Corporate Governance

The Saskatchewan Pork Development Board (Sask Pork) is an agency established under the Agri-Food Council and complies with the provisions of The Agri-Food Act, 2004, The Agri-Food Regulations 2004, and The Pork Industry Development Plan Regulations, 2013 pertaining to its financial reporting, safeguarding public resources, spending, revenue raising, borrowing and investing activities.

Internal Controls

Sask Pork adheres to internal financial controls as detailed in the Policy and Operating Procedures Manual approved by the Board of Directors in September 2005.

Auditors Report - Year Ending July 31, 2015 ....................... 27
Sask Pork continues to represent our industry as many changes affect the hog sector.

Consumers need to know our pork is safe, nutritious, great value and produced in a sustainable manner. Our efforts in promotion, quality assurance and traceability provide industry information necessary for government, support services and consumers.

Animal welfare, traceability, disease control and risk management are active files receiving attention from staff and directors both provincially and nationally.

Financially, 2015 was a decent year for most of our members. This follows 2014 when profits were for the most part historic. These are welcome times after suffering through years where losses were the norm.

Western Canada is unique in north America in that it is one of the only places that does have excess slaughter capacity. Eastern Canada and most of the USA are concerned about slaughter capacity going into 2016. Most of our plants are operating under capacity, some seriously. Our challenge and opportunity is to grow hog slaughter numbers to fill these plants. The Saskatchewan Pork Development Board is working with producers and industry partners to help make this happen.

I want to thank our producers and staff for your dedication and support.

May 2016 be a year of growth and prosperity!

Florian Possberg
Chairman
Another decent year for the hog industry has certainly started to change attitudes and brought increased interest in renewal. Following the most profitable year in history, 2014/15 was another steady, profitable year. Last year Saskatchewan's production increased 5%, all the former idled transition barns have been bought, with a few already brought into production and all the major packers are looking at options to increase production to fill the vacant capacity at the processing plants. Full capacity means much better efficiencies.

The Board of Director's have set a very realistic goal of establishing 100,000 new finishing spaces in Saskatchewan within the next three years. This goal is only 10% of what will be needed for all processing plants in western Canada to achieve full capacity. Given the trend towards further integration, there is a greater recognition that producers and processors must work together to achieve the efficiencies required to compete globally.

During the year the swine health file remained a top priority. Saskatchewan, through the very diligent efforts of producers and truckers, maintained its PEDv free status. Sask Pork, with the support of the Government of Saskatchewan, continues to work on biosecurity, truck wash inventory and protocols and working with VIDO on a promising vaccine to prevent PEDv losses in piglets. We are also working on a long term solution to automatically clean and disinfect transportation units. Through our encouragement and research funds from Swine Innovation Porc, scientists from the University of Saskatchewan and PAMI have been given the challenge of developing an automatic system of cleaning transport units in less than an hour, for under $250. So far Phase I, a hydro vac base prototype, has passed the proof of concept stage and now Phase II of the research will further develop this technology.

Sask Pork has also been working on a number of interesting initiatives such as; a revamping of the CQA® and Animal Care Assessment™ creating our social media program, further work on the hedging initiative, developing costs and business models for new construction, creating a TV ad and hosting a very successful Symposium.

On a personal basis, I was elected Chair of CPI's Board in February. CPI is the Canadian pork industry’s international marketing organization and is very active in generic pork promotion both, with the new Canada Pork Domestic Promotion initiative, and internationally hosting seminars and attending trade shows around the world. CPI is also instrumental in assisting members with trade access issues and providing advice for our Canadian trade negotiators as they work on trade deals such as TPP.

In closing, I would like to thank our Chairman, the Board of Directors and staff for their support, guidance, and dedication to our industry during the past year.

Neil Ketilson
General Manager
Elections

Elections are held in November of odd numbered years. The Board of Directors consists of six registered producers who may hold office for a maximum of three consecutive, two-year terms.

The Executive is elected annually by the Board of Directors at the first scheduled meeting of directors following the Annual General Meeting.

Mission

To provide leadership for producers and collaborate with stakeholders to ensure the Saskatchewan pork industry’s continued environmental, social and economic sustainability.

Vision

To position the Saskatchewan pork industry as a preferred supplier of high quality, competitively priced pork products for the global market.

Risk Management

On July 10, 2015, Agriculture and Agri-Food Canada (AAFC) approved funding for a Canadian Pork Council (CPC) project under the AgriRisk Initiatives program. This project will gather statistics regarding current forward pricing program opportunities in various markets in Canada. The CPC in partnership with its provincial members, hope to gain a greater insight into why Canadian farmers utilize hedging and other risk management strategies to a lesser extent than their US counterparts. The project's objective is to develop a structure for a program to mitigate the risk of margin calls that would complement existing risk management tools. Under the project, consultations will occur with producers, financial institutions, packing plants, and organizations providing risk management services to producers for their assessment of this risk.

Sask Pork worked closely with the CPC and Ontario Pork in applying for this funding, and will play a key role in managing the project. Sask Pork has advocated for increased government support for private sector risk management over the past several years. In cooperation with several other provinces and the Canadian Pork Council, Sask Pork developed the concept for a program which would provide a government loan guarantee for margin calls, making it easier for producers to obtain financing specifically for this purpose. This project is the most recent phase of this research, which has included the discussion paper Sask Pork authored in 2012, and two actuarial studies previously funded by AAFC.

Traceability

On July 1, 2014, amendments to the Health of Animals act came into force that made swine traceability mandatory in Canada. The regulations require anyone moving swine to report the locations of origin and destination, the date/time of the movement, license plate of the vehicle, and the quantity of animals and identification numbers applied to the animals. The regulations also require tags or tattoos to be applied to animals for certain types of movements. On July 1, 2015 the regulations took effect for farmed wild boar.

Under the Canadian Health of Animals regulations, either a tag or tattoo bearing an assigned slap tattoo number is an acceptable identification for animals going to slaughter. However, as of January 1, 2015, many U.S. sow slaughter plants began requiring official ear tags on sows that they slaughter. This requirement applies to both US. and Canadian animals, and some plants apply monetary penalties for noncompliance. Though most Canadian producers do not sell directly to these plants, tagging culled breeding stock has basically become a de facto requirement for sow buyers who supply these plants.

Sask Pork continues to assist in the administration of the program on behalf of the Canadian Pork Council for producers in Saskatchewan. Sask Pork's efforts centre around registering producers and slaughter plants, creating PigTrace accounts, and assisting these stakeholders with ordering tags, issuing identifiers (herd marks), and assisting with movement reporting. In 2014/2015, Sask Pork registered and/or created new PigTrace accounts for 58 stakeholders and 62 premises.

To date, 31,980 movement events in Saskatchewan have been reported, accounting for 7.8 million animal movements. We would like to commend Saskatchewan producers for their active commitment to this program during its first year of operation.

InterPIG

In 2014/2015, Mark Ferguson continued to represent Canada on the InterPIG international cost of production benchmarking group. InterPIG data is the most reliable data available that compares prices and cost of production in various countries around the world. The participants include the U.S., Brazil, and a number of E.U. countries. The participating countries are responsible for 90% of the world's pork exports, so the data represents our most significant competitors.
Canadian producers continue to be very competitive in terms of total cost of production and feed cost. In 2014, Canada had the third lowest cost of production of the 15 participating countries at $180/ckg (all figures expressed in Canadian hot dressed carcass basis and Canadian dollars). Only Brazil's Mato Grosso region and the U.S. were lower at $150/ckg and $174/ckg respectively. Italy had the highest cost of production at $281/ckg, while Spain reported the lowest E.U. cost at $215/ckg. Denmark reported their costs at $222/ckg.

In terms of price received for hogs, Canada's record prices were ahead of many European countries in 2014 at $231/ckg. The Mato Grosso region of Brazil reported the lowest price at $208/ckg, while the highest reported price in the data was Great Britain at $273/ckg. The U.S. reported price was $258/ckg.

Canada was the third most profitable region in the data, behind only the U.S. and Brazil (Mato Grosso).

Sask Pork Cost of Production Survey

This year, Sask Pork conducted a cost of production survey. Eight producers participated, and the data helped with a number of projects, including updating Sask Pork's ongoing cost of production model, preparing the InterPIG dataset, and a cost of production comparison that Sask Pork prepared for the Pork Value Chain Roundtable (PVCRT). Thanks to all who submitted data.

Feed Mill Licensing

In February, 2015 the Canadian Grain Commission (CGC) published a discussion paper examining expanding their grain producer protection mandate to include deliveries to feed mills in western Canada by licensing these operations and applying the security requirement provisions to these mills as a condition of their licence.

In April, Sask Pork responded with several recommendations including options for voluntary licensing, exemptions for farm-based mills and exemptions based on mill throughput. We also recommended that the CGC exempt farm feed mills from onerous weekly grain handling statistics that are typically required of process elevators.

Finally, Sask Pork recommended that the CGC look at options other than bonds and letters of credit for feed mills to guarantee payment. A fund-based mechanism, where small contributions/deductions by licensees and grain producers could be collected over time and pooled might be the lowest cost solution.
Swine Innovation Porc (SIP)

SIP is a national organization committed to facilitating research for the Canadian swine industry. They work with private, government and research partners to develop innovative strategies that will make the industry stronger. The Cluster 2 program is comprised of 15 projects with a $17.3 million budget of which $13 million was provided by Agriculture and Agri-Food Canada and $4.3 million provided by private sources.

Swine Cluster 2 projects focus on reducing production and feed input costs, increasing product attributes and prices, and enhancing the adaptability and sustainability of the swine sector. This program includes 15 major research projects, which are also comprised of multiple sub-projects. It involves 27 researchers from 13 universities and research centres across Canada, in addition to a large number of collaborators.

SIP leverages the industry contributions from the seven provincial pork organizations (Alberta Pork, Les Eleveurs de porcs du Quebec, Manitoba Pork, NB Pork, Ontario Pork, PEI Pork and Sask Pork) who invested a total of $557,801 this year.

Cluster 2 projects in which Saskatchewan researchers are involved:

- Towards the Development of a Method for Determining Antimicrobial Susceptibility of Brachyspira

- New Tools to Enable Effective Genomic Selection for Disease Resilience

- Determining the Optimum Space Allowance for Nursery Pigs

- National Sow Housing Conversion Project

- Monitoring the Effects of Transport on the Behaviour, Physiology, Carcass and Meat Quality of Pigs Through the Study of Truck Micro-climate, Vibrations and Cooling Systems.

- Innovative Piglet Management Strategies for Optimum Performance up to Slaughter Weight and Pork Production

- Increasing Sow Milk Yield and Piglet Growth via Low-cost Feeding and Management Strategies During Gestation and/or Lactation.

- Feeding Programs for Growing-Finishing to Enhance Global Competitiveness Opportunities across Canada.

- Preliminary Investigation of Reliable and Effective Swine Transportation Sanitization System.

- Technology and methodology for improving Biosecurity in Livestock Transport Vehicles

Information on all Cluster 2 projects is available online at: http://www.swineinnovationporc.ca/
Swine Health Focus

Transport Biosecurity Wash Project

During the past year, Sask Pork was involved in a number of initiatives in an attempt to prevent swine disease, especially PEDv from infecting herds in Saskatchewan. Two notable initiatives included research into prevention through a long term solution to truck and trailer sanitization and assisting VIDO on a promising vaccine for PEDv.

Transportation is known to be a high risk vector for the spread of disease. Presently trucks and trailers are cleaned manually using high volumes of water, which is expensive, time consuming and consistency is difficult to maintain. Given the long term need for biosecurity, and the inherent problems with the current methods, we began looking for an automated system which would reduce water usage, time and cost. With the support of Swine Innovation Porc, a team of researchers from PAMI, the University of Saskatchewan, PCS and VIDO, were contracted for two projects.

The first "A Preliminary Investigation of a Reliable and Effective Swine Transportation System (2014) was conducted to determine if technology was available or feasible to meet the objectives of an automated system. None was found.

The second, "Technology and Methodology Development for Improved Biosecurity in Livestock Transport Vehicles" was conducted to determine a proof of concept for a hydro vac type system for removing manure and bedding from trailers and to identify how to inactivate or eliminate pathogens of concern. This study provided a very interesting prototype for cleaning trailers and identified high heat as a means to inactivate trailers.

The next step in developing the prototype for the cleaning system and testing the inactivation process has been approved and will be conducted in 2016. This project is co-funded by Sask Pork and part of Swine Innovation Porc’s Cluster 2 research projects.

PED Virus Vaccine Development

In December 2014, Sask Pork was approached by Dr Volker Gerdts, research scientist with VIDO, University of Saskatchewan, to cooperate with the development of a potential vaccine to prevent piglet losses by PEDv.

Dr Gerdts is working with CFIA and Saskatchewan producers to conduct on farm testing of the vaccine for licencing purposes. The trials will take place during the winter of 2016.
Export Focus

Canada Pork International

Canada Pork International serves a membership base of producers and processors. CPI's mandate is to work with the Canadian government and trading partners to resolve foreign access issues relating to pork exports; to develop, coordinate and implement generic international and national marketing efforts on behalf of the pork industry; to provide foreign customers with information related to the attributes of Canadian pork; and to keep the Canadian industry informed of changes occurring in export markets.

Canada ranks as the world's third largest exporter, exporting over 60% of its production. In 2014, Canada exported 1,153,430 tonnes valued at over $3.7 billion. This trade represents 17% of the world's trade in pork. While our domestic market is critical to our industry, being more than twice the size as the next largest, four importers are also very important (United States, Japan, China and Mexico) and make up 75% of our export trade. The remaining trade consists of over 100 other countries, many of them emerging markets.

Each year CPI, on behalf of its membership, hosts booths at international Trade Shows, deliver pork quality and value added seminars for foreign buyers and create a variety of promotional activities in major export markets. This past year, CPI became responsible for Canada Pork, a new national domestic promotional initiative. Canada Pork, which has the same producer and processor membership, is focusing on generic promotion at the wholesale and major retail level.

Telling the Canadian Pork story to people within Canada and to the rest of the world has and will reap great rewards for Canadian producers.

In 2014, Canada exported pork products to more than 130 countries. Exports account for more than 60% of Canadian pork production. In 2014, Canada exported a total of approximately 1.2 million tonnes of pork with a value of $3.7 billion.

2014/2015 was another extraordinary year for Canada in terms of negotiating new free trade deals with major markets, and the Government of Canada along with the Canadian Pork Council and Canada Pork International should be commended for their efforts in opening up new markets for pork. Among the highlights this year:

**Trans-Pacific Partnership (TPP)**

- On October 5, 2015 TPP Ministers announced that they had concluded negotiations on the Trans-Pacific Partnership (TPP). On November 5, the Trans-Pacific Partnership (TPP) text was released to the public.

- The TPP includes twelve countries and represents a market of nearly 800 million people with a combined GDP of $28.5 trillion.

- The TPP provides Canada with preferential access to a group of countries accounting for roughly 40% of the world economy.
Export Focus

- It secures Canada's ability to export pork to Japan, one of our most important markets to which we sell roughly a billion dollars of pork annually, on fully competitive terms with the United States and other TPP pork-exporting countries.

- The deal will provide Canadian pork exporters with important competitive advantages relative to non-TPP countries for selling into Japan.

- The TPP achieves significantly improved terms of access into other countries such as Vietnam whose population is approaching 90 million inhabitants and whose preferred meat, by far, is pork. Malaysia is another TPP partner offering significant potential for increased Canadian pork sales.

- As a founding member of the TPP, Canada will be in a position to negotiate terms of entry of other countries seeking to join the deal, such as South Korea, The Philippines and Thailand.

Country of Origin Labelling

- The Country of Origin Labelling dispute with the U.S. which began in 2008 appears to be close to a resolution.

- The WTO has clearly ruled on four separate occasions (May 18, 2015; October 20, 2014; June 29, 2012; and November 18, 2011) that COOL discriminates against Canadian cattle and hogs and violates the trade obligations of the United States.

- Canada requested authorization from the WTO to impose just over $3 billion in retaliatory duties on a wide variety of U.S. exports to Canada if the U.S. does not bring COOL into conformity with its WTO trading obligations by eliminating the discrimination against Canadian livestock.

Canada-Ukraine Free Trade Agreement (CUFTA)

- Under the CUFTA, Ukraine will eliminate the vast majority of its agricultural tariffs. Key agricultural products benefiting from this duty-free access include beef, fresh and chilled pork, pulses, grains, canola oil, processed foods, and animal feed.

- Canadian pork exporters will benefit from duty-free access on fresh and chilled pork, and from a large duty-free tariff rate quota for frozen pork and certain pork offals and fats, which will increase from 10,000 tonnes to 20,000 tonnes over seven years.
Canadian Quality Assurance (CQA®)

There are 157 current registered units participating in the CQA® and ACA™ programs, which include all hogs sold to federal slaughter plants from Saskatchewan. The CQA® and the ACA™ program revision is progressing with the food safety model being updated, simplification of the assessment form and incorporation of critical elements in the 2014 Code of Practice for Pigs.

The Canadian Ractopamine-Free Pork Certification Program (CRFPCP) revision took effect in July, incorporating all international ractopamine standards. Currently all federal plants in western Canada have enrolled in the CRFPCP, which means all producers shipping to those plants must as well.

Pig Code of Practice Development

The National Farm Animal Care Council (NFACC) released the final version of the new Code in June 2014. A printed version of the Code was distributed to all producers and is also available online.

Saskatchewan Swine Biosecurity Program

As a part of Growing Forward 2, The Saskatchewan Swine Transport Biosecurity Program (SSTBP), funded by the Saskatchewan Ministry of Agriculture and the Government of Canada was announced.

The SSTBP has a total of $150,000 available for a second follow-up veterinary visit of up to $300 and for transport vehicle inspections and inspection training of up to $1,000. All Saskatchewan CQA® registered swine farms were eligible to apply. At fiscal yearend, 80 farms made application to the program and a total of $70,100 was paid. Sask Pork provided a payment of $300 for a second biosecurity focused veterinary visit on all Saskatchewan hog farms in 2014/2015. At yearend 83 farms had submitted claims for a visit for a total payment of $24,900.

PEDv Preparedness

Porcine Epidemic Diarrhea (PEDv) continued to be a major focus of producers, the industry and Sask Pork over the past year. Through tremendous effort and expense, Saskatchewan farms remained PEDv free in 2014/2015. The constant attention to detail throughout the production chain prevented this costly disease from infecting any Saskatchewan farms.

The Government of Saskatchewan continued to do surveillance at high traffic sites within the province. Sask Pork and the Government of Saskatchewan committed significant funds to deal with PEDv prevention and mitigation. A contingency plan is in place, but was not triggered. There has been excellent cooperation between all groups involved in swine health, from the provincial CVO's Offices, the CFIA, provincial pork organizations and the veterinary community.

Considerable effort was given to refining the Canadian Western Transport Wash Certification Program (CWTWCP) for implementation and roll out to truck washes. A research project was initiated by Sask Pork, with a goal to reduce the time, effort and cost of truck transport washing while increasing the reliability pathogen control. The first passes were promising and work is continuing.

Animal Health Initiatives

Sask Pork partnered with the University of Saskatchewan to administer a joint project called Supporting New Control Strategies for Pig and Cattle Disease, aimed at reducing the impact of swine Brachyspira and bovine campylobacteriosis infections. Funding for the project is from the Canadian Agri-Innovation Program. Sask Pork also worked with VIDO to start the process to bring a new PEDv vaccine to registration, for use on farms.
Transportation Quality Assurance (TQA®)

This year Sask Pork held 15 TQA® certification training sessions with 89 attendees and an additional 6 through online training.

Labour Issues

Labour attraction and retention on farms is an ongoing issue for Saskatchewan farms and packing plants, though it did improve this year, compared to past years. Sask Pork and producers participated in Government of Saskatchewan workshops and Canadian Agricultural Human Resource Council initiatives to improve the labour situation. Sask Pork also attended two jobs fairs to represent those farms looking for employees.

Livestock Emergency Response

Sask Pork participated in a successful training event for first responders in Qu'Appelle, to deal with livestock accident emergencies in the Regina area.

The Livestock Emergency Response Units stationed in Moose Jaw and Humboldt were used to help in at least two transport accidents involving livestock.
Saskatchewan Pork Industry Symposium

2014 marked the 38th year for Symposium which was held November 19-20 in Saskatoon. Registration exceeded 200 over the two days.

The second day of Symposium wrapped up with an industry roundtable with panel members Rick Bergmann (President Elect of the Canadian Pork Council), Florian Possberg (Sask Pork Chairman), Karl Kynoch (Manitoba Pork Chairman) and Ben Woolley (President of Sunterra Farms). The session, facilitated by Bruce Cochrane (Farmscape Radio Network) focussed on growth opportunities for the western Canadian pork sector.

Items identified as priorities for the pork industry were labour, aging facilities and new construction as well as opportunities for growth and increasing slaughter capacity.

Symposium Advisory Committee 2014

• Kim Browne, Sask Pork, Symposium Coordinator
• Sonia Englot, Fast Genetics
• Mark Ferguson, Sask Pork
• Zenon Forster, Olysky L.P.
• Don Kolla, Cudworth Pork Investors Group
• Neil Ketilson, Sask Pork
• Steffen Klenk, PIC Canada Ltd.
• Brad Marceniuk, Ministry of Agriculture
• Bobbi Jo Porter, Olysky L.P.
• Yolande Seddon, Prairie Swine Centre
• Harvey Wagner, Sask Pork
• Lee Whittington, Prairie Swine Centre

2014 Awards of Distinction

The Lifetime Achievement Award was presented to Dr. Phil Thacker, Professor Emeritus, College of Agriculture and Bioresources, University of Saskatchewan (U of S), for his long time service to the pork industry and advances in swine nutrition.

As a professor of swine nutrition and management at the U of S for 30 years, Dr. Thacker made significant contributions to the scientific field in swine feed and nutrition, reproduction, and general management. He worked extensively to transfer information and technology for swine production.

He also contributed to the Canadian Society of Animal Science as an executive committee member (e.g. Western Director, Vice President, and President) and by participating on organizing committees for numerous annual meetings, and has been an associate editor and reviewer for a number of journals in the field of Animal Science.

We congratulate Dr. Thacker!
Agri-Education Program

We continued our commitment to Agri-Education through participation at five provincial AgEd events with manned and static displays at Lloydminster, Prince Albert, Yorkton, Swift Current and Saskatoon AgExperience days. Our displays featured updated display signage and banners and a slide presentation on why we raise pigs.

The pork industry was also represented at two Ministry of Agriculture Burger and Fries Farms in Moose Jaw and Prince Albert.

About 4700 Grade 1-4 students attended these events.

Agriculture in the City 2015

Sask Pork participated on the planning committee for the event which was held Saturday, April 25th at the Mall at Lawson Heights in Saskatoon. We had representation in three zones at the event with an industry booth, pork demo station and live piglets exhibit (courtesy of local producer Ben Loewen). Ag in the City’s goal is to educate urban consumers about general agriculture practices and where their food comes from.

The one-day event features a trade show, main stage cooking demonstrations, food sampling and hands-on demonstrations, activities and games at six activity zones for kids.

• Animal Agriculture Zone
• Career Zone
• Crops Zone
• Food Zone
• Kids Zone
• Science Zone

Main stage activities were co-hosted by Mark Loshack, local radio personality with Rock 102 FM, and the 2015 Saskatchewanderer Ashlyn George.

Special guests included The Honourable Kelly Block, Member of Parliament for Saskatoon and Rosetown, and Member of the Legislative Assembly for Saskatoon Sutherland Paul Merriman.

The official crowd count for the mall was more than 9900 many of whom toured the exhibits, met local producers and took in stage shows and demonstrations. Participants, sponsors and exhibitors provided positive feedback on the value of these types of events.

Agriculture in the City was administered by and received funding from Agriculture and Agri-Food Canada with additional funding from the Saskatchewan Ministry of Agriculture and participating commodities.

AgMore Than Ever

Sask Pork became a proud member of Farm Credit Canada’s Ag More Than Ever program, an industry-driven cause to improve perceptions and create positive dialogue about Canadian agriculture. FCC believes that “Together we can shine a spotlight on the facts, stories and people that make this industry special.”

Our official partnership provides us with access to agriculture related resources, signage (sample following page) and general information on the Canadian agriculture sector.
E-Forum Newsletter

Time sensitive information of relevance to producers and stakeholders is forwarded directly via email, mail and fax when received particularly info relating to swine health. Newsletters were published in March and July.

Hurry Hog Curling Rink Decals

This is the 10th year of the decal program and 30 clubs displayed our curling decals in the 2014-2015 season.

Farmscape Radio Program

Farmscape, hosted by Bruce Cochrane, has been broadcasting for 17 years. Sask Pork and Manitoba Pork continue to co-sponsor the radio network airing in Manitoba, Saskatchewan and Alberta.

Sask Pork directors and staff provided 43 interviews on Farmscape over the year.

From the desk of Farmscape...

"No New Cases" has been the ongoing headline and the biggest and best story over the past year. On the ground, animal health remains the primary focus of Canada's pork producers. PED and the success of the Canadian pork industry in maintaining control of this disease has been a testament to the industry's foresight. A stepped up focus on improving biosecurity by educating producers and their industry partners and sharing information and knowledge have proved their value.

This latest disease challenge has also reinforced the importance of research as scientists working in partnership with government and industry to develop new vaccines, new biosecurity procedures and protocols and new technologies all designed to protect animal health. As more is learned about this virus and how it works pork producers become better equipped to deal with it and better prepared for the next new infection.

Another good news story over the past year has been the successful conclusion of negotiations aimed at creating a provisional Trans-Pacific Partnership free trade agreement. Canadian participation as a founding member will ensure Canadian beef and pork producers will keep pace with the U.S. in the key Japanese market while offering to open new opportunities in other markets. The deal must still be ratified by the governments of the partnering nations so all eyes will be on Ottawa and Washington as the politicians debate whether this deal will move forward.
Communications & Promotion

Also on the trade front, a story that has been in the news since 2002, U.S. Mandatory Country of Origin Labelling, may finally be winding to a close. The threat of retaliatory tariffs has gotten the attention of U.S. lawmakers. The WTO's latest ruling authorizing Canada and Mexico to move forward with the next step toward imposing annual tariffs on a products imported from the U.S. has brought that threat closer to reality.

On the economic front it's been another pretty good year for the Canadian pork industry. While profits have dipped from the recent record levels, producers are still in a profitable position which is fuelling a renewed sense of optimism. Pork producers are eager to respond to anticipated new opportunities to be had as a result of the Trans-Pacific Partnership, the Canada and the European Union Comprehensive Economic and Trade Agreement.

There is once again a desire to renew and expand swine production facilities, to take greater advantage of Western Canada's underutilized processing capacity. The challenges will include assembling the infrastructure needed to build and renovate the barns that will be required to fill that capacity and capitalise on the new trade opportunities and attracting the workers needed to staff those barns and processing facilities.

As a journalist, I look forward to reporting on how the Canadian pork industry will meet those challenges, turn them into opportunities and continue to feed the world.

Once again, I would like to extend my thanks to the many who have shared their insight and expertise and to Farmscape's audience.

Bruce Cochrane,
Farmscape Radio Network

TV Advertising / Sponsorship

Sask Pork continued its advertiser/sponsor relationship with the “Cooked with Shack” program hosted by Mark “Shack” Loshack. The 1/2 hour cooking program airs monthly and can be seen across western Canada on Shaw Cable Video on Demand and in Saskatchewan on Shaw TV Channel 10.

We also produced a 30 second television commercial Backyard Family Barbecue Power Up with Pork that aired during the early Sunday NFL Games Sundays on CTV through the pre-season, regular season including the Superbowl pre-game and Superbowl game. The ad aired 28 times over the period.
Communications & Promotion

Domestic Promotion

Canada Pork International’s Domestic Marketing Director, Derrick Ash, undertook activities aimed at developing a national branding strategy for Canadian pork. Part of the strategic focus is to differentiate Canadian pork from commodity imported pork products; increase consumers’ awareness of on-farm food safety programs (CQA/ACA/PigTrace) and increase consumer confidence in Canadian pork products.

A new logo was developed for Canada Pork along with the Verified Canadian Pork program. The VCP™ brand is a unique partnership opportunity between Canadian farmers, processors and retail operators seeking to differentiate themselves in the Canadian marketplace with a truly exceptional program.

CPI will support stakeholder premium brands through VCP co-brand and partner co-brand programs. The program is being rolled out to Canadian processors and a number of Tier 1 retailers this year.

Retail Support

We assisted Federated Co-Op in the development of a pork consumer cooking guide for the western Canadian stores as part of their Raised at Home campaign which will likely be made available in the stores this winter.

Radio Advertising

Sponsor/advertiser of the CJWW & COOL 98 radio “What to do in Saskatchewan” summer feature from May to September. Consumer and industry focussed ads aired twice per day throughout the summer. As part of the advertising package we gave away 68 Summer BBQ Pork Packs during the promotion.

BBQ packs were sourced from Prairie Meats in Saskatoon and included pork tenderloin, chops, greek ribs, souvlaki and cherry smoked bacon.

Print & Web Advertising

Consumer ads appeared online at Planet S and in print in Prairie Dog Magazine featuring weekly recipes during the months of August (Get Grilling Feature) and in March (Healthy Living and Eating feature).

Social Media / Social License

Sask Pork has begun development on a social media program that will include Facebook, Instagram, Pinterest and Twitter to enhance our promotions and communications reach. Social media allows us to reach a different demographic and offer recipes and cooking and handling info along with production-related topics of interest to consumers (antibiotics use, animal welfare, food safety). A consultant will be retained to assist in the development.

Website

The website was upgraded to a responsive site that allows information to be viewed on a smart phone.
Sponsorships & Donations

- Bruno Cherry Sunday - Bruno, August 17, 2014, sponsor of sausages for breakfast.
- Cudworth Pork Investors Group Summer Family Barbeque - August 2014 - donation of resources and promotional items.
- Ituna Fall Country Fair - September 20, 2014 - Breakfast sponsor and consumer resources.
- Saskatchewan Home Economics Teachers Conference - Yorkton - October 2-3-4, 2014 sponsor and conference bag inserts.
- Yorkton Exhibition Association - Yorkton - November 5-8, 2014, sponsor exhibitor of Harvest Showdown and Ag Ed Display.
- University of Saskatchewan Pharmacy and Nutrition School Nutrition Fairs, Saskatoon - November 18 & 25, 2014, donation of resources and promo items.
- Saskatchewan Association of Rural Water Pipelines Annual Seminar, Saskatoon - December 2-3, 2014, donation of promo items and resources.
- Students of the Canadian Veterinary Medicine Association Symposium, Saskatoon - January 8-10, 2015, bronze sponsor of agriculture tours for the event.
- Beer Bacon Bands Event - Regina - January 30, 2015, sponsor and pork resources.
- Edenwold Soup and Skate - Hypor fundraising event - March 1, 2015 - cash donation, children’s resources and promotional items.
- Telemiracle 39 - Saskatoon - March 7-8, 2015 sponsor of Pork for volunteers meals.
- Saskatchewan Agriculture Hall of Fame - March 2015 - Saskatoon - Induction of Harold Fast of Fast Genetics to the Agriculture Hall of Fame.
- Pile of Bones Saskatchewan BBQ Championships Regina - June 12-14, 2015, sponsor of Meat Category (Pork) Award.
- Ronald McDonald House Ladies Golf Classic - Saskatoon - June 16, 2015, silver sponsor of pork loins for luncheon.
- Saskatchewan Outstanding Young Farmers Program - Regina - June 19, 2015 - gold sponsor.
- Great Saskatchewan Bacon Festival - Kipling - June 27, 2015, trophy sponsor (Chef Savoury category) and Roughrider Tailgate Party.
- Saskatchewan Big Rig Show and Shine (Favel Trucking) Moose Jaw - July 3-4, 2015 - bronze sponsor and sausages for breakfast.
Between August 2014 and July 2015, index 100 hog prices in Saskatchewan averaged $171.53/ckg, which falls short of the record price set last year of $193.34 in this period. However, from a historical perspective, the price was excellent, exceeding both the 5-year and 10 year average price of $162.97/ckg and $144.21/ckg respectively. The ongoing PED outbreak in the U.S. combined with strong consumer demand for pork and a declining dollar contributed to the excellent prices.

Another factor which favoured producers this year was the Canada-U.S. exchange rate. The noon rate dropped from 0.932 last year to an average of 0.842 in 2013/2014. This is the lowest that the exchange rate has been since 2004/2005, and a significant benefit to producers across the country. Canadian hog prices are derived via formula from U.S. markets and the 9 cent drop in the exchange rate boosted Canadian prices by over $18/ckg, and helped increase Canada’s international competitiveness.
In 2014/2015, feed prices remained relatively stable for most of the year, although uncertainty with respect to the new crop did push prices higher starting in the spring of 2015. Adequate moisture conditions and a very strong carry-out following the 2014 harvest capped prices initially. However, insufficient rain between April and June throughout the western prairies resulted in the province of Alberta declaring a drought disaster, and limited yields in western Saskatchewan. Timely rains in July saved crops in much of Saskatchewan, but production will be down significantly in 2015. Saskatchewan feed wheat prices were steady, up less than a dollar per tonne and averaged $149.61/tonne in 2014/2015. Feed barley was up by 13% and averaged $145.28/tonne while feed peas declined 14% and averaged $165.53/tonne.

*Note: Spot grain prices FOB Saskatoon.*

In 2014, a total of 80 producers marketed hogs produced at 159 active premises across the province according to levy data. This is a decline of 4 producers over the previous year. However, as part of Sask Pork’s administration efforts for the PigTrace program which began in July, 2014, Sask Pork registered 69 new hog and wild boar producers this year. The majority of these producers do not typically sell hogs to packers or pay levy (farmgate or own use), but are subject to traceability regulations.

*Note: These numbers are based upon levy data, and represent the number of producers/companies that produced hogs, not the number of production units or premises. In 2014 there were 159 active premises in Saskatchewan.

In 2014, Saskatchewan producers marketed a total of 1,949,005 pigs, which was a decrease of 141,049 animals from 2013. A decline in feeder pig exports was mainly responsible, with marketings declining 46% over the previous year to 179,235 pigs in 2014. This data is somewhat misleading, as the Saskatchewan industry's weanling production was probably steady to slightly higher in 2014, but an increase in interprovincial feeder pig movements, which are not reported or subject to levy means that the pigs were not accounted for in this data. Market hog production increased by 16,477 animals, while marketings of sows and breeding stock declined by 5,189 animals.

Source: Saskatchewan Pork Development Board
Levy data indicates that Saskatchewan produced 1,769,770 market hogs, culled sows, and breeding stock in 2014. In all, 302,401 animals produced in Saskatchewan were slaughtered locally in the province. Of the remainder, 802,363 were transported to Alberta for slaughter, while 594,862 animals were transported to Manitoba for slaughter, and 70,144 were exported to the U.S.

According to Statistics Canada, as of January 1, 2015 Saskatchewan’s breeding herd numbered 98,500 sows and bred gilts. This is an increase of 5,500 (6%) over the previous year. Repopulation of existing sow units continues to be the main source of the increase. The entire Canadian herd increased by 2,600 sows in 2015, and now totals 1,195,400 animals.

*Source: Statistics Canada, Cansim Table 003-0004*

The total number of pigs produced in Canada declined slightly in 2014. Eastern Canadian production decreased by 117,700 animals and stands at 13.2 million pigs, while western Canada’s production declined by 102,300 pigs and sits at just under 12.3 million. Saskatchewan remains the 5th largest pork producing province in Canada behind Manitoba, Quebec, Ontario, and Alberta.

*Source: Input Data from Statistics Canada Cansim Table 003-0102, calculated by Sask Pork*

*Calculation: Slaughter plus international and interprovincial exports, less international and interprovincial imports*

*Includes: Market hogs and Culled Sows, Weanlings, and Feeders*
Canadian slaughter declined for the third consecutive year to 20.3 million hogs in 2014. This decline was primarily due to decreased slaughter in Ontario and Manitoba. Thunder Creek Pork in Saskatchewan continues to expand their slaughter, which is excellent given that a shortage of hogs in western Canada is limiting slaughter at other western Canadian Processors. In Ontario, the closure of Quality Meat Packers resulted in reduced eastern slaughter numbers.

According to Agriculture and Agri-food Canada, approximately 4.1 million feeder pigs were exported from Canada to the United States in 2014, which was an increase of 3% from 2013. Canadian Market hog exports to the U.S. were 853,483, up 5.4% from the previous year.

Management’s Responsibility

To Saskatchewan Pork Producers:

Management is responsible for the preparation and presentation of the accompanying financial statements, including responsibility for significant accounting judgments and estimates in accordance with Canadian accounting standards for not-for-profit organizations. This responsibility includes selecting appropriate accounting principles and methods, and making decisions affecting the measurement of transactions in which objective judgment is required.

In discharging its responsibilities for the integrity and fairness of the financial statements, management designs and maintains the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets are safeguarded and financial records are properly maintained to provide reliable information for the preparation of financial statements.

The Board of Directors (the "Board") is composed entirely of Directors who are neither management nor employees of the Organization. The Board is responsible for overseeing management in the performance of its financial reporting responsibilities, and for approving the financial information included in the annual report. The Board fulfils these responsibilities by reviewing the financial information prepared by management and discussing relevant matters with management and external auditors.

Twigg & Company, an independent firm of Chartered Accountants, is appointed by the Board to audit the financial statements and report directly to the members, their report follows. The external auditors have full and free access to, and meet periodically and separately with, both the Board and management to discuss their audit findings.

To the Board of Directors of Sask Pork.

Report on the Financial Statements
We have audited the accompanying financial statements of Sask Pork, which comprise the statement of financial position as at July 31, 2015 and the statements of operations, changes in net assets, cash flows, and schedule of travel expenses for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management’s Responsibility for the Financial Statements
Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian accounting standards for not-for-profit organizations, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatements, whether due to fraud or error.

Auditors’ Responsibility
Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about amounts and disclosures in the financial statements. The procedures selected depend on our judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion
In our opinion, these financial statements present fairly, in all material respects, the financial position of Sask Pork as at July 31, 2015 and the results of its operations and cash flows for the year then ended in accordance with Canadian accounting standards for not-for-profit organizations.

1. DESCRIPTION OF BUSINESS

Sask Pork is a producer managed organization operating programs and research for the development of the Saskatchewan pork industry and the promotion of hogs and pork produced in Saskatchewan. Sask Pork was established by the Pork Industry Development Plan Regulations pursuant to The Agri-Food Act, 2004. Sask Pork is subject to supervision by the Agri-Food Council members of which are appointed by the Government of the Province of Saskatchewan.

The Pork Industry Development Plan Regulations allow Sask Pork to set and collect non-refundable levies from any person engaged in the marketing of hogs in Saskatchewan. As of January 1, 2015 the hog levy is $0.85 per hog, $0.23 per hog for all hogs less than 100 lbs. and $0.85 per hog on all breeding stock exported from Canada.

Sask Pork is exempt from income taxes in accordance with Section 149 of The Income Tax Act.

2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with Canadian accounting standards for not-for-profit organizations in Part III of the CICA Handbook and include the following significant accounting policies:

(a) Financial instruments:

The Organization initially measures its financial assets and financial liabilities at fair value. It subsequently measures all its financial assets and financial liabilities at amortized cost, except for investments in equity instruments that are quoted in an active market, which are measured at fair value. Changes in fair value are recognized in the statements of operations in the period incurred.

Financial assets subsequently measured at amortized cost include cash and accounts receivable. Financial liabilities subsequently measured at amortized cost include accounts payable and deferred contributions and revenue. The fair value of the cash, accounts receivable, and accounts payable approximates their carrying value due to their short-term nature.

(b) Cash and cash equivalents:

Cash is comprised of cash on hand.

Short-term investments are composed of guaranteed investment certificates. Short-term investments qualify as cash equivalents when they are short term, highly liquid investments, that are readily convertible to a known amount of cash and which are subject to an insignificant risk of changes in value. Short-term investments subject to restrictions that prevent their use for current purposes are included in restricted investments.
2. SIGNIFICANT ACCOUNTING POLICIES (continued)

(c) Capital assets:

Capital assets are stated at cost. Amortization is computed using the straight line method at rates calculated to amortize the cost over their estimated useful lives at the following rates:

- Computer equipment: 3 years
- Furniture and equipment: 3-5 years
- Leasehold improvements: 3 years

(d) Revenue recognition:

Hog levy revenue is recognized using the accrual basis in conjunction with delivery of producer’s product.

Sask Pork follows the deferral method of accounting for contributions. Restricted contributions are recognized as revenue in the year in which the related expenses are incurred or restrictions met. Unspent amounts are included in deferred contributions. Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Recognition of grants related to capital assets is deferred to periods when the related capital assets are amortized.

Revenues for conference fees are recognized upon completion of the conference.

Interest and investment revenue is recognized when earned.

(e) Research funding expenses:

Research funding expenses are recognized when projects are approved and the recipient has met eligibility criteria. Funds advanced to recipients prior to eligibility criteria being met are recorded as advances.
2. SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Contributions in-kind:

Contributions in-kind are recorded at fair value for goods or services used in the normal course of operations that would otherwise have been purchased.

(g) Use of estimates:

The preparation of financial statements in conformity with Canadian accounting standards for not-for-profit organizations requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. These estimates and assumptions are reviewed periodically and, as adjustments become necessary, they are reported in excess of revenues and expenses in the periods in which they become known.

Significant estimates include, but are not limited to, the valuation of deferred contributions and revenue, and accruals for certain revenues and expenses.

3. ACCOUNTS RECEIVABLE

</table>

6. DEFERRED CONTRIBUTIONS AND REVENUE

Sask Pork receives funding to administer the Porcine Epidemic Diarrhea (PED) prevention and preparedness program. The PED prevention and preparedness program provides funding for the monitoring of transport trucks for contamination with PED virus, contingency planning for the Saskatchewan swine industry in the event of PED incursion into the provincial herd and to assist with response activities to prevent any spread of the disease from the first farm(s) confirmed to have PED in Saskatchewan.

Sask Pork receives funding from the Saskatchewan Ministry of Agriculture to be held, administered and distributed in accordance with the related Saskatchewan Swine On-Farm Biosecurity program funding agreement. The Saskatchewan Swine On-Farm Biosecurity program provides funding to producers in order to mitigate the risks associated with Porcine Epidemic Diarrhea (PED) to herds in Saskatchewan. The cost of equipment purchase and assessments by veterinarians (one visit) are to be paid from this funding.

Sask Pork receives funding from the Saskatchewan Ministry of Agriculture to be held, administered and distributed in accordance with the related Saskatchewan Swine Transport Biosecurity program funding agreement. The Saskatchewan Swine Transport Biosecurity program provides funding to producers who have undertaken approved activities.

</tbody>
</table>

7. INTERNALLY RESTRICTED NET ASSETS

Sask Pork’s Board of Directors have internally restricted net assets of $1,000,000 as a reserve for future operating expenses.

8. RESEARCH COMMITMENTS

Prairie Swine Centre Inc.

Effective January 1, 2011 Sask Pork agreed to provide an annual contribution of $275,000 to the Prairie Swine Centre Inc. The annual contribution is provided for the core funding of the Prairie Swine Centre. In addition to the annual contribution in the current year $13,750 has been paid to the Prairie Swine Centre Inc. which represents the third year of a five year funding commitment for the salary of the Chair in Animal Welfare.

University of Saskatchewan

Sask Pork is committed under a service agreement with the University of Saskatchewan to provide funding for AIP project #189 “Surveillance, diagnostic and control of emerging diseases of pigs and cattle”. The funding for this research comes the Agricultural Innovation Program (See Note 10) and as such is not funded by the hog levy. The maximum required payments for this project are as follows:

<table>
<thead>
<tr>
<th>Year ending July 31:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2016</td>
<td>$ 106,791</td>
</tr>
<tr>

</tbody>
</table>
9. LEASE COMMITMENTS

(a) Building lease:

Sask Pork is committed under a lease agreement for its premises at #2, 502 - 45th Street West. The agreement expires on October 31st, 2016 and requires minimum annual lease payments as follows:

<table>
<thead>
<tr>
<th>Year ending July 31:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2016</td>
<td>$41,054</td>
</tr>
<tr>
<td>2017</td>
<td>10,482</td>
</tr>
</tbody>
</table>

(b) Contractual commitments:

Sask Pork is committed under an annual agreement with Wonderworks Canada Inc. and Manitoba Pork to sponsor a series of pork oriented agricultural news coverage. The current agreement expires on September 30, 2015. The minimum annual charges are as follows:

<table>
<thead>
<tr>
<th>Year ending July 31:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2016</td>
<td>$6,667</td>
</tr>

11. FINANCIAL INSTRUMENTS

The Organization as part of its operations carried a number of financial instruments. It is management’s opinion that the Organization is not exposed to significant interest, currency or credit risks arising from these financial instruments except as otherwise disclosed.

Risk management policy

The Organization, as part of operations, has established a minimization of credit risk policy as its risk management objective. In seeking to meet this objective, the Organization follows a risk management policy approved by its Board of Directors. The collection of accounts receivable is monitored by the Financial Administrator in conjunction with contacting slaughter plants to ensure collection of the hog check-off is made on a timely basis.
11. FINANCIAL INSTRUMENTS (continued)

Credit concentration

As at July 31, 2015, four customers accounted for 79.52% (74.64% - 2014) of accounts receivable, representing the Organization’s maximum credit risk exposure. The Organization believes that there is no unusual exposure associated with the collection of these receivables. The Organization manages its credit risk by performing regular credit assessments of its customers and provides allowances for potentially uncollectible accounts receivable. Most of the accounts receivable were collected shortly after year-end.

Interest rate risk

Interest rate risk is the risk that the value of a financial instrument might be adversely affected by a change in the interest rates. Changes in market interest rates may have an effect on the cash flows associated with some financial assets and liabilities, known as cash flow risk, and on the fair value of other financial assets or liabilities, known as price risk. The Organization is not exposed to significant interest rate risk on its investments.

Liquidity risk

Liquidity risk is the risk that the Organization will encounter difficulty in meeting obligations associated with financial liabilities. The Organization enters into transactions to purchase goods and services on credit and lease office equipment and office space from creditors, for which repayment is required at various maturity dates. Liquidity risk is measured by reviewing the Organization’s future net cash flows for the possibility of a negative net cash flow. The Organization manages liquidity risk resulting from accounts payable and accrued liabilities by investing in liquid assets such as cash and short-term investments which can be readily available to repay accounts payable and accrued liabilities.

12. CAPITAL MANAGEMENT

The Organization has no formal capital management policy however the Board of Directors conducts an annual budgeting and strategic planning meeting. The Organization has no externally imposed capital requirements.

13. BUDGET

The budget presented is unaudited. The budget for 2014/2015 was approved by the Board of Directors on August 7, 2014.

AUDITORS’ REPORT

To Saskatchewan Pork Producers:

We have made an examination to determine whether Sask Pork complied with the provisions of the following legislative and related authorities pertaining to its financial reporting, safeguarding agency resources, spending, revenue raising, borrowing and investing activities during the year ended July 31, 2015.

- The Agri-Food Act, 2004
- The Agri-Food Regulations, 2004
- The Pork Industry Development Plan Regulations, 2013

Our examination was made in accordance with the Canadian generally accepted auditing standards and, accordingly, included such tests and other procedures as we considered necessary in the circumstances.

In our opinion, Sask Pork has complied, in all significant respects, with the provisions of the aforementioned legislative and related authorities during the year ended July 31, 2015.

INDEPENDENT AUDITORS’ REPORT

To Saskatchewan Pork Producers:

We have audited Sask Pork’s control as of July 31, 2015 to express an opinion as to the effectiveness of its control related to the following objectives:

(1) To safeguard agency resources. That is, to ensure its assets are not lost or used inappropriately; to ensure it does not inappropriately incur obligations; to establish a financial plan for the purposes of achieving its financial goals; and to monitor and react to its progress towards the objectives established in its financial plan.

(2) To prepare reliable financial statements.

(3) To conduct its activities following laws, regulations and policies related to financial reporting, safeguarding agency resources, revenue raising, spending, borrowing and investing.

Management’s Responsibility
The Organization’s management is responsible for maintaining effective control over the objectives stated above.

Auditors’ Responsibility
Our responsibility is to express an opinion based on our audit as to the effectiveness of its control related to the following objectives:

(1) To safeguard agency resources. That is, to ensure its assets are not lost or used inappropriately; to ensure it does not inappropriately incur obligations; to establish a financial plan for the purposes of achieving its financial goals; and to monitor and react to its progress towards the objectives established in its financial plan.

(2) To prepare reliable financial statements.

(3) To conduct its activities following laws, regulations and policies related to financial reporting, safeguarding agency resources, revenue raising, spending, borrowing and investing.

(continued on next page)
INDEPENDENT AUDITORS’ REPORT

To Saskatchewan Pork Producers:

(continued from previous page)

We used the control framework developed by The Canadian Institute of Chartered Accountants (“CICA”) to make our judgments about the effectiveness of Sask Pork’s control. We did not audit certain aspects of control concerning the effectiveness, economy and efficiency of certain management decision-making processes.

The CICA defines controls as comprising those elements of an organization that, taken together, support people in the achievement of the organization’s objectives. Control is effective to the extent that it provides reasonable assurance that the organization will achieve its objectives.

We conducted our audit in accordance with the standard for audits of internal control over financial reporting set out in the CICA Handbook - Assurance. This standard requires that we plan and perform the audit to obtain reasonable assurance as to effectiveness of Sask Pork’s control related to the objectives stated above. An audit includes obtaining an understanding of the significant risks related to these objectives, the key control elements and control activities to manage these risks and examining, on a test basis, evidence relating to control.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Control can provide only reasonable and not absolute assurance of achieving objectives reliably for the following reasons. There are inherent limitations in control including judgement in decision-making, human error, collusion to circumvent control activities and management overriding control. Cost/benefit decisions are made when designing control in organizations. Because control can be expected to provide only reasonable assurance, and not absolute assurance, the objectives referred to above may become ineffective because of changes in internal and external conditions, or that the degree of compliance with control activities may deteriorate.

Opinion
In our opinion, based on the limitations noted above, Sask Pork’s control was effective, in all material respects, to meet the objectives stated above as of July 31, 2015 based on the CICA criteria of control framework.
INDEPENDENT AUDITORS’ REPORT

To Saskatchewan Pork Producers:

(continued from previous page)

We have also audited, in accordance with Canadian generally accepted auditing standards, the financial statements of Sask Pork, which comprise the statement of financial position as at July 31, 2015, and the statements of operations, change in net assets, cash flows, and schedule of travel expenses for the year then ended, and a summary of significant accounting policies and other explanatory information. We have issued our report dated October 27, 2015 which is the same date as the date of the report on the effectiveness of internal controls.

INDEPENDENT AUDITORS’ REPORT

To Saskatchewan Pork Producers:

We have examined the financial statements of Sask Pork for the year ended July 31, 2015 and have issued our report thereon dated October 27, 2015. We have examined the system of internal control as at July 31, 2015 and have issued our report to you dated October 27, 2015. We have also made an examination to determine whether Sask Pork complied with specified legislative and related authorities pertaining to its financial reporting, safeguarding agency resources, spending, revenue-raising, borrowing and investing activities during the year ended July 31, 2015 and have issued our report to you dated October 27, 2015.

Our examinations were made in accordance with Canadian generally accepted auditing standards, and accordingly included such tests and other procedures as we considered necessary in the circumstances. In those instances, if any, that our study and evaluation of internal control disclosed conditions indicating that internal controls were inadequate or not complied with, substantive tests were performed to detect any case in which:

1) any officer or employee of Sask Pork has willfully or negligently omitted to collect or receive public money belonging to the Crown;
2) there has been a deficiency or loss to the Crown through the fraud, default or mistake of any person; and
3) an expenditure was made which was not properly vouched or certified.

During the course of these examinations, nothing came to our attention that would indicate to us that:

1) any officer or employee of Sask Pork has willfully or negligently omitted to collect or receive public money belonging to the Crown;
2) there has been a deficiency or loss to the Crown through the fraud, default or mistake of any person; and
3) an expenditure was made which was not properly vouched or certified.
