**Name:** Kendyl Harmon

**Project Title:** Zentangle Landscape in Ink

**Image Description:** The land of the Dragons meets Alice in Wonderland.

**Project Description:** In Alice the creatures and plants were all part of the story and able to speak their truth and I think the legends of dragons fit well into that space. This land is the thing that connects us to each other and how we work to change and improve it will be what keeps us all together as humans, the creatures and plants can't tell us what they need so we need to work harder to understand.
