

THINGS TO CONSIDER WHEN REVIEWING A PERSON WITH DIABETES

ASK!

If they have had any hypos:

- What time of day?
- How often?
- How did they treat?
- Did they need any help?
- Were they aware of the symptoms?

EDEN TOP TIP – Ask about hypos at every diabetes review

INVESTIGATE!

By checking for the following risk factors:

- Frailty (electronic frailty index)
- Renal function
- Medications and adherence
- Timing of medications
- Injection sites
- Diet and lifestyle changes

EDEN TOP TIP – Review blood glucose monitoring profile or Flash/CGM data

DO!

Something to reduce the risk:

- Review and reduce insulin or Sulphonylurea if needed
- Give hypo education and management advice
- Safe driving advice
- Follow up in 1 week

EDEN TOP TIP – Why not use our “How to treat a Hypo” infographic

Check our website, educational modules for all HCP's involved in caring for people living with diabetes.
