8-9 million Americans have gout, which is:

- The most common form of inflammatory arthritis
- Caused by uric acid build-up in the joints
- Experienced as excruciating attacks

Uncontrolled gout can stem from:

- Struggle to maintain medication regimen
- Delay in seeking treatment
- Inadequate dosage
- Medication intolerance
- Need for diet or lifestyle changes

Uncontrolled gout also affects as many as 1 in 10 patients who don’t respond to traditional medication and require specialized treatment.

To address uncontrolled gout, patients can:

- Abandon myths about “curing” gout
- See a gout specialist
- Find support to keep going
