

2021 HS CAD Engineering Challenge

Challenge: Use a CAD program to design something that is useful in a kitchen. This may include, for example, kitchen utensils, cutlery, dishes, decorative objects, spare parts of certain household appliances, kitchen furniture, etc.

Provide a multiview orthographic projection with dimensions and an isometric view of the item. Title block must include the name of the item and the scale and be submitted as a single page pdf file.

Upload: 1 pdf file of the finished product
 Video explanation of the product (90 second maximum)
