Dr. Dorothy Boorse, Gordon College, MA.

Dorothy Boorse received her master’s degree in Entomology from Cornell University, and her doctoral degree in Oceanography and Limnology from the University of Wisconsin-Madison. She joined the Gordon College Biology Faculty in January of 1999. Her primary research and teaching interests are in aquatic community ecology and invasive species. She spends a great deal of time connecting science to non-scientists and looking at ways science and faith integrate, particularly in the area of environmental ethics. She is a coauthor on an environmental science textbook, and lead author on “Loving the Least of These: Addressing a Changing Climate” an initiative of the national Association of Evangelicals to address climate change and poverty.
