Flowers are blossoming, birds are chirping, and summer is in the air! For this activity, we are going to be building our own binoculars to go bird watching!

**MATERIALS**
- 2 Toilet Paper Rolls
- Single Hole Punch
- Yarn
- Scissors
- Tape (Masking or Scotch)
- Construction Paper
- Coloring Tools
- Embellishments
- Bird Watching Booklet (Included)

**DIRECTIONS**

Begin by using the hole punch to create one hole in each tube towards the top for the string. Next, secure the 2 toilet paper rolls together with tape and ensuring the holes are on the outside.

Next, knot each end of the yarn through the holes to create a strap. Finally, wrap construction paper around the tubes and decorate your binoculars! You can use crayons, markers, stickers, and more to make them unique!

Now that your binoculars are ready, peer out a window or go on a nature walk to observe these birds in their natural environment! Use the booklet to identify birds that are found on Martha’s Vineyard. If you don’t live on MV, use a blank template to draw your own finds!
