## PROGRAMA 2000 STRATEGY FOR RECATALANIZATION

This document, dated 1990, was shared by the upper echelons of Catalan Government and personally revised by Jordi Pujol, President of Catalonia from 1980 to 2003. It laid the grounds for a Catalan nationalist strategy that has, slowly but steadily, taken place in Catalonia for the past 28 years. Present day Catalan political parties are direct ideological descendants of CDC and UDC, authors of the document.

The following is the complete text, translated from the original Catalan version.

### 1.-COLLECTIVE THINKING

Goals.

Development of the following lines of awareness:

**a) Configuration of the Catalan personality: Explanation and empowerment of the basic, defining and positive axes of our collective personality.** Choice and dissemination of the concepts that allow the maximum strengthening of our people (be more educated, more modern, more civic, more supportive, more European, love work, taste for a job well done, verify the roots, validity of Christian values ...) in accordance with the challenges posed by the present world.

b) Diffusion of the Catalan history and the Catalan national reality: Diffusion of the crucial events of our history and our historical figures, as well as the contribution of the Catalan people to European culture and science. Promotion of popular festivals, traditions, customs and their mythical background.

**c) New concept of nation within the European framework: Catalonia (Països Catalans), as an emerging European nation.** Reaffirmation of the European sentiment. A Europe without borders must be a Europe that recognize its nations.

d) Discovery of our future potential: Catalonia (Països Catalans), as the center of gravity of the south of the EEC. Preferential economic-cultural performance on the north-western Mediterranean arch and the Occitan-Catalan area. Maximum attention to the axis formed by the Barcelona-Montpellier-Toulouse triangle. We must also take into account the relationship between Catalonia and Aragon. And mutual intercomprehension area of Alicante to the Alps.

e) **The demographic factor: Only the populations who are young advance. It is necessary to make our people aware of the need to have more children to guarantee our collective personality.**

f) **Remembrance of grievances: Catalonia is a discriminated nation that can not freely**

**develop its cultural and economic potential. Discovery, verification, weighting and dissemination of discriminatory facts, shortcomings, etc., in a clear, forceful and systematic way. Remarking the negative impact that this has for the whole Catalan people and for each of its citizens.**

g) **Collective awareness raising: Catalonia is a culture that walks in search of its sovereignty within the European framework. Identitarian awareness to strengthen the social soul.** Underpinning our own center of gravity within Europe. Reform of the Autonomy treaty within Spain.

h) **Social aspect: Greater freedom for Catalonia means greater social welfare for all its citizens. Nationalist sentiment**

”

“  
**New concept of nation within the European framework: Catalonia (Països Catalans), as emerging European nation.**

j) Revitalize the concept of Catalonia as a living, cohesive civil society, with a sense of belonging, generating material and spiritual wealth.

Fundamental activities:

1.-It is necessary to bring together different groups of people, institutions and associations that are determined to develop the lines of awareness mentioned above and to disseminate their content.

**2.-We must influence effectively all mass media channels through the people with greater positive social influence. At the same time, entities with cultural extension and population instructing capabilities, that embrace this nationalizing content, should be promoted and strengthened.**

3.-The awareness-raising campaigns to be organized must have as a cornerstone the promotion of popular festivities, traditions, customs and national mythology. **The empowerment of the family model that guarantees biological substitution.** Reform of the Spanish Autonomy treaty with its corresponding explanation of reasons. 4.-Publishing of books, awareness-raising articles and support material for the activities of each area (brochures, videos, cassettes, maps, games, etc.). Towards this goal, we

will create a record of foundations, entities and / or existing publishers with whom we can choose (or if it is in our advantage, create and publish) the necessary awareness-raising material.

A selfish economic agenda disguised as the sectarian conflict of a "Historic Nation with medieval rights" (their words).  
A propaganda-of-fear emotional campaign that does not hesitate to awake the ghosts of our still recent civil war to break the Catalan society apart.**
