## Definitions

**Generation Rate** is the cost of creating electricity to power your home or business. The generation rate varies based on your energy provider and the resources included in your energy provider's generation supply.

**PG&E Delivery Rate** is a charge assessed by PG&E to deliver electricity to your home or business. The PG&E delivery rate depends on your electricity usage but is charged equally to both CleanPowerSF and PG&E customers.

**PG&E PCIA/FF** represents the Power Charge Indifference Adjustment (PCIA) and the Franchise Fee surcharge (FF). The PCIA is a charge to recover PG&E's costs for generation resources that are currently above the market rate. These resources were committed to prior to a customer's switch to a third-party electric generation provider. PG&E acts as a collection agent for the Franchise Fee surcharge, which is levied by the California Public Utilities Commission on behalf of cities and counties in PG&E's service territory for all customers. The costs for resources included in the PCIA and FF surcharges are included in the generation rate for PG&E bundled service customers

## Where Do I Find My Electric Rate Schedule?

Need some help finding your electric rate? Go to the "Electric Delivery Charges" section of your energy statement - you'll find your electric rate in the upper left.

The image shows a screenshot of a PG&E Energy Statement. The top header includes the PG&E logo, the text "ENERGY STATEMENT" and "www.pge.com/MyEnergy", and account details: "Account No: 1023456789-0", "Statement Date: MM/DD/YYYY", and "Due Date: MM/DD/YYYY".

The main section is titled "Details of PG&E Electric Delivery Charges" and specifies the billing period "MM/DD/YYYY - MM/DD/YYYY (29 billing days)". It lists the service address as "1234 Main Street" and the "Rate Schedule: E1 S Residential Service", which is highlighted with a yellow box. A yellow line points from this box to the explanatory text below.

Service Information is listed on the right, including Meter #, Current Meter Reading, Prior Meter Reading, Total Usage, Baseline Territory, Heat Source, Serial, and Rotating Outage Block.

The charges are broken down into two periods:
