District hillclimb classes are only created based on a clear need to provide a fair basis for competition, based on either machine specifications (such as engine size) or rider characteristics (such as age), or a combination of both. Machines and/or riders who have a fair opportunity to compete in existing displacement or age classes will not be granted secondary/redundant district classes.

The King of the Hill class is comprised of the ten (10) fastest riders of the day (no substations). For this class, points will be awarded by rider and not by qualifying class. Riders who qualify in the top ten from more than one class must ride the machine they had their best qualifying ride on.

King of the Hill class eligibility on hills with dual lanes where a significant difference exists between the two lanes: The club referee will determine which classes are eligible to qualify into the KOTH class by assigning them to the same lane, based on factors such as rider entry counts and the need to complete the event in a timely manner. Class priority for KOTH eligibility is as follows:

- Open class
- 750 class
- 600 class
- 450 class
- ATV class
- Senior Class
- 250 class
- Exhibition Classes

On dual lane hills where lanes are effectively equivalent and on single lane hills all amateur riders are eligible to qualify for KOTH.

Classes may be run in any order at the discretion of the promoter.

Motor vehicle mishaps in competition or otherwise, can result in injury or death. Minors without parental consent or supervision should never use motor vehicles.

SECTION B. HILL DEFINITIONS

- 1) The log shall be not more than 30 feet nor less than 20 feet from the start/timing line and on a relatively level surface at the bottom of the hill. The area between the log, the start/timing line, and the sidelines will not be considered part of the hill course but rather as a staging area, and may be prepared within a reasonable amount of time by the rider or his pit crew for his ride. Reasonable amount of time is determined by the hosting club's event referee, and shall be the same for all riders.
- 2) The finish of the hill shall be at least 20 feet below the effective crest of the hill.
- 3) A rider shall be given at least two (2) rides in each class. Each rider's single best ride is used for scoring the class. If ties exist after the second round, they will be broken by the rider's other run.
- 4) Equipment malfunction, or any other reason, the event will be declared over as of the end of the last complete class run. Any second rides that have been taken in any class that was not run in its entirety will be eliminated from scoring, and the class will be scored by the first round only. If the event did not complete the first round for all classes, the event will not count towards district points. The hosting club's event referee is responsible for determining if/when to end an event early.
- 5) A Hillclimb attempt ends when the forward progress of the motorcycle ceases with the rider astride the motorcycle. The rider must have at least one hand on the handlebars when crossing the finish line in order to receive a time-otherwise, distance will be measured to the point at which the rider lost control of the machine. A rider cannot dismount and push, nor can the rider use his feet to push while astride the motorcycle. Measurement shall be taken from the starting line to the center of the front wheel at the stopping position.
- 6) There shall be no riding on the hill ten (10) days before a national amateur event.
- 7) Clubs/promoters are encouraged to use a dual-lane start when possible to help ensure the timely completion of an event. In order to support a dual-lane start, the total starting area must be at least 40 feet wide, and each starting lane must be at least 20 feet wide. The club may or may not extend the lanes up the hill past the starting line at their discretion – the only requirement being that each lane must be at least 20 feet wide at all points. When utilizing dual starting lanes, the staging area must be arranged to accommodate 2 staging lanes, such that a rider in one lane can be preparing for his attempt while a rider in the other lane is actively competing.
 - a) When using a dual-lane start, there must be a sign posted in the staging area designating which classes are to be run in which lane. Lane assignment must also be announced at the riders meeting.
 - b) Every rider in a given class must use the same lane, and the same lane must be used for both rides for each class.

SECTION C. EQUIPMENT

 - b. Re-grooving or cutting of tread may be done if in a workmanlike manner. Material may be removed from the tire, but no material may be added to the tire.
 - c. Re-capped or retreaded tires will not be allowed (paddle tires, etc.).

- 5) Wheels: Any type of commercially available front or rear wheels may be used.
- 6) Frames: Frames must be fabricated in a safe and workmanlike manner. Gas tanks: There is no minimum gas tank size. However, all gas tanks must be mounted in a workmanlike manner and have a shut-off valve attached.
