacy

**SECTION II: TEAM MEETING**

**Part 1: Team Analysis, Consideration and Discussion**

Team Members Present for Discussion and Priority Setting:

A. Do team members agree that the observations and interview data represent their knowledge of the person? If not, describe any discrepancies.
B. What are this individual’s relative strengths among the 8 domains?

C. What are this individual’s relative needs among the 8 domains?

D. Looking across all domains, list 3-5 skills that are priorities for this individual to learn in the next year:

   1. This individual would benefit from learning:

   2. This individual would benefit from learning:

   3. This individual would benefit from learning:

   4. This individual would benefit from learning:

   5. This individual would benefit from learning:
E. Looking across all domains and considering this person’s past learning experience, list any skills that should be modified to enhance this individual’s independence without having to perform the skill as it is typically performed by those without disabilities. Describe how the performance of the skill will be modified so that this individual can participate with limited support. (For example: Instead of counting change, this person will use a debit card.) These skills can be included as goals or as modifications in the individual plan.

1. Instead of (skill) ________________________________________________________ this individual will: ________________________________________________________

2. Instead of (skill) ________________________________________________________ this individual will: ________________________________________________________

3. Instead of (skill) ________________________________________________________ this individual will: ________________________________________________________

F. Looking across all domains, identify school, community, work and home experiences that would enhance this individual’s learning opportunities. Describe how you will incorporate these experiences into the year and which team members will take responsibility for making the necessary connections to implement these plans.

**G.** Considering the people and agencies currently providing direct supports (such as teachers, in-home support providers, parents, etc.) and indirect supports (agencies funding direct supports or agencies providing case management services), list any other persons or agencies with whom this individual should connect. Include the team member who will take responsibility for ensuring that the contact with the person or agency occurs.

</table>

**H.** List any other important discussion points that have occurred during this team meeting.
A. Present Level of Performance: You can collect information for the Present Level of Performance from across the Assessment. In this space, list the most important points that must be a part of the Present Level of Performance. Include information provided in Section II, Part 1, Questions A, B, and C.

B. For each domain in the Assessment, include below any specific transition goals that should be included in the transition plan related to any of the domains in the Assessment. Include information collected from Section II, Part 1, Questions F, G, and H.

1. Career
2. Self Determination/Advocacy
3. Health and Safety
4. Peer Relationships, Socialization, Social Communication
5. Community Participation and Personal Finance
6. Transportation
7. Leisure/Recreation
8. Home Living Skills
C. IEP Goals: In order to develop goals from this Assessment, complete the grid below with the information from boxes D, E and F above:
Start every goal with the phrase, “Individual’s name will.” An example is given in the first row below.

<table>
<thead>
<tr>
<th>Insert skill (Box D or E)</th>
<th>Insert experience (Box F)</th>
<th>Check the level of independence</th>
<th>Check the environments where it will be performed</th>
<th>Insert percentage of correct responses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Apply for jobs</td>
<td>In the community, within walking distance to his/her home, at the local department store or other retail establishment</td>
<td>☐ independently, without any support (may include shadowing depending on agency policies) ☐ with limited prompting (verbal, gestural, pictorial or written) ☑ with extensive prompting (verbal, gestural, pictorial or written) ☐ with physical prompting ☑ include any specific prompts: given a rubric and scoring guide and teacher assistance</td>
<td>☑ in one or two known environments ☐ in three or more environments</td>
<td>with 85% correct completion of the application and production of his/her own resume</td>
</tr>
</tbody>
</table>
