

# AUDIOSCAPE - GOLDEN58

Thank you for purchasing the Golden58 Stereo Tube Preamp from AUDIOSCAPE. The Golden58 originated with the idea to create the 'American Answer' to the legendary British tube preamps from the 1960's. With the help of Hi-Fi wizard Damon Coffman (Tube Guru & founder of Coffman Labs), we took this truly unique design & molded it over the course of the last 2 years into what became the Golden58. It's truly the perfect companion for any serious Condenser Microphone. As the name suggests, its tone is as Golden as its front panel.

We hope you enjoy it as much as we do!

## FEATURES

- **Handcrafted in the USA** in Small Batches, a **Limited Series** of approx. **300** units
- **2U**, 2 channel Tube Preamp, **Big & Bold** Musical Tube **Warmth, Grit & Vibe** at its finest
