The Clean Energy Education and Empowerment (C3E) Awards recognize mid-career women who have demonstrated outstanding leadership and accomplishments in the clean energy sector. Mid-career is generally defined as an individual with expertise beyond entry level but with significant opportunities to grow before the end of one's career, typically with 10-15 years of professional experience. Each winner receives a monetary award and national recognition. Winners of the 13th Annual C3E Awards will be announced at the C3E Women in Clean Energy Symposium in the fall of 2024.

**C3E AWARD CATEGORIES**

- Business
