**Total Green-e® Energy Certified Renewables: 100%**

1. These figures reflect the power delivered to SuperGreen Saver customers in 2022.
2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying California includes: Eligible Renewables (35.8%), Coal (2.1%), Nuclear (9.2%), Natural Gas (36.4%), Large Hydroelectric (9.2%), Other (0.1%), and Unspecified Sources of Power (7.1%). This resource mix was estimated by the California Energy Commission based on the electricity sold to California consumers during 2022.

The average home in San Francisco uses 270 kWh per month. Source: CleanPowerSF/PG&E Joint Rate Comparison
