# Building a culture of health with community involvement

**Inclusive wellness policies. Focused civic engagement. Sharing community resources.** These are the crucial elements that encompass a healthy city and foster a culture of health. The **Healthier Together Certification** is a program that promotes wellness, encourages the adoption of healthy behaviors, and establishes supportive communities. The certification is an online assessment that looks at organizational best practices and community health outreach to evaluate the overall quality and comprehensiveness of workplace and neighborhood wellness.

The following organizations have received recognition from the City of St. Petersburg and the **Healthy St. Pete** initiative as 2021 Healthier Together Certified Workplaces and Neighborhoods. To see more details about this program and to get your organization certified, visit [healthystpetefl.com](http://healthystpetefl.com).
