HOW TO CREATE YOUR OWN ROCKS

**Gather your supplies:** disposable gloves, face mask, Cement All, Silicone soap molds, H2O, mixing bowl, something to stir with

**MIX CEMENT**
Use disposable mixing container and stirring stick
Put on disposable gloves and face mask
Mix 4 parts Cement All to 1 part water
Stir until no lumps

**POUR CEMENT MIX INTO MOLDS**
Evenly pour the cement mixture into the silicone molds
After filling each mold, gently shake the silicone mold back and forth to smooth out the cement so that the top appears flat and smooth

**LET SET FOR 2 HOURS**
Keep forms out on counter for two plus hours to dry...
when the cement color lightens, you are ready to pop them out of forms...
Gently pop them out like you would an ice cube try lightly spray them with a clear top coat of krylon to seal

**PAINT AND CREATE SOME KINDNESS**
Base coat your rocks with acrylic paint
Use paint pens to create a design or an inspirational message on your rock
Add a hashtag on the back so that people can find you on social media

**APPLY CLEAR SEALANT**
Apply clear sealant to your rocks to protect them from the sun and rain and to protect the environment as well!
