Pearson Solutions for California’s Community Colleges

Pearson is committed to providing course materials and services that support California's Vision for Success. Our aim is to help each college achieve the AB705 goal of maximizing the probability a student will enter and complete transfer-level coursework in English and Math within one year.

**English, Math, and Statistics Corequisite Courses**
- $57* for MyLab access (combined price for both developmental and credit-level materials)
- $49* for MyLab and/or Revel access (combined price for both developmental and credit-level materials)
- Must be delivered via Pearson Inclusive Access
- Includes two hours of Smarthinking online tutoring access
- Enterprise administration dashboard provided for administrators

**ESL Courses**
- **Option 1 (Institution Pays for Student Access):** Digital Access to any one level of the Azar-Hagen Grammar Series (eText + MyEnglishLab), as chosen by the institution, and access to any one level of University Success Writing, Reading, or Oral Communication. (print student text + MyEnglishLab)
  - 0-500 Student Users: $46* per student user
  - 500+ Student Users: $40* per student user
- **Option 2 (Pearson Inclusive Access):** $30* per student, per any level of the Azar-Hagen Grammar Series and University Success with no limit on number of products purchased.

MyLab/Revel course creation assistance, training, and professional development support provided for faculty for all course areas.

*These prices are for one-term access, exclude the institution's bookstore markup, and are contingent upon the signing of an Inclusive Access agreement.

**Pearson Inclusive Access**
Pearson Inclusive Access provides every student with access to affordable, high-quality digital course materials and tools on the first day of class, better preparing them for each term. For instructors, we've simplified the implementation process with a codeless access option, access with or without a LMS, institutional billing, and an enterprise administration dashboard. Our California offer is designed to support AB705-impacted courses.
Corequisite Course Solutions for English, Math, and Statistics

Pearson has partnered with institutions across the United States to create a variety of solutions for corequisite courses. MyLab offers ready-to-go courses that can be tailored to the goals of each institution, helping instructors reach a variety of student learning styles to increase student success.

MyLab™ Math and MyLab™ Statistics  MyLab is the teaching and learning platform that empowers instructors to reach every student. By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student. MyLab courses are available to support corequisite courses in English, Math, and Statistics.

Revel™  Revel is an interactive learning environment that engages students and helps them prepare for your class. Reimagining their content, our authors integrate media and assessment throughout the narrative so students can read, explore, and practice, all at the same time. Thanks to this dynamic reading experience, students come to class prepared to discuss, apply, and learn—from instructors and from each other. Revel courses are available to support corequisite courses in English.

ESL Course Solutions

MyEnglishLab™  Per the Chancellor’s guidelines for English language learners, to achieve transfer level readiness and academic preparedness, our California ESL team recommends the Azar-Hagen Grammar Series and the University Success series. MyEnglishLab helps motivate and engage learners by allowing them to work at their own pace, repeat activities, and get extra support outside the classroom—while also providing instant grading and reporting for teachers.

Tutoring

Smarthinking™  Smarthinking online tutoring supports student success by providing students with 24x7 access to a live tutor or writing review so students can get help the moment they need it. Together, Inclusive Access and Smarthinking can drive student achievement and help enhance course completion and retention.

Professional Development

Accredited Professional Development Workshops will be provided by subject matter experts that can offer best practices for using Pearson’s products and services within your implementation model. Workshops are available on a variety of topics including:

- Corequisite Course Development in Math and English
- Using Growth Mindset Research to Enhance your Course
- Developing GRIT: Help Your Students Finish What They Start

Data & Analytics

Pearson will partner with Inclusive Access institutions to provide enterprise administration dashboards. We can work with the institutions to determine what types of data insights would be helpful to measure success and identify opportunities for improvement in their redesign plans. Consider these questions that the data can help answer:

- What student behaviors are most predictive of course success?
- Which learning outcomes are students struggling to master?
- What type of intervention is most-effective in helping at-risk learners?
