Annual Report
2011 - 2012

demonstrating our commitment to our animals, communities and customers!

Saskatchewan PORK DEVELOPMENT BOARD
Corporate Governance

The Saskatchewan Pork Development Board (Sask Pork) is an agency established under the Agri-Food Council and complies with the provisions of The Agri-Food Act, 2004, The Agri-Food Regulations 2004, and The Pork Industry Development Plan Regulations pertaining to its financial reporting, safeguarding public resources, spending, revenue raising, borrowing and investing activities.

Internal Controls

Sask Pork adheres to internal financial controls as detailed in the Policy and Operating Procedures Manual approved by the Board of Directors in September 2005.

As the end of 2012 nears I think back on the year from a producer perspective. We began the year with a lot of optimism as the Saskatchewan hog numbers had remained steady. We hoped that the grain prices would return to more normal levels and hog market prices would be high enough to allow producers to make a profit.

Although market prices did reach decent levels, the drought in the U.S. took feed prices even higher across north America causing producers to market animals at lighter weights which subsequently flooded the market with hogs. The result of this sent the cash market price plunging lower.

September was a disaster for all producers as ISO wean pigs were next to worthless and market hogs were losing $40 to $60 per animal. Liquidation had started again and there was a lot of concern that if these prices continued through the fourth quarter, more and more producers would be forced to shut down production.

Thankfully a rebound in the price helped reduce the losses and once again showed signs of hope. The hog market futures for 2013 are starting to look very good and if the U.S. experiences a normal crop year, profitability can once again return to this industry.

I encourage producers to take advantage of interim AgriStability payments and the Advance Payments Program to help get though these down times. If these programs are not working for you, contact Sask Pork staff so they can document difficulties producers may be having accessing the programs. This information will be compiled and forwarded to the Canadian Pork Council and the federal ministry of agriculture.

I would like to thank the staff at Sask Pork for all their work throughout the year - you do a great job.

To the producers please contact the office with any questions or concerns. The staff would be glad to help you in any way they can.

Respectfully submitted,

Jay McGrath
Chairman
What can I say, yet another challenging year for pork producers, not only in Saskatchewan, but across Canada and all of North America. In a year that showed the promise of a return to profitability for the hog industry, a major drought in the United States resulted in $8 corn prices, record high feed grain costs and significant losses in the industry once again. This marks the fifth straight year of negative margins. The impact on the industry has been dramatic. All producers, regardless of size or organizational structure, have been significantly impacted by the negative returns. All have employed every opportunity for reducing costs and becoming more efficient. Cost competitiveness is not the issue for Saskatchewan producers. To remain viable into the future we must extract more revenue from the value chain.

Despite the economic challenges in the industry, Saskatchewan’s hog production remained relatively stable in the past year at just over 1.7 million market hogs and approximately 260,000 iso weans. At the same time, our producer base also remained stable and there has even been some interest in reopening some of the barns that were idled under the Hog Farm Transition program. While the impact of higher feed prices may stall some of that interest, Saskatchewan does have a number of relatively newer barns available for expanded production should the economic climate exist. Obviously the packers, Thunder Creek Pork for example, who made a major investment in their packing plant earlier this year, consider the future for the industry to be very positive.

A major function of Sask Pork is to work on behalf of pork producers with provincial and federal governments, provincial pork associations and other agricultural organizations to promote programs, services, or regulations that are of benefit to producers and other parts of the value chain.

In the last few months, the Board of Directors and staff have been very busy working with both the provincial and federal governments to obtain some support for the losses incurred by producers due to the drought and high feed costs. While both levels of government are sympathetic to the situation, the only support producers will obtain is through the present suite of business risk management programs with no consideration for ad hoc payments.

While additional cash support to producers seems to be off the table, both levels of government are gearing up for the much anticipated Growing Forward II program which is the new five-year
funding agreement beginning April 1, 2013. Under this program more dollars will be available for innovation, marketing and increasing the industry’s competitiveness. Through the Canadian Pork Council (CPC), we have been working on a number of initiatives within the Growing Forward II framework to enhance the pork sector’s future competitive ability.

We also continued to support the business risk management tool, referred to as the CPC Hedging Program. This program, should it obtain government support, would provide a source of funds to cover all margin calls for hogs hedged by producers. It has received support from the Canadian Pork Value Chain Roundtable and provincial pork associations and is now being seriously reviewed by the Business Risk Management group within Agriculture and Agri-Food Canada.

Producer programs continued with the Animal Care Assessment being incorporated into the Canadian Quality Assurance (CQA®) program in January 2012.

Through funding from the Canadian Swine Health Board (CSHB), approximately 97% of Saskatchewan production is participating in the National Swine Biosecurity program. The CSHB has done an excellent job in a very brief time in focusing on delivering biosecurity, surveillance and research to enhance the health of Canada’s swine herds.

Additional funding was also made available by the Saskatchewan Ministry of Agriculture to Sask Pork for enhancements to the swine biosecurity program and to help producers offset the costs of implementing needle-free injection systems on their farms.

On the research side, Sask Pork was an original provincial member of Swine Innovation Porc, a national research organization that received about $8 million over a three year period ending March 31, 2013 to conduct research for the Canadian swine sector. This group is now planning for the next round of funding and research to be conducted under Growing Forward II.

The national approach to funding research seems to be working very effectively as the relatively small research community across Canada is now collaborating on a number of projects. The Prairie Swine Center, as an important part of that national research community, is very well respected and plays an important role in the national research effort. This year marks the 20th anniversary for the Prairie Swine Center and we should all congratulate them on a job well done.

In closing, I would like to express my sincere appreciation to the Board of Directors. Their dedication, ideas and thoughtful guidance of the organization will show great rewards to the industry over the coming years. I would also like to thank Kim, Patty, Mark and Harvey for their hard work in helping producers become more successful and profitable.

Respectfully submitted,

Neil Ketilson
General Manager
### Mission
To provide leadership for producers and collaborate with stakeholders to ensure the Saskatchewan pork industry’s continued environmental, social and economic sustainability.

### Vision
To position the Saskatchewan pork industry as a preferred supplier of high quality, competitively priced pork products for the global market.

Cliff Ehr was appointed in 2012 as Sask Pork’s representative to the Canada Pork International Board of Directors.

---

**Elections**

Elections are held in odd years in November. The Board of Directors consists of six registered producers who may hold office for a maximum of three consecutive, two-year terms.

The Executive is elected annually by the Board of Directors at the first scheduled meeting of directors following the Annual General Meeting.

Provincial Focus

Saskatchewan Slaughter Capacity

Thunder Creek Pork in Moose Jaw has been processing for 18 months with an annual capacity of 275,000 hogs. This year the plant underwent extensive renovations to convert operations from hot skinning to the more accepted scalding technique.

Premises Registration/Survey

In January, 2012 Sask Pork conducted a premises registration in Saskatchewan to update barn location, capacity and contact information in advance of federal traceability regulations expected to be published in late 2012 or 2013. To date, 166 premises have submitted their registration information. This represents virtually all commercial hog production premises in the province.

Sask Pork also conducted a producer survey at the same time as the premises registration. 61 responses were received. According to the responses:

- 11% of producers were aware of feral pigs/wild boar in the area around their barns
- 21% of producers were concerned about disease transmission through feral pigs.
- 70% of producers hedge or forward price some of their hog production, while 41% of respondents typically have over 40% of their production hedged.
- 57% of producers forward price some of their feed requirements, while only 22% had over 40% of their feed requirements hedged.

Producers also identified a number of industry roadblocks and research ideas, the top two being a) transportation distance/lack of slaughter capacity in Saskatchewan and b) tight labour supply/high wage rates in Saskatchewan.

Hedging Program

A lack of available capital in the industry and reluctance by the banking industry to finance hedging activities continue to be major detriments to the industry. To this end, Sask Pork has continued to work with the Canadian Pork Council to develop and refine a hedging program proposal originally developed last year. The program would provide a loan guarantee for the specific purpose of financing initial margins and potential future margin calls to ensure every producer has an equal opportunity to take advantage of favourable prices and margins.

In response to questions regarding the value of hedging to industry and required margin levels, Sask Pork developed a model to estimate the net income that can be generated from hedging, margin requirements, and the overall costs hedging over a seven year timeframe between 2005 and 2011.

The study found there was the potential for a $7.25/ckg/year profit from hedging activities under a relatively simple and implementable hedging strategy. However, in some years hedging hogs did result in decreased profits. The maximum combined (currency and lean hog) margin required for a specific month over the timeframe was $72.69/ckg. However, the average margin level required between 2005 and 2011 was quite a bit lower at $16.23/ckg. The average cost of the hedging program varied yearly based on the level of margin calls, but averaged $0.87/ckg for the 7-year period.

Throughout the year, Sask Pork continued to consult with governments and industry regarding the program with the hope of achieving a pilot project and inclusion in Growing Forward 2. While nothing has been announced, there appears to be interest by AAFC in further studying the concept.
Pig Code Development Review

Revisions to the Codes of Practice for pigs were undertaken beginning in October 2010 under the National Farm Animal Care Council (NFACC). During the course of the review, the Pig Code Scientific Committee identified the following as major welfare areas to be addressed:

- Controlling pain: castration
- Methods of euthanasia
- Pig space allowance
  - Sow housing
  - Group housing (floor feeding, electronic sow feeding, feeding stalls)
  - Sow stalls
  - Social management of sows
  - Space allowance – sows

Florian Possberg, Chair of the Pig Code Development Committee stated in a July Farmscaper interview that “revisions to the Pig Code of Practice must consider the needs of the animal, the needs of the producer and the demands of the consumer.”

The Code Review Committee is made up of pork producers, practicing veterinarians, swine researchers and representatives of government and animal welfare organizations. Dr. Harold Gonyou, Prairie Swine Centre participates on the Pig Code Scientists Committee.

It is anticipated there will be a public consultation document ready in early 2013.

Provincial Levies for National Purposes

In June the CPC circulated copies of its strategic plan “Building a Durable Future” that offered an overview of the principal areas of national focus for the next few years and the Canadian Swine Industry’s National Program and Services Report.

National Pork Marketing Strategy

Recommendations have been developed that set out the rationale for and funding that will be requested from the Provincial Members. National programs/services that would be covered by the funding model include:

- Trade Access
- Nutrition Program
- CQA
- International Markets
- Domestic Market
- PigTrace Canada
- Canadian Swine Health Board programs
- Swine Innovation Porc Research Programs

National Pork Marketing Strategy

The Canada Pork International (CPI) Task Force called for proposals to develop a strategic plan for a domestic promotion program and selected Marcon Management Consultants for the initiative. The new plan is under development.

The Validation and Development of the Canadian Pork Story - Marketing Strategy for the Domestic Market report has been submitted to the Canadian Pork Council and Canadian Meat Council. It is expected they will reach a decision soon regarding the funding of a National Pork Marketing Strategy.

PigTrace Canada

In July, the Government of Canada announced proposed new regulations that would make traceability mandatory for pigs. These regulations would require that custodians of pigs:

- identify all farmed pigs and farmed wild boars using approved methods; and
- record and report all movements of pigs from birth or import, to slaughter or export.
The recently introduced *Safe Food for Canadians Act*, if accepted, would strengthen and modernize Canada’s food safety system and include livestock traceability.

The Canadian Pork Council welcomed the amendments to Canada’s *Health of Animals Regulations*, which detail the proposed requirements for swine traceability. The proposed regulatory amendment published as Part I of the *Canada Gazette* was released for public comment in July.

While Sask Pork supports the adoption of mandatory swine traceability and see the regulations as a necessary step in establishing the pork industry’s swine traceability system, we submitted the following comments related to specific provisions of the amendments:

- **Objection to the 48-hour reporting requirement for animal movements.** We believe this would be very difficult to adhere to and expensive for producers to comply with in some situations.

- **Section 172.1 - Linked Premises.** We believe that several of the linked premises report requirements are unnecessary and simply represent additional work for producers, i.e., that operators of both sites must report all movements for three months prior to the sites being registered as linked; and that the number of pigs moved between the two sites need to be submitted monthly.

Sask Pork recommended that movements not have to be reported monthly, and also the number of pigs moved would need only be reported once every six months upon registration of the linked premises.

We believe this would provide adequate evidence to support and maintain the registration of two premises as linked.

### Swine Innovation Porc

The Canadian Swine Research and development Cluster (CSRDC) assumed a new brand name in 2011, and is now known as Swine Innovation Porc. The organization was originally established in 2010 with funding from the swine industry and the Government of Canada to launch an ambitious research program. Harvey Wagner represented Sask Pork on the Board of directors until February, 2012, when Neil Ketilson assumed this role. In addition to governance, Sask Pork has allocated $210,120 over three years to four projects which are being conducted at the Prairie Swine Centre.

To date, Swine Innovation’s research program is comprised of 14 research projects. Ten projects focus on increasing Canadian pork industry competitiveness, while four focus on increasing Canadian pork industry differentiation. There are also three technology transfer initiatives. These projects involve over 100 researchers from 14 universities and 13 research centres. The current slate of projects is to be completed by March 31, 2013 with the target of measurable results on farms by this date.

In addition to ensuring current projects are completed on schedule, Swine Innovation is currently focused on the future, and is looking forward to the renewal of AAFC’s Canadian Agri-Science Cluster Initiative. The organization is currently establishing research priorities for 2013-2018 through consultations with partners.
InterPIG (International Swine Cost of Production) Study

Mark Ferguson continued again in 2011/2012 to take an active role in the InterPIG initiative, assembling a dataset on behalf of the Canadian industry for submission to the group.

According the results, the U.S. (Iowa) had the lowest cost of production in 2011 at $171/ckg., followed by Brazil’s Mato Grosso region at $175/ckg, Canada at $176/ckg, and finally Brazil’s Santa Caterina region at $183/ckg. Denmark averaged $217/ckg and was among the most cost competitive of the EU nations.

In terms of pricing, in a surprising change Canada did not report the lowest pricing in 2011. Brazil’s Mato Grosso region reported receiving $168/ckg compared with Canada at $175/ckg, Brazil’s Santa Caterina region at $181/ckg, and the U.S. (Iowa) at $197/ckg. The gap between European and 'American' prices also narrowed this year with Denmark averaging $201/ckg.

In addition to the InterPIG initiative, Mark also assisted Alberta Pork with establishing a cost of production benchmarking project in that province. It is hoped that the various Canadian sources for cost of production benchmarking can eventually be combined to form a reliable Canadian dataset.

U. S. Country of Origin Labeling (COOL) and International Trade

In November 2011, the WTO panel decision struck down trade illegal elements of the COOL legislation as it applies to imported livestock. It found that COOL does discriminate against foreign livestock and was inconsistent with WTO trade obligations.

In March 2012, the U.S. appealed the panel decision. The CPC, its members from Ontario and Manitoba and the Canadian Cattlemen’s Association collaborated on the analysis to support the government’s submission to the panel and continued to work towards a solution that would not necessitate further litigation.

In June 2012, the WTO Appellate Body released its report on COOL confirming that it did discriminate against Canadian livestock. However, the appeal decision found there wasn’t enough evidence to determine whether the COOL measure is more restrictive than necessary.

The Government of Canada indicated it will continue to work with its U.S. partners to ensure trade moves freely and asked that the U.S. respect international trade obligations and comply with the WTO findings.

Export Information 2011
(Source: Canada Pork International)

Canadian pork and pork by-products are exported to more than 143 countries. Only the European Union and the United States are exporting more pork products and by-products than Canada. Exports account for more than 50% of Canadian pork production. Total exports of all products in 2011 was 1,151,273 tonnes.

Initiatives undertaken by Canada Pork International (CPI) include Adding Value and Growth to...
Commodity Driven Markets. Promoting the attributes of Canadian pork is key to market access and differentiating from a commodity product, i.e.,

- Meat quality attributes
- Traceability
- On-farm food safety
- Animal welfare
- Exclusivity
- Consistency
- Exacting specifications
- Financial performance
- Promotional support
- Consumer marketing

CPI believes the value of all of these benefits – whether functional, emotional or exclusive – lead to a premium price for Canadian pork.

A 2012 study by the George Morris Centre confirms that Canadian hog and pork production and exports contribute $9.28 billion to the Canadian economy. The study also indicates that Canadian pork exports in 2011 of $3.2 billion generated additional value added activity of $3.5 billion for the Canadian economy and $20-30/ head back to Canadian hog producers.

European Union Trade Agreement

In April 2012, pork industry leaders participated in a series of events across the country to promote the importance of trade and highlight the benefits of an ambitious Canada-European Union free trade deal.

CPC Chair Jean-Guy Vincent stated that “Canada is a globally competitive and successful producer and exporter of pork and pork products. The key factor to sustaining our success is the ability to access a wide variety of markets.”

The Canadian Government is still looking at finalizing an agreement by the end of the year. A contact group within CPI has been established to formulate a Canadian pork industry position.

South Korean Free Trade Agreement

The Canadian Government is seeking to reengage South Korea in order to finalize the FTA. The Federal Government has asked the Canadian industry to see if there is support for this initiative from South Korean importers. CPI will work with other industry groups to identify possible activities in that regard.
Canadian Quality Assurance (CQA®)

There are 152 current registered units participating in the CQA program which is essentially all commercial hog production facilities in the province.

The only change to the program this year was the amalgamation of the Animal Care Assessment (ACA™) program into CQA® effective January 2012. Full producer participation in ACA® will be phased in over a three year period with farms completing the self-assessment form and checklist.

The FPPQ and the CPC have applied for funding for a project to look at a number of items in the CQA® program. They will be reviewing the generic HAACP model; assessing how the CQA® program relates to the Global Food Safety Initiative (GFSI) system; what the costs to producers would be to comply with the GFSI standard; considering a HAACP model for outdoor and organic pork; and finally looking at electronic technology to simplify on-farm data collection.

Sask Pork is participating in the electronic technology trials on a group of Saskatchewan farms.

National Swine Biosecurity Program

In the year since this program was launched, producer participation in the program has exceeded expectations. Originally rolled out in three provinces, it has since expanded to include all pork producing provinces.

Saskatchewan’s uptake in the Biosecurity Program program at July 31, 2012 is:

- 15 training sessions held
- 145 CQA® unit trained (152 eligible units)
- 97% of annual production by trained units
- 108 of the 145 assessments have been received and payments processed.

The Saskatchewan Swine On-Farm Biosecurity Program, funded by the Saskatchewan Ministry of Agriculture was announced June 21, 2012. This program has a total of $150,000 available for a follow-up veterinary visit and biosecurity enhancements under Growing Forward.

All farms that have received biosecurity training and completed the assessment forms can apply for a $300 payment to offset the cost of one additional veterinary visit and up to $1,000 towards equipment upgrades/purchases completed between March 20,
2012 and February 28, 2013. This added funding will assist pork producers in implementing biosecurity sanitation improvements on their farms.

Sask Pork also signed an additional delivery contract with the Canadian Swine Health Board (CHSB) to cover the funding for the additional farms we have trained above the initial estimate of 100 units. As with the first contract, the CSHB will cover $150 per unit for training, $500 for the farm to complete their assessment form and $500/unit for a visit from the farm herd health veterinarian to implement the program.

**PRRS Free Herd Certification Pilot Program**

This project was undertaken to assess the feasibility of certifying that farms are free from specific diseases, in this case PRRS. Target groups for the program include farms that sell feeder pigs, breeding stock or any class of live pigs for export.

The project is well underway with 92 farms enrolled in Saskatchewan, Alberta, Manitoba, Ontario and Quebec. Data input by the veterinarians is in progress and the project is working fairly smoothly.

We have received some invoices and have processed and/or paid producer compensation to participating producers to offset the extra time and effort required for the testing and data submission by their herd health veterinarians.

The project is wholly funded by the Canadian Swine Health Board.

**Transportation Quality Assurance (TQA®)**

This year Sask Pork held 12 TQA® certification training sessions with 111 attendees.

The Canadian Livestock Transport (CLT) program is being re-vamped and re-branded and will offer training in person and on-line in late 2012.
Saskatchewan Pork Industry Symposium - 2011

The 34th annual Symposium was held November 15-16 in Saskatoon. The conference theme Optimizing Profit and Minimizing Risk looked at how adjustments in the production environment translate into better profits. Attendance reached 229 over the two days.

Symposium Advisory Committee 2011

• Jennifer Brown - Prairie Swine Centre Inc.
• Kim Browne - SaskPork, Symposium Coordinator
• Matt Einarson - East-Man Feeds
• Bridget Grey - Big Sky Farms
• Steffen Klenk - PIC Canada Ltd.
• Don Kolla - Cudworth Pork Investors Group
• Brad Marceniuk - Saskatchewan Ministry of Agriculture
• David Tschetter, Star City Farming Co. Inc.
• Harvey Wagner - Sask Pork

Western Canadian Livestock Expo

Sask Pork exhibited at the annual pork and dairy trade show on April 13-14, 2012. 30 exhibitors participated over the two days showcasing the latest in swine and dairy equipment. Sask Pork sponsored the Farmyard lunch on the second day of the show.

Farmscape Radio Program

Farmscape, hosted by Bruce Cochrane, is in its 15th year of broadcasting. Sask Pork and Manitoba Pork Council co-sponsor the radio network.

The program airs daily (Mon-Fri) on CKLQ Radio Brandon, CFRY Radio Portage La Prairie, CJVR Radio and CK750 Radio Melfort, CKSW Radio Swift Current and XM105 Radio in Whitecourt, Alberta.

Agriculture in the City 2012

Sask Pork participated on the planning committee for the first Agriculture in the City event in Saskatoon. Held at the Farmer’s Market at River Landing, it was designed as a free family-oriented festival that demonstrated the value of agriculture in the local community.

In addition to the tradeshow, activities included cooking demos using local products, pie judging contests, goat rodeo, made in Saskatchewan breakfast and interactive games and activities for children.

The event was administered and funded by Agriculture and Agri-Food Canada with additional funding from the Saskatchewan Ministry of Agriculture and participating commodities.

Planning for the 2013 event began this summer. It will be a one day event (Saturday) in April held at a local shopping mall. This new venue will attract nearly 10,000 people in a single day.

Agri-Education Program

Throughout the year Sask Pork was involved in Agri-Ed events in Lloydminster, Prince Albert and Yorkton that attracted nearly 5,000 students. Our display was also requested by the Quesnel, B.C. 4-H group who still have a very active swine club.

Our AgEd display at Chilling with Agriculture in Prince Albert was manned by Laura Eastwood, Garrett Rozeboom, Millie Lemieux and Felina Tan, all graduate students at the Prairie Swine Centre.

The Lloydminster display was manned by Patricia McConnell, a former pork industry Animal Health Technician.
Communications & Promotion

**Hurry Hog Curling Rink Decals**

This is the 6th consecutive year we have offered the decals to Saskatchewan association curling rinks. In 2011 year 61 clubs ordered decals, nearly twice the number that had ordered the previous year.

**Gardenscape 2012**

Sask Pork sponsored one of the grilling demos this year with local chef Drew Hornell preparing and serving Molasses Smoked Pork.

The event provided an opportunity to answer consumer questions about cooking pork and distribute consumer resources.

More than 25,000 people attended the outdoor living trade show this year.

**Domestic Promotion**

In June 2011 the CPC Board of Directors responded to the initiative of Canada Pork International to facilitate a joint producer/packer domestic marketing undertaking by agreeing that CPI is the best vehicle to develop and implement a national marketing strategy.

A proposed National Marketing Strategy was accepted in principal.

A consulting group was retained to gather feedback from the provincial agencies on CPI’s role in export market development and domestic promotions.

Two one-day Distribution Education Program seminars for exporters were held in April in Toronto and Montreal.

**National Television Advertising**

The national closed-caption advertising featuring “Put Pork on Your Fork” and Choose Canadian Pork aired on CBC television’s "Best Recipes Ever, Steven & Chris and In the Kitchen with Stefano from November 2011 through April 2012.

The cost was shared by Sask Pork, Alberta Pork, Manitoba Pork Council and Ontario Pork.

104 ten-second Closed Captioning billboards aired with a projected audience during the period of 6,923,100 adults aged 25-54.

**Print Advertising**

As part of a regional promotions initiative, Sask Pork partnered with Manitoba Pork Council on a full page ad in two issues of Western Grocer magazine (spring and fall 2012).

Sask Pork also placed a full page ad plus advertorial in the June 2012 Star Phoenix Wellness Guide focussing on the lean and healthy attributes of fresh Canadian pork.

**Dieticians of Canada Annual Conference**

The Canadian pork industry was well represented at this national conference in Toronto in June.

Pork Marketing Canada, exhibitor and lunch sponsor, served pork burgers with mango salsa. Mary Ann Binnie, Manager, Nutrition & Food Industry Relations, CPC and Andrea Villneff of Ontario Pork were both on hand to answer questions on cooking times and temperatures and distribute consumer resources.
Communications & Promotion

Canadian Western Agribition November 2011 - Regina

Sask Pork Chairman Jay McGrath and Cliff Ehr, Ernie Patrick and Bridget Gray all of Big Sky Farms assisted staff in manning the pork display at the week long event in Regina.

In addition to the corporate exhibit, Sask Pork also sponsored the Agribition International Reception at the Casino Regina on the Wednesday evening.

Farm Animal Council of Saskatchewan “We Care” Billboard Campaign

Sask Pork was a sponsor of the 2012 campaign that is intended to “bring commodities together to educate consumers about livestock and poultry producers dedicated to responsible animal care 24/7”. 2012 sponsors of the campaign included the Saskatchewan Ministry of Agriculture, the bison, cattle, chicken, egg and pork industries. 24 billboards and one superboard were displayed in Saskatoon, Regina and Moose Jaw from May through August and then again in August.

2012-2013 Farrowing Calendars

Sask Pork and Alberta Pork partnered on the design and printing costs for two-year farrowing calendars which were distributed too all producers in December 2011.
Dr. Harold Gonyou  
Prairie Swine Centre Inc.  
*Lifetime Achievement Award*

Dr. Gonyou was honored for his contribution to the pork industry through his strong research, teaching and leadership roles in the field of animal behaviour. The results of his work have had a significant impact on the efficient and welfare appropriate production of animals. During his 19 years with the Prairie Swine Centre, Dr. Gonyou focused on addressing specific needs of the pork industry.

His list of research publications represents a comprehensive approach to the study of farm animal behaviour with a wide range of topics including: response to environmental challenges; maternal behaviour; use of space; equipment design, and social behaviour.

His work also addressed important welfare management practices such as early weaning in pigs, gestation housing for sows, crowding of growing animals, and animal transportation.

The industry continues to benefit from Dr. Gonyou’s contributions with seven of the nine Ph.D. graduates he trained currently holding tenure-track or research appointments in four countries.

He taught introductory animal science, environmental management, and animal production, to 800+ students and further contributed to the field of animal behaviour worldwide through publication of the book *Social Behaviour in Farm Animals*. He also served as President of the International Society for Applied Ethology and as Editor of *Applied Animal Behaviour Science*.

Dr. Gonyou’s career represents a successful example of applying a relatively new field of study, that combined research, teaching, and technology transfer, to improve the productivity and profitability of pork production while reinforcing the ability of all people in animal agriculture to be good animal stewards.

Don Hrapchak  
SPI Marketing Group Inc.  
*Lifetime Achievement Award*

Don Hrapchak’s career in the pork industry began at age 15 with a job at Intercontinental Packers where he worked part-time until finishing his Post-Secondary education at University of Saskatchewan. During that time he worked in virtually all areas of the processing plant including the stockyards.

In 1973, at age 24 he graduated with a B.Comm and accepted the position of Sales Manager with the Saskatchewan Hog Marketing Commission/SPI Marketing where he remained until 1998. He was then promoted to General Manager of SPI where he has remained until today.

During Don’s career in the pork/hog industry, he served on many boards and committees including Mitchells Gourmet Foods, Canada Pork International, h@ms Marketing Services, Saskatchewan AgriVision, Prairieland Park and Canadian Western Agribition. He recently worked tirelessly towards the merger of SPI Marketing and Manitoba Pork Marketing Co-op into h@ms Marketing Services.

Western Canadian Conference of the Canadian Culinary Federation - Regina - February 2012

Yorkton Exhibition Association - Pork AgEd display at Harvest Showdown - November 2011
2011/2012 was a positive year for producers in terms of pricing and margins. Although feed costs continue to steadily rise due to tight supplies, reduced supplies of hogs coupled with strong demand has led to strong pricing for hogs. This in turn resulted in most producers generating small to modest profits for the year, which was certainly welcome news given the recent history of losses in the industry. Additionally, Canadian WTO victories on U.S. country of origin labelling provided some positive news to the industry.

Between August 2011 and July 2012, index 100 hog prices in Saskatchewan averaged $161.23/ckg, which was significantly above the ten-year average of $135.43/ckg. This represents the highest prices of any 12-month period since 2000/2001 when prices averaged 162.28. Unfortunately, hog prices continue to lag behind prices received for other consumer goods. Adjusting for inflation (2002 dollars), the real price of hogs today is only $133.08/ckg.

In 2011/2012, the Cda/US exchange rate averaged 0.99, a decrease of approximately 2% over the previous year when it averaged 1.01. Although the decline was beneficial and did contribute to higher prices, it should be noted that this was the second highest exchange rate in recent history.
Feed prices in 2011/2012 continued to remain historically high, influenced heavily by low carry-in stocks resulting from last year’s wet conditions. As a result of the continued tight supplies, Saskatchewan feed wheat prices increased by 18% to $204.14/tonne while feed barley prices increased 19% to $181.26/tonne, and feed Peas increased 16% to $179.17/tonne between August, 2011 and July 2012.
In 2011, Saskatchewan produced a total of 2,067,018 pigs, which was up by 98,637 animals from 2010. Feeder pig exports were steady, up by 4% to 264,945 pigs. Market hog production increased by 85,053, while marketings of sows and breeding stock remained relatively stable.

The total number of pigs produced in Canada declined slightly in 2011. Eastern Canadian production decreased by 295,200 animals and stands at just under 14 million pigs, while western Canada’s production increased by 247,400 animals and sits at just over 13 million pigs. Saskatchewan remains the 5th largest pork producing province in Canada behind Manitoba, Quebec, Ontario, and Alberta.

*Includes: Slaughter Market and Culled Hogs, Weanlings and Feeders*
Statistics & Trends

Checkoff data indicates that Saskatchewan produced 1,802,073 market hogs, cull sows, and breeding stock in 2011. Of these animals, approximately 1,181,810 of Saskatchewan’s market hogs were transported to Manitoba for slaughter, while 444,356 animals were transported to Alberta for slaughter. U.S. exports of market weight animals increased slightly to 74,593. In all, 101,314 animals produced in Saskatchewan were slaughtered locally in the province.

In 2011, the total Canadian slaughter decreased by 28,000 animals to a total of just over 21 million animals. Manitoba/Saskatchewan was the only region to increase their slaughter, while Ontario remained steady and both Alberta/BC and Quebec and the Atlantic provinces declined.

Source: Agriculture and Agrifood Canada, Red Meat Market Information, Various Years

Live hog exports from Canada to the U.S. were up in terms of feeder pig exports, but down in terms of slaughter animals. According to Agriculture and Agri-food Canada, approximately 4.8 million feeder pigs were exported from Canada to the United States in 2011 up 2% from the previous year. Canadian market hog exports to the U.S. were down by 53,988 animals and sit at just under one million animals.

In November, 2011 it was announced that Canada won the WTO case on U.S. country of origin labelling. The U.S. appeal of this decision was overturned in June, 2012. Canadian live hog exports have declined sharply since the country of origin labelling laws came into force in 2008.

Audited Financial Statements
for the year ended July 31, 2012

Management’s Responsibility

To Saskatchewan Pork Producers:

Management is responsible for the preparation and presentation of the accompanying financial statements, including responsibility for significant accounting judgments and estimates in accordance with Canadian generally accepted accounting principles. This responsibility includes selecting appropriate accounting principles and methods, and making decisions affecting the measurement of transactions in which objective judgment is required.

In discharging its responsibilities for the integrity and fairness of the financial statements, management designs and maintains the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets are safeguarded and financial records are properly maintained to provide reliable information for the preparation of financial statements.

The Board of Directors (the "Board") is composed entirely of Directors who are neither management nor employees of the Organization. The Board is responsible for overseeing management in the performance of its financial reporting responsibilities, and for approving the financial information included in the annual report. The Board fulfills these responsibilities by reviewing the financial information prepared by management and discussing relevant matters with management and external auditors.

Twigg & Company, an independent firm of Chartered Accountants, is appointed by the Board to audit the financial statements and report directly to the members, their report follows. The external auditors have full and free access to, and meet periodically and separately with, both the Board and management to discuss their audit findings.

To the Board of Directors of Sask Pork.

Report on the Financial Statements
We have audited the accompanying financial statements of Sask Pork, which comprise the statement of financial position as at July 31, 2012, and the statements of operations, change in net assets, cash flows, and schedule of travel expenses for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management’s Responsibility for the Financial Statements
Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian generally accepted accounting principles, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatements, whether due to fraud or error.

Auditors’ Responsibility
Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about amounts and disclosures in the financial statements. The procedures selected depend on our judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion
In our opinion, these financial statements present fairly, in all material respects, the financial position of Sask Pork as at July 31, 2012 and the results of its operations and cash flows for the year then ended in accordance with Canadian generally accepted accounting principles.

1. DESCRIPTION OF BUSINESS

Sask Pork, operating as Saskatchewan Pork Development Board, is a producer managed organization operating programs and research for the development of the Saskatchewan pork industry and the promotion of hogs and pork produced in Saskatchewan. Sask Pork was established by the Pork Industry Development Plan Regulations pursuant to The Agri Food Act. Sask Pork is subject to supervision by the Agriculture and Food Products Development and Marketing Council members of which are appointed by the Government of the Province of Saskatchewan.

The Pork Industry Development Plan Regulations allow Sask Pork to set and collect non-refundable check-offs from any person engaged in the marketing of hogs in Saskatchewan. As of January 1, 2003 the hog check-off is $0.75 per hog. As of January 1, 2005 a check-off of $0.20 per hog for all hogs under 100 lbs. and $0.75 on all breeding stock exported from Canada was implemented.

Sask Pork is exempt from income taxes in accordance with Section 149 of The Income Tax Act.

2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with Canadian generally accepted accounting principles and include the following significant accounting policies:

(a) Financial instruments

  Held for trading:

Any financial instrument whose fair value can be reliably measured may be designated as held for trading on initial recognition even if that instrument would not otherwise satisfy the definition of held for trading. The Organization has classified cash and investments as held for trading. These instruments are initially recognized at their fair value.

Held for trading financial instruments are subsequently measured at their fair value. Net gains and losses from changes in fair value are recognized immediately in excess of revenue over expenses.

Loans and receivables:

The Organization has classified accounts receivable as loans and receivables. These assets are initially recognized at their fair value.

Loans and receivables are subsequently measured at their amortized cost. Amortized cost is the amount at which the financial asset is measured at initial recognition less principal repayments.

Net gains and losses arising from changes in fair value are recognized in excess of revenue over expenses upon derecognition or impairment.
2. **SIGNIFICANT ACCOUNTING POLICIES (continued)**

(a) **Financial instruments (continued)**

**Other financial liabilities:**

The Organization has classified accounts payable and accrued liabilities as other financial liabilities. These liabilities are initially recognized at their fair value.

Other financial liabilities are subsequently measured at amortized cost. Net gains and losses arising from changes in fair value are recognized in excess of revenue over expenses upon derecognition or impairments.

**Financial asset impairment:**

The Organization assesses impairment of all its financial assets except those classified as held for trading. Management considers whether there has been a breach in contract, such as a default or delinquency in principal payments, in determining whether objective evidence of impairment exists. Impairment is measured as the difference between the asset’s carrying value and its fair value. Any impairment, which is not considered temporary, is included in the current year’s excess of revenue over expenses.

(b) **Cash and cash equivalents:**

Cash is comprised of cash on hand.

Short-term investments are composed of guaranteed investment certificates. They qualify as cash equivalents as they are short term, highly liquid investments, that are readily convertible to a known amount of cash and which are subject to an insignificant risk of changes in value. Short-term investments subject to restrictions that prevent their use for current purposes are included in restricted investments.

(c) **Capital assets:**

Sask Pork capitalizes all assets with a cost over $1,500. Capital assets are stated at cost. Amortization is computed using the straight line method at rates calculated to amortize the cost over their estimated useful lives at the following rates:

- Computer equipment: 3 years
- Furniture and equipment: 3-5 years
- Leasehold improvements: 3 years
2. SIGNIFICANT ACCOUNTING POLICIES (continued)

(d) Revenue recognition:

Hog check-off revenue is recognized using the accrual basis in conjunction with delivery of producer’s product.

Sask Pork follows the deferral method of accounting for contributions. Restricted contributions are recognized as revenue in the year in which the related expenses are incurred or restrictions met. Unspent amounts are included in deferred contributions and revenue. Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Recognition of grants related to capital assets is deferred to periods when the related capital assets are amortized.

Revenues for conference fees are recognized upon completion of the conference.

Interest and investment revenue is recognized when earned.

(e) Research funding expenses:

Research funding expenses are recognized when projects are approved and the recipient has met eligibility criteria. Funds advanced to recipients prior to eligibility criteria being met are recorded as advances. Sask Pork receives funding from the Canadian Swine Health Board for eligible costs incurred for the PRRS project.

(f) Use of estimates:

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. These estimates and assumptions are reviewed periodically and, as adjustments become necessary, they are reported in excess of revenues and expenses in the periods in which they become known.

4. DEFERRED CONTRIBUTIONS AND REVENUE

Sask Pork receives funding from the Canadian Swine Health Board (CSHB) to be held, administered and distributed in accordance with the related PRRS project funding agreement. Deferred contributions related to expenses of future periods represent unspent externally restricted funding for the purposes of paying research expenditures in future periods.

Sask Pork receives funding to administer the On Farm Food Safety (OFFS) program. The OFFS program provides funding to producers who have expended funds on approved program activities such as OFFS technical advice, the purchase of approved equipment, or a first certification audit.

Sask Pork receives funding from the Canadian Swine Health Board (CSHB) to be held, administered and distributed in accordance with the related National Biosecurity Training program funding agreement. The National Biosecurity Training program provides funding to producers who have attended training sessions on national biosecurity, completed a self assessment and action plan, and had a veterinarian conduct an onsite visit. Deferred contributions related to expenses of future periods represent unspent externally restricted funding for the purposes of paying program participants and veterinarians.

Sask Pork receives funding from the Saskatchewan Ministry of Agriculture to be held, administered and distributed in accordance with the related Saskatchewan Swine On-Farm Biosecurity program funding agreement. The Saskatchewan Swine On-Farm Biosecurity program provides funding to producers who have attended training sessions on biosecurity, completed a self assessment and action plan, and had a veterinarian conduct an onsite visit. Deferred contributions related to expenses of future periods represent unspent externally restricted funding for the purposes of paying program participants and veterinarians.

5. INTERNALLY RESTRICTED NET ASSETS

a) Sask Pork’s Board of Directors have internally restricted net assets of $1,000,000 as a reserve for future operating expenses.

6. RESEARCH COMMITMENTS

Prairie Swine Centre Inc.

Effective January 1, 2011 Sask Pork agreed to provide an annual contribution of $275,000 to the Prairie Swine Centre Inc. The annual contribution is provided for the core funding of the Prairie Swine Centre. The amounts that Sask Pork has committed to pay to PSCI are as follows:

<table>
<thead>
<tr>
<th></th>

9. FINANCIAL INSTRUMENTS

The Organization as part of its operations carried a number of financial instruments. It is management’s opinion that the Organization is not exposed to significant interest, currency or credit risks arising from these financial instruments except as otherwise disclosed.

Risk management policy

The Organization, as part of operations, has established a minimization of credit risk policy as its risk management objective. In seeking to meet this objective, the Organization follows a risk management policy approved by its Board of Directors. The collection of accounts receivable is monitored by the Financial Administrator in conjunction with contacting slaughter plants to ensure collection of the hog check-off is made on a timely basis.

Credit concentration

As at July 31, 2012, four customers accounted for 82.76% (68% - 2011) of accounts receivable, representing the Organization’s maximum credit risk exposure. The Organization believes that there is no unusual exposure associated with the collection of these receivables. The Organization manages its credit risk by performing regular credit assessments of its customers and provides allowances for potentially uncollectible accounts receivable.

Fair value of financial instruments

The carrying amount of cash, investments, accounts receivable and accounts payable and accrued liabilities is approximated by their fair value due to their short term nature.
9. **FINANCIAL INSTRUMENTS** (continued)

**Interest rate risk**

Interest rate risk is the risk that the value of a financial instrument might be adversely affected by a change in the interest rates. Changes in market interest rates may have an effect on the cash flows associated with some financial assets and liabilities, known as cash flow risk, and on the fair value of other financial assets or liabilities, known as price risk. The Organization is not exposed to significant interest rate risk on its investments.

**Liquidity risk**

Liquidity risk is that the Organization will encounter difficulty in meeting obligations associated with financial liabilities. The Organization enters into transactions to purchase goods and services on credit and lease office equipment and office space from creditors, for which repayment is required at various maturity dates. Liquidity risk is measured by reviewing the Organization’s future net cash flows for the possibility of a negative net cash flow. The Organization manages liquidity risk resulting from accounts payable and accrued liabilities by investing in liquid assets such as cash and short-term investments which can be readily available to repay accounts payable and accrued liabilities.

10. **CAPITAL MANAGEMENT**

The Organization has no formal capital management policy however the Board of Directors conducts an annual budgeting and strategic planning meeting. The Organization has no externally imposed capital requirements.

11. **BUDGET**

The budget for 2011/2012 was approved by the Board of Directors on July 22, 2011.

12. **SUBSEQUENT EVENT**

On September 10, 2012 Big Sky Farms, a major pork producer in province, entered into receivership. At year-end the Organization had a receivable from Big Sky Farms of $21,082 the collection of which is highly unlikely. Accordingly, the Organization has written off this account as a bad debt expense at year-end.

Big Sky Farms produces a significant percentage of the province’s total pork production. As such if Big Sky Farms is not purchased as an operating entity the potential loss of this production in Saskatchewan could result in a significant decrease in the Organization’s check-off revenue in the future. However, at present the ultimate financial impact on the Organization cannot be reasonably estimated.

Disclosure of Payments
as at July 31, 2012

Payee List

The Agri-Food Council requires Sask Pork to disclose in their annual report significant payments made over the course of the year. Payments in excess of $35,000 made to a single organization are as follows:

502 on 45th Trade Centre $ 51,013
Big Sky Farms Inc. $ 93,103 *
Canadian Pork Council $ 267,036
Canadian Swine R&D Cluster $ 145,513
CIBC Visa $ 61,766
Prairie Swine Centre $ 151,513

* Big Sky Farms Inc. payments composed of $44,450.00 for the National Biosecurity program, $45,000.00 for the OFFS program and $3,653 for the PRRS project.

** Included in the per diem was a monthly honorarium of $150 paid to the Vice-Chair.

*** Payments made to facilitate meetings.
Auditors’ Report

To Saskatchewan Pork Producers:

We have made an examination to determine whether Sask Pork complied with the provisions of the following legislative and related authorities pertaining to its financial reporting, safeguarding agency resources, spending, revenue raising, borrowing and investing activities during the year ended July 31, 2012.

- The Agri-Food Act, 2004
- The Agri-Food Regulations, 2004
- The Pork Industry Development Plan Regulations

Our examination was made in accordance with the Canadian generally accepted auditing standards and, accordingly, included such tests and other procedures as we considered necessary in the circumstances.

In our opinion, Sask Pork has complied, in all significant respects, with the provisions of the aforementioned legislative and related authorities during the year ended July 31, 2012.

Chartered Accountants
Independent Auditors’ Report

To Saskatchewan Pork Producers:

We have audited Sask Pork’s control as of July 31, 2012 to express an opinion as to the effectiveness of its control related to the following objectives:

1. To safeguard agency resources. That is, to ensure its assets are not lost or used inappropriately; to ensure it does not inappropriately incur obligations; to establish a financial plan for the purposes of achieving its financial goals; and to monitor and react to its progress towards the objectives established in its financial plan.

2. To prepare reliable financial statements.

3. To conduct its activities following laws, regulations and policies related to financial reporting, safeguarding agency resources, revenue raising, spending, borrowing and investing.

Management’s Responsibility
The Organization’s management is responsible for maintaining effective control over the objectives stated above.

Auditors’ Responsibility
Our responsibility is to express an opinion based on our audit as to the effectiveness of its control related to the following objectives:

1. To safeguard agency resources. That is, to ensure its assets are not lost or used inappropriately; to ensure it does not inappropriately incur obligations; to establish a financial plan for the purposes of achieving its financial goals; and to monitor and react to its progress towards the objectives established in its financial plan.

2. To prepare reliable financial statements.

3. To conduct its activities following laws, regulations and policies related to financial reporting, safeguarding agency resources, revenue raising, spending, borrowing and investing.

Independent Auditors’ Report

To Saskatchewan Pork Producers:

(continued from previous page)

We used the control framework developed by The Canadian Institute of Chartered Accountants (“CICA”) to make our judgments about the effectiveness of Sask Pork’s control. We did not audit certain aspects of control concerning the effectiveness, economy and efficiency of certain management decision-making processes.

The CICA defines controls as comprising those elements of an organization that, taken together, support people in the achievement of the organization’s objectives. Control is effective to the extent that it provides reasonable assurance that the organization will achieve its objectives.

We conducted our audit in accordance with standards for audits of internal control set out in the CICA Handbook - Assurance. Those standards require that we plan and perform the audit to obtain reasonable assurance as to effectiveness of Sask Pork’s control related to the objectives stated above. An audit includes obtaining an understanding of the significant risks related to these objectives, the key control elements and control activities to manage these risks and examining, on a test basis, evidence relating to control.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Control can provide only reasonable and not absolute assurance of achieving objectives reliably for the following reasons. There are inherent limitations in control including judgement in decision-making, human error, collusion to circumvent control activities and management overriding control. Cost/benefit decisions are made when designing control in organizations. Because control can be expected to provide only reasonable assurance, and not absolute assurance, the objectives referred to above may become ineffective because of changes in internal and external conditions, or that the degree of compliance with control activities may deteriorate.

Opinion

In our opinion, based on the limitations noted above, Sask Pork’s control was effective, in all material respects, to meet the objectives stated above as of July 31, 2012 based on the CICA criteria of control framework.
Independent Auditors’ Report

To Saskatchewan Pork Producers:

(continued from previous page)

We have also audited, in accordance with Canadian generally accepted auditing standards, the financial statements of Sask Pork, which comprise the statement of financial position as at July 31, 2012, and the statements of operations, change in net assets, cash flows, and schedule of travel expenses for the year then ended, and a summary of significant accounting policies and other explanatory information. We have issued our report dated October 26, 2012, which is the same date as the date of the report on the effectiveness of internal controls.

Chartered Accountants
To Saskatchewan Pork Producers:

We have examined the financial statements of Sask Pork for the year ended July 31, 2012 and have issued our report thereon dated October 26, 2012. We have examined the system of internal control as at July 31, 2012 and have issued our report to you dated October 26, 2012. We have also made an examination to determine whether Sask Pork complied with specified legislative and related authorities pertaining to its financial reporting, safeguarding agency resources, spending, revenue-raising, borrowing and investing activities during the year ended July 31, 2012 and have issued our report to you dated October 26, 2012.

Our examinations were made in accordance with Canadian generally accepted auditing standards, and accordingly included such tests and other procedures as we considered necessary in the circumstances. In those instances, if any, that our study and evaluation of internal control disclosed conditions indicating that internal controls were inadequate or not complied with, substantive tests were performed to detect any case in which:

1) any officer or employee of Sask Pork has willfully or negligently omitted to collect or receive public money belonging to the Crown;
2) there has been a deficiency or loss to the Crown through the fraud, default or mistake of any person;
   and
3) an expenditure was made which was not properly vouchered or certified.

During the course of these examinations, nothing came to our attention that would indicate to us that:

1) any officer or employee of Sask Pork has willfully or negligently omitted to collect or receive public money belonging to the Crown;
2) there has been a deficiency or loss to the Crown through the fraud, default or mistake of any person;
   and
3) an expenditure was made which was not properly vouchered or certified.
