

THE BLACK BULL

Welcome to the Black Bulls wine list. We have broken the wine list into different sections hopefully to help guide its navigation. Firstly, is our concise wine list which presents an eclectic mix of organic, biodynamic, some might call 'natural' and conventional wine to suit all. Beyond that we have the cellar list, the rest of the wines we have on site, which is perfect for the wine geek to find something special. Bottles we've been resting, featuring well known classics, and some little-known hidden gems.

The wine list reflects Nina Matsunaga's philosophy when it comes to food, focusing often on smaller producers who care about their craft. Sometimes we forget that producing wine is another form of farming and those methods of farming are crucial to the final product. When selecting wines this has been a focus, but also a challenge as sustainability is such a complex subject and further marrying that with guest expectations is never going to be easy. Having said that, flavour, like anything we serve, is at the forefront when selecting.

Looking at the list you might not see the usual suspects but within the list's pages there's something for everyone. If you don't see what you recognise, I'm sure there's something within the list along the same lines. We also embrace wines from outside the main regions and countries, from places who have been producing wine for centuries and produce some of the best on the list. Some may be cloudy, have a slight fizz that will settle but these are a natural trait of some of these wines only adding to their flavour and complexity. There are however also many that don't, so if you swayed either way just ask, and someone will help.

The world of 'natural' wines is a fascinating one. Many of the techniques and practices are not new ones, but old ones before the industrialisation of wine making began. Orange wine is certainly not a new concept, a fad of young drinkers, it's thousands of years old and would have been much more common than white wine. Their primary focus is to produce a wine as true and honest as they can, with minimum intervention. It's this 'minimum intervention' that really interests, wines that are left to sing for themselves not tuned with added sugars, sulphites, colours, and other flavours to mask its identity. You still must acknowledge the importance of more conventional wines though. Those that still practice good farming methods and produce good wine. I think if you understand both sides of the wine world then you can achieve a well-balanced wine list, which we hope we do at the Black Bull Inn.
