Request for Solar PV Training

Native Renewables is committed to providing Navajo families with access to reliable off-grid solar photovoltaic (PV) systems. As part of this initiative, we are partnering with Tewa Energy Services to provide onsite training to groups interested in the fundamentals of PV technology and gaining experience with installation and maintenance of PV systems.

If you are interested in organizing a training event, please fill out the information below and a member of the Native Renewables team will contact you to discuss planning a training session tailored to your specific goals. Introduction class prices are negotiable while advanced courses will require payment to our experienced Native American educators.

**Required contact information**

Name of Primary (organizer’s) Contact: ______________________________________

Phone number: _____________________________________________________________

Best time to call? __________________________________________________________

Email address: _____________________________________________________________

Available to meet in person? _______________________________________________

Potential dates to work with: _______________________________________________

**PV training topics**

Please put a check next to the topics listed below that you want covered during training

General Information on PV systems: _____

Off grid: _____

PV system installation: _____

PV system / battery maintenance: _____

Grid tied to NTUA or APS power grid: _____
**Additional training planning information**

How many participants are likely to attend the training? _________________________

Can you provide a general background of the participants (ex. do some have an electrical background)? ____________________________________________________________
______________________________________________________________________
______________________________________________________________________
______________________________________________________________________

How many hours do you want the training session to be? Typical training hours are 9 am to 4 pm. ________________________________

Do you have any specific time constraints? ________________________________

Will water and lunch be provided? ________________________________

Do you have a space that can be set up like a classroom? ___________________

Will there be access to electricity? ________________________________

Will there be accommodations for a power point presentation (ex. LCD projector)?
______________________________________________________________________
