

**GREEN LUMBER INPUT CAPACITY (BOARD FEET)**

Lumber Thickness (inches)	Micro	Standard	PLUS	TURBO mini	TURBO	TURBO PRO
1	600	1,560	3,053	2,312	4,741	13,667
1.25	650	1,690	3,300	2,550	4,961	14,948
1.5	690	1,794	3,589	2,652	5,292	15,696
2	760	1,976	3,795	2,856	5,513	16,657
2.5	800	2,080	4,125	2,890	5,788	17,084
3	840	2,184	4,208	3,060	5,954	17,938

Chart outlines the approximate green lumber input capacity for the iDRY Product line. The following are assumptions related to this chart:

- For the Micro, Standard and Plus the sticker thickness used is 0.75 inches
- For the Turbo product line the plate thickness used is 0.5 inches
- Perfect layers of lumber (ie: boards that are cut to cover the full length of the available space).
- Pack height for turbo models accounts for bladder space
