« Education for sale »

Top-french selling magazine in Morocco, Telquel, in a coverpage and press folder about privatization of education in Morocco.

“In primary school, the rise of private education does not cause concern: it threatens the right to education for all. Some private schools have become select clubs where you have to pay astronomical fees to get your entry ticket. Ignoring the law, the private sector does not hesitate to empty the public sector of its teachers.”

« The UN warns Morocco on the alarming weight of private education »

Telquel.ma publishes the findings and figures of the study conducted by the GI-ESCR
