Understanding your energy choice

Generation Rate is the cost of creating electricity to power your home. The generation rate varies based on your energy provider and the resources included in your energy provider’s generation supply.

PG&E Delivery Rate is a charge assessed by PG&E to deliver electricity to your home. The PG&E delivery rate depends on your electricity usage, but is charged equally to both CleanPowerSF and PG&E customers.

PG&E PCIA/FF represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E’s above-market costs for generation resources acquired prior to a customer’s switch to a third-party electric generation provider. The PCIA also applies to PG&E customers that elect to take service under PG&E’s optional Solar Choice program. PG&E acts as a collection agent for the FF surcharge, which is levied by the California Public Utilities Commission (CPUC) on behalf of cities and counties in PG&E’s service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers. The PCIA is currently being reviewed by the CPUC and the methodology is subject to change. A final decision is expected later in 2018.

If this comparison does not address your specific rate, please visit us online at cleanpowersf.org or pge.com/cca.
