   a. Charles Copeland
      i. Hello my name is Charles Copeland and I am apart of the class off 2019 and majoring in Geosciences. I decided to join the USLC to improve bonds between the broader co-op and independent students community. I have seen individual sporadic social initiatives in this regard work to great success, and I want to create something more lasting that can solicit the help and support of the administration and the undergraduate student government. I have a lot of concerns, experience and expertise regarding the co-op community in particular. I currently have administrative duties within the 2 Dickinson Street Co-op. I’m also currently president of the Princeton Student Climate Initiative.
