

WGCX 40K FAQ and Rulings

In addition to the current GW FAQs and ITC FAQ, the following rulings are in effect for all WGCX 40K competitive events: They are presented as question and answer where appropriate, as statements otherwise.

1. The Guiding Light – Look, I didn't want to have to write this thing, but, here we are. 40K is a complex set of rules and interactions. Our guiding principle is to prevent "gotcha!" moments and abusive interpretations of rules. If you can interpret a rule more than one way, choose the less-abusive interpretation. It's good sportsmanship and makes for a better experience for everyone.
2. Can I make an Ogryn Bodyguard my Warlord and/or give him a Warlord Trait? My digital copy of the Codex doesn't have the second sentence that the printed Codex does prohibiting it.
ANSWER: No. The GW Astra Militarum FAQ clearly states, "Page 102 – Ogryn Bodyguard, Bodyguard Change the first sentence to read:" It does not modify or delete the second sentence, which states, "In addition, this model may not be selected as your Warlord, and may not be given a Warlord Trait."
3. Can I use the Stooping Dive stratagem to charge a unit that just charged a unit of Vertus Praetors or Shield-Captain on Dawneagle Jetbike?
ANSWER: No.
4. What about using Stooping Dive to bounce out of an existing Combat and charge another unit?
ANSWER: No.
5. Can a Ynarri psyker use a Soulburst action to cast Smite a second time in the same Psychic Phase?
ANSWER: No.
6. Can make a Heroic Intervention and get 3 free inches of movement?
ANSWER: A Heroic Intervention must end with your character within 1" of an enemy model/unit (and therefore engaged in Combat with them). They say there's no such thing as a free lunch – well, there's no such thing as a free move, either.
7. Can I use the Craftworlds Phantasm stratagem to remove a unit from the battlefield and place them in the Webway, like with the Webway Strike stratagem?
ANSWER: No. Webway Strike is a separate and distinct "deployment" option only available (1) during Deployment, and (2) by using the Webway Strike stratagem.
8. Terrain pieces are just that, terrain. They aren't magic forts that you can hide in and effectively be off the board. So, here's the deal: those buildings with 4 walls and a roof are there to block LOS. You can move over and around them – you can even place models on the roof and get a cover save – but you can't put units inside them. So –
ANSWER: Around? Yes. On? Yes. Inside? No.
9. Do I have to have a Kabal of the Black Heart detachment to use the Agents of Vect stratagem?
ANSWER: Yes.
