Corporate Governance

The Saskatchewan Pork Development Board (Sask Pork) is an agency established under the Agri-Food Council and complies with the provisions of *The Agri-Food Act, 2004*, *The Agri-Food Regulations 2004*, and *The Pork Industry Development Plan Regulations, 2013* pertaining to its financial reporting, safeguarding public resources, spending, revenue raising, borrowing and investing activities.

Internal Controls

Sask Pork adheres to internal financial controls as detailed in the *Policy and Operating Procedures Manual* approved by the Board of Directors in September 2005.

The pork industry has experienced a year to remember! After struggling through years of low prices, high costs, welfare challenges, labour shortages and other maladies, who expected the last year to be so profitable?

PEDv hit the US heartland in April 2013. Since then, more than 8000 cases have been confirmed in 31 states. An estimated 8 million pigs were lost. Farrowing herds infected experienced devastating scours that caused piglet deaths while demoralizing people working long hours to try to help.

Canada got PED as well. Here it was limited to 63 cases in Ontario, 5 cases in Manitoba and 1 in PEI. To date, Saskatchewan and the other provinces have been spared.

Sask Pork has focused on using all available resources to fight PED. We have cooperated with our provincial Chief Veterinary Officer Dr. Betty Althouse, who has been a big help and nationally with the Canadian Pork Council’s Canadian Swine Health Board, veterinarians and industry related organizations to lower the risk.

Many of our efforts have been focused on transportation and biosecurity which are likely the biggest risk factor and offer the best opportunity to protect our industry.

Animal welfare was a major item in the last year. Sask Pork participated in the development of the new Pig Code for Canada which was released this spring by the National Farm Animal Care Council. There were eleven face to face national meetings, more than 50 conference calls by the Code committee plus numerous producer and industry meetings that lead to a final version that should set the standard for years to come.

Sask Pork continues to work on a national Hedging program to reduce price risk on hog sales. This proposal would use futures contracts to forward price thus giving producers a tool to reduce risk.

Production in our province has seen a bit of a resurgence. Our sow herd leads the nation in growth as some empty facilities are being brought back into production. Our industry must maintain significant numbers to stay viable so this is a very good sign.

Sask Pork and our industry should count its blessings over the last year. Great profits do not last long so enjoy it while we can. However hard work by all to maintain a healthy and efficient hog sector will pay big dividends when lean times return.

Thanks to our staff and all that work hard every day to make it happen!

Florian Possberg
Chairman
To quote Chairman Possberg, during some of the bleakest financial times of the industry, "eventually even bad luck runs out". And so it has. The perfect storm has turned into perfect market conditions; hog prices for much of 2014 were at record levels, and while feed prices remained high into the summer of 2014, an excellent crop in the United States has resulted in feed grain prices at half the 2014 highs. The combination of record high market hog prices and ever lower feed grain costs have resulted in very good margins, at times well over $60 per market hog. While one is always watching the horizon for some unexpected market issue, the 2014/15 year also looks to be very profitable. Finally.

As profitability has returned to the industry, we are beginning to see producers upgrading their facilities and in some cases reopening some of the better barns that were closed during the Transition program days. That being said, there will be no major expansion of the herd as we expect the industry will need an extended period of profitability before we will see any major new building. One good year will not replenish the balance sheets of producers. Hopefully we are just entering a long term profitability period as many barns will be soon reaching there useful life and two of the major packers need significantly more market hogs to run the plants at reasonable operational efficiencies. It's important the entire value chain operates at peak efficiency to maintain competitiveness with other global marketors. For our part, we will need to develop a strategy for new construction, even to maintain current production levels.

Maintenance of swine health in producers’ herds has always been a major priority for Sask Pork. During this past year, the health file dominated our activities in an effort to prevent the spread of PEDv into Canada and our producer's herds. Since the first U.S. case of PEDv in May 2013, it has infected over 70% of their herds, is now endemic, and has caused considerable hardship to those affected. Our response to the U.S. situation prompted strategies for prevention as well as containment and eradication should a break occur somewhere in Saskatchewan over the course of the last year and a half. Sask Pork and the Government of Saskatchewan have committed over $1.5 million dollars for surveillance, reporting systems, producer communications, biosecurity programs, a new transportation certification program and research into a long term solution.

Sask Pork continued to work on or monitor other important files such as feral hogs, international trade agreements, COOL, marketing, Swine Innovation Porc, PSC and research, risk management, including an insurance and hedging program,a new Code of Practise, CQA®, ACA™, TCA and PigTrace.

In closing, I would like to thank our Chairman and Board of Directors for their wisdom, dedication and guidance of the organization and the staff for all their hard work and thoughtfulness during the past year.

Neil Ketilson
General Manager
Elections

Elections are held in November of odd numbered years. The Board of Directors consists of six registered producers who may hold office for a maximum of three consecutive, two-year terms.

The Executive is elected annually by the Board of Directors at the first scheduled meeting of directors following the Annual General Meeting.

Mission

To provide leadership for producers and collaborate with stakeholders to ensure the Saskatchewan pork industry’s continued environmental, social and economic sustainability.

Vision

To position the Saskatchewan pork industry as a preferred supplier of high quality, competitively priced pork products for the global market.

Western Livestock Price Insurance Program

A new program was introduced in Saskatchewan in April, 2014- the Western Livestock Price Insurance Program (WLPIP). This is an options-style product that is available for cattle and hog producers to purchase and enables producers to set a floor price for their production.

Sask Pork hosted a producer meeting on April 23, 2014 where officials from the Saskatchewan Ministry of Agriculture and the Saskatchewan Crop Insurance Corporation presented the details of the new program.

While the program is innovative and offers a new pricing option to producers, it appears the cost (premiums) for the program are high, both when compared to premiums offered to the cattle sector under the same program and compared to other forward pricing and hedging options available to producers.

Sask Pork will continue to work with governments to improve the value of this program for the province's hog producers.

Hedging

Given the cyclical nature of hog and feed markets, developing and encouraging producers to utilize risk management has long been a topic of interest and priority for governments and the hog industry. The industry's recent volatility has demonstrated that is beneficial for producers to increase their use of risk management.

Hedging both lean hog futures and the Canadian dollar is a proven and effective strategy to protect Canadian producers from unexpected price declines. However, in the event the commodity price increases, futures trading can carry a significant short-term financial risk. That is, the producer must forward cash to their broker just to maintain their market position before they have actually sold the product. This short-term cash flow uncertainty resulting from margin calls is thought to deter many farmers, producer organizations, and other service providers from extensively hedging their production.

Over the past two years, one of Sask Pork’s main risk management policy initiatives has involved advocating for increased government support for private sector risk management- specifically, access to a pool of capital for margin calls. In cooperation with several other provinces and the Canadian Pork Council, Sask Pork developed the concept for a program which would provide a government loan guarantee for margin calls, making it easier for producers to obtain financing specifically for this purpose.

There is ongoing interest in the program by federal and provincial governments. Agriculture and Agri-Food Canada has funded two studies, which confirmed that the concept was feasible and carries little financial risk. In 2014, the Canadian Pork Council was encouraged to submit a proposal to the new federal AgriRisk Initiatives program which we hope will be approved and provide further analysis and development of the program.
PigTrace Canada

In July, 2014, amendments to the Health of Animals Act came into force that made swine traceability mandatory in Canada. The regulations require anyone moving swine to report the locations of origin and destination, the date/time of the movement, license plate of the vehicle, and the quantity of animals and identification numbers on the animals. The regulations also require tags or tattoos to be applied to animals for certain types of movements.

The CPC is the national administrator of the swine traceability program, and Sask Pork is responsible for the administration of the system within Saskatchewan.

In early June, 2014, Sask Pork sent traceability packages to all registered producers which included the PigTrace information kit and login information for the PigTrace online database. Also included was a laminated sheet containing the new premises IDs and tattoo identifiers (herd marks) issued to each unit.

Sask Pork held 6 Traceability information sessions in June (4 in-person meetings & 2 webinars). About 120 people attended these meetings. To date, uptake has been excellent. Saskatchewan producers in July reported 927 movement events. Most farms are using electronic methods to input data into the PigTrace system (website, CSV files) and a small number are sending faxes to PigTrace.

On July 4th, Sask Pork started processing PigTrace tag orders for Saskatchewan producers. Tags may be used to identify pigs for certain types of movements, but producers typically utilize tags for feeder pigs, breeding stock and culled breeding stock, and movements to unknown destinations.

We’ve had a significant amount of producer contact through this implementation period, though most registered producers seem to now be comfortable with the reporting process. We commend producers for their receptiveness and ongoing hard work to make this program a success.

InterPIG

In 2013/14, Mark Ferguson continued to represent Canada on the InterPIG international cost of production benchmarking group. InterPIG data is the most reliable data available that compares prices and cost of production in various countries around the world. The participants include the U.S., Brazil, and a number of E.U. countries. The participating countries are responsible for 90% of the world’s pork exports, so the data represents our most significant competitors.

The results show that in 2013, Canada had the second lowest cost of production of the 15 participating countries at $190/ckg (all figures expressed in Canadian hot dressed carcass basis and Canadian dollars). Only Brazil was lower, with the Santa Caterina region at $178/ckg, and the Mato Grosso region at $158/ckg.

The U.S. reported a cost of production at $200/ckg. Sweden led the European countries with a cost of production totalling $278/ckg, while Spain reported the lowest E.U. cost at $220/ckg. Denmark reported their costs at $227/ckg. In terms of hog prices, the Mato Grosso region of Brazil reported the lowest price at $136/ckg, followed by Canada at $141/ckg, and the Santa Caterina region of Brazil at $142/ckg. The U.S. reported price was $155/ckg. Denmark reported the lowest European price at $170/ckg, while Austria reported the highest at $195/ckg.
Canadian Swine Health Board Undergoes Transition

The Canadian Swine Health Board (CSHB) was originally established in 2009 and received Government of Canada funding of $25 million to develop biosecurity best management practices, address swine research needs and evaluate long term disease risk management strategies.

The CSHB was very successful in delivering communications, biosecurity programs, research and surveillance systems across the country.

As of March 31, 2014, its financial support changed significantly forcing the CSHB, Canadian Pork Council and the provincial pork associations to determine how to maintain the essential elements of the Swine Health Board with a significantly reduced budget. Much of that debate continues. However, with the threat of PEDv, Delta coronavirus and other emerging diseases, swine health has been elevated to the top of everyone's agenda.

In April 2014 government funding for the program was reduced to basic operations and has since been cancelled. The CSHB has no staff and its tenure is in limbo until the former Board, CPC and provincial pork organizations can develop a governance and funding model to adequately deal with the swine health file. While the national debate continues, many of the provincial pork associations, including Sask Pork, are developing programs and committing significant dollars to enhance communications, biosecurity, and surveillance programs.

CPC restructuring

Given the transition undergone by the Canadian Swine Health Board and the changing mandate of the Canadian Pork Council, a committee representing a number of provincial pork associations and senior staff within the CPC, have been working through a process to evaluate the present operational structure of the organization.

Of interest is the changing role and responsibilities of the CPC from its original mandate of policy, trade and regulatory development and lobbying governments. CPC is now also responsible for developing and delivering industry on-farm food safety and animal care programs, including CQA®, ACA™ and PigTrace Canada.

As a result of this broadened role of the organization, the committee reviewed the organizational model and provided recommendations on a new structure to the CPC Board of Directors and the member forum.
Canada is known as a supplier of safe high quality pork. Canadian pork products are exported to more than 100 countries. Exports account for more than 50% of Canadian pork production. In 2013, Annual Canadian pork exported a total of approximately 1.2 million tonnes with a value of $3.2 billion.

2013/2014 was an extraordinary year for Canada in terms of negotiating new free trade deals with major markets, and the Government of Canada along with the Canadian Pork Council and Canada Pork International should be commended for their efforts in opening up new markets for pork. Among the highlights this year:

#### Canada-EU FTA (Announced Oct. 2013)

- The European Union (E.U.) is an important pork-consuming market which the Canadian pork industry has had little real access. The E.U., with a population of 500 million people consumes over 20 million tonnes of pork annually.
- In addition to securing free access for processed pork products on the day this new agreement takes effect, Canada will acquire a quota volume equivalent to over 80 thousand tonnes of pork cuts.
- The solid trade deal that has been negotiated with the EU could increase Canadian pork exports by up to $400 million a year.

#### Canada-Korea FTA (Announced March, 2014)

- The Canadian pork industry has been a strong advocate for completing a Canada-Korea FTA to prevent further deterioration in Canada's competitive position in that market against competitors - the United States, the European Union and Chile, all of which have free trade deals in place.
- This FTA will put Canada on equal footing with those competitors in what has at times been the industry's third or fourth most important export market. Without an FTA with Korea, Canada's $223 million of pork trade with Korea in 2011 and $129 million of pork trade in 2012 would largely disappear when the FTAs Korea has signed with three other countries are fully implemented. Canada exported approx. $76 million dollars of pork to Korea in 2013.
- South Korea has typically been a top 5 market to Canada, and the high value of the items sold there, such as chilled (shoulder) butts and bellies is significant enough to have a major impact on Canadian hog prices and jobs in both the farming and processing sectors should Canada lose access to the market.
- An American study evaluated the benefits for the US pork sector of the FTA between US and Korea at US $10 per hog. The benefits for the Canadian pork industry of a Canadian FTA with South Korea should be similar as those in the US.
Export Focus

Trans-Pacific Partnership (TPP)  
(Ongoing Negotiations)

• The Canadian Pork industry has strongly supported the TPP talks from the outset.

• Reports that Japan has made unacceptable tariff offers in each of the agricultural sectors it considers sensitive, including pork, compel us to express our deep concern that these critical market access objectives will not be achieved.

Canada-Honduras FTA (Signed November 2013)

• Will help restore pork access to a market that could be worth an estimated 5 to 7 million dollars in sales in the first year of the FTA.
Canadian Quality Assurance (CQA®)

There are currently 150 registered units participating in the CQA® and ACA™ programs, which covers virtually all hogs sold for slaughter in Saskatchewan. Work to streamline the CQA® and the ACA™ programs is continuing and will include the ACA™ being incorporated into the CQA® program; providing an electronic delivery option and aligning CQA® with other international food safety programs.

Canadian Ractopamine-Free Pork Certification Program

The Canadian Ractopamine-Free Pork Certification Program (CRFPCP) is becoming mature with more producers being enrolled as more processors in our region participated in the program. It has proven successful with significant movement of pork to Russia prior to the ban on pork from Canada this summer. The program is continuing since many of our other international customers wish to purchase pork raised under the program.

On-going monitoring of producers will be done as a part the CQA® program for those producers enrolled in the CRFPCP. The CFIA is working with industry to blend the CRFPCP with the EU pork standards program.

Pig Code of Practice Development

The National Farm Animal Care Council (NFACC) released the final version the new Code in June. The Code Development Committee took into account producer comments gathered after the release of the draft, so there was good producer response to the new Code. Printed version of the Code will be sent to all producers in the fall.

Saskatchewan Swine On-Farm Biosecurity Program 2014

The Saskatchewan Swine On-Farm Biosecurity Program (SSOFBP), funded by the Saskatchewan Ministry of Agriculture and the Government of Canada through Growing Forward 2, was announced by Ministers Ritz and Stewart on April 17, 2014. The SSOFBP had a total of $150,000 available for a second follow-up veterinary visit and biosecurity enhancements.

All Saskatchewan swine farms were eligible to apply for a $300 payment to offset the cost of one additional veterinary visit and up to $1,000 towards equipment upgrades/purchases completed between February 1, 2014 and July 31, 2014. This added funding was to assist pork producers in implementing biosecurity sanitation improvements on their farms. At the close of the SSOFBP on July 31, 2014, 122 farms made application to the program and were paid a total of $149,911. Sask Pork provided a payment of $300 for a second biosecurity focused veterinary visit on any Saskatchewan hog farm in 2014. At year-end 15 farms had submitted claims for a visit.

Porcine Epidemic Diarrhea (PED) Virus Preparedness

The arrival of Porcine Epidemic Diarrhea (PED) in North America in 2013 and the devastating effects it wrecked on producers whose farms were affected, have been a major focus of producers and the industry and Sask Pork over the past year. The first cases in Canada were reported in Ontario and the Maritimes.

Sask Pork established two working committees to tackle the challenge of PED infection of Saskatchewan herds. The Transportation Sanitation Group is focused on preventing PED infection and the Contingency Planning Group developed plans for
containment and mitigation of PEDv infection(s) on Saskatchewan farms. A contingency plan has been finalized and is available for implementation when required. A number of initiatives to prevent infection have begun, including a transport wash certification program and research to improve wash effectiveness.

Surveillance testing for PED was undertaken earlier this year and continues at high traffic areas by Saskatchewan CVO office personnel. Sask Pork and the Government of Saskatchewan have committed significant funds to assist with PEDv prevention and mitigation activities.

Producer information sessions and telephone town hall meetings have been held with PED advisories circulated as information becomes available. There has been good cooperation between the provincial pork organizations, swine health groups provincial CVO’s, CFIA and the veterinary community.

**Labour Challenges**

Labour attraction and retention continues to be a concern for Saskatchewan farms and the processing industry.

Sask Pork consulted with the Government of Saskatchewan to identify ways to improve the situation. To elevate the visibility of our producers to prospective employees, Sask Pork attended two jobs fairs in Regina and Saskatoon and promoted farms actively seeking employees.

**Transportation Quality Assurance (TQA®)**

This year Sask Pork held 14 TQA® certification training sessions with 71 attendees. The 2014 revision of the TQA® program allows for online training of some transporters. It also upgraded the animal handling section considerably.

**Livestock Emergency Response Units**

To help fill a void in the event of a transport livestock emergency, Sask Pork assembled and deployed two fully stocked units earlier this year.

These units are designed to provide equipment to help “first responders” with the extraction and temporary confinement of animals after a transport accident. The units are currently located at Humboldt and Moose Jaw.

Sask Pork will participate in first responders training sessions in the fall.
Saskatchewan Pork Industry Symposium - 2013

2013 marked the 36th year for Symposium. The annual event, held November 19-20 saw more than 200 in attendance over the two days.

Day 1 topics ranged from group sow housing and barn conversions to nutrition, swine health and interpreting the kill statement.

On Day 2, speakers focused on antibiotic use and stewardship, issues and challenges for the processing industry and Canada’s competitiveness in the global markets. We also delved into the interesting aspects of cross cultural communications in the workplace and practical information on recruiting employees from foreign countries.

The Honourable Lyle Stewart, Minister of Agriculture was guest speaker at our evening banquet.

Symposium Advisory Committee 2013

• Kim Browne, Sask Pork, Symposium Coordinator
• Murray Duggan, Fast Genetics
• Laura Eastwood, Prairie Swine Centre
• Henry Gauvreau, Warman Veterinary Services
• Neil Ketilson - Sask Pork
• Don Kolla - Cudworth Pork Investors Group
• Michel Lariviere - PIC Canada Ltd.
• Brad Marceniuik - Ministry of Agriculture
• Florian Possberg, B & F Polar Pork / Sask Pork
• David Tschetter, Star City Farming
• Paul Ulrich - Ulrich Pork Farms Ltd.
• Harvey Wagner - Sask Pork
• Lee Whittington - Prairie Swine Centre

Farmscape Radio Program

Farmscape, hosted by Bruce Cochrane, has been broadcasting for 17 years. Sask Pork and Manitoba Pork continue to co-sponsor the radio network airing in Manitoba, Saskatchewan and Alberta.

From the Farmscape desk...

“There has been a lot to report on over the last year. “By far the biggest story right now is Porcine Epidemic Diarrhea and the excellent job being done by Canada’s pork producers, shippers and processors to contain its spread. This issue has been forefront on the minds of all.

Lessons learned from circo continue to be applicable. Those interviewed have said the competitive difference in the export market is disease control and this disease we are dealing with now won't be the last.

Speaking of export markets, new trade deals have to top the list: Korea, Europe, and China. According to federal Agriculture Minister Gerry Ritz, it’s those markets and others that are helping maintain the value of Canadian pork and beef in the face of the hurt being caused by Country of Origin Labelling.

It was no surprise when the WTO announced the American government had not only reneged on trade deals it had made, but made the discrimination worse with its 2013 fix. The U.S. has an election coming up and one last appeal so it’s expected the issue will drag out to the end. The ball is in their court and Canada is prepared to move forward with tariffs.

There are lots of things happening in other areas, research, labour, communications.

Thank you to the experts who have shared their insight this year and our audience.”
Communications & Promotion

Agri-Education Program

We continue our involvement in provincial Agri-Ed events and with the assistance of the Prairie Swine Centre graduate students and volunteers, pork displays were manned in Lloydminster, Prince Albert, Saskatoon and Yorkton.

Agriculture in the City 2014

Sask Pork served as a commodity member of the planning committee for this year’s event held April 5th at the Mall at Lawson Heights in Saskatoon.

Attendance was higher than in 2013 with what seemed to be a lot more interest in animal care, pork production and modern farming practices.

Sask Pork organized the Cooking Demonstrations featuring radio personality and “foodie” Mark Loshack of Rock 102 FM who prepared delicious recipes using locally grown products.

Special guest speakers included greetings from the Government of Canada, by Brad Trost, MP for Saskatoon/Humboldt. Janice Tranberg, Assistant Deputy Minister of Agriculture, attended the event bringing greetings on behalf of the Ministry. Agriculture in the City was administered by and received funding from Agriculture and Agri-Food Canada with additional funding from the Saskatchewan Ministry of Agriculture and participating commodities.

Saskatchewan Ministry of Agriculture’s Pizza Farm Project - Moose Jaw, SK

Val Panko with the Government of Saskatchewan Agriculture Knowledge Centre coordinated the Ag Awareness project with assistance from local commodities.

The project was a Pizza Farm demonstration plot for students and the general public to see how food is grown and harvested. Students were given the opportunity to plant seeds and then return in the fall for the Harvest Day to gather all the ingredients they needed to make pizzas. The displays remained and were open to the public all summer.

The pork display featured new signage developed for this project that focused on the processing side with a life size market hog depicting primals, signage on the various pork cuts and nutrition information that tied to Health Canada’s Guide for Healthy Eating.

The display also included a live market hog courtesy of Thunder Creek Pork with Kaye Kronebusch of TCP on hand to host the display and educate the students on why we raise pigs and meat processing.

E-Forum Newsletter

Newsletters were published in August, December, March and June and distributed via email and regular mail.
Farm Animal Council of Saskatchewan “We Care” Billboard Campaign 2014

Sask Pork is pleased that Bryan and Tiffanie Possberg are featured as the 2014 Real Face of Farming pork producers for this year’s FACS billboard program. The campaign will be displayed over the year throughout Saskatchewan on billboards, buses and benches, in airports – even on the back of washroom doors!

2013 Awards of Distinction

Two awards were presented in 2013 at our annual Pork Industry Symposium banquet November 19.

PRODUCTION RESEARCH AWARD
Presented to
BRIAN ANDRIES, BSA
Manager, Prairie Swine Centre, Floral, SK

Lee Whittington, President and CEO of the Prairie Swine Centre presented the Production Research Award to Brian Andries.

Brian joined the Prairie Swine Centre (PSC) 35 years ago when the facility was a new pig barn, located on Floral Road and operated by the U of S College of Agriculture.

Since the beginning, PSC has begun a new project every 9 to 11 days and Brian has always been at the "centre" of what happens at the "Centre".

The operation is now known across Canada and beyond as the Prairie Swine Centre and Brian continues to manage the site and important research underway today.

Hurry Hog Curling Rink Decals

The ice decal program continues to be popular with the province’s curling clubs. While participation by the clubs is down over the past few years due to the smaller communities finding it difficult to find the staff to maintain the ice, we had 40 clubs participate in the 2013 season.
PRODUCTION EXCELLENCE AWARD
Presented to
SYLVIA MESZAROS
Barn Manager
Cudworth Pork Investors Group

Sylvia Meszaros has managed a 1200 sow farrow to finish multiplier unit for Cudworth Pork Investors Group for the last 19 years. She has made it her leadership statement to embrace a "lifetime of learning" and continues to lead a production team that consistently exceeds all production targets.

A capable and passionate team leader with a huge heart, Sylvia cares deeply about her staff, her pigs, CPIG, and everyone in her life. She is a very deserving recipient of this Award.

The high performance levels attained by CPIG is largely due to Sylvia's dedication and leadership skills in creating a winning team environment.

Communications & Promotion

Domestic Promotion

Canada Pork International’s Domestic Marketing Program will proceed and a director is currently being hired who will assume responsibility for the program in the fall. He will work with Michael Young to develop the national promotion strategy for processors, distributors and retailers.

Canada Pork, a newly created division of Canada Pork International, launches a National Pork Marketing Strategy this summer. Its mission is to improve the prosperity of the Canadian pork industry. This new initiative is overseen by the National Pork Marketing Committee of Canada Pork International, made up of industry members from the packer/processing sector and provincial hog producers associations.

More information available at www.canadapork.com

The new national PutPorkonYourFork website went live this summer with a fresh new look!

The Choose Canadian Label program will continue under the CPI Domestic program and not under Pork Marketing Canada. Sask Pork financially supported the program by contributing towards the printing of labels for retailers and processors for 2013-14. The retailers are being encouraged to incorporate the label into their own store labels to reduce the ongoing cost of this program.

In-Store Promotion

Sask Pork assisted Federated Co-Op by providing content and photos for a new in-store pork consumer guide. We also continue to work with them to support the Co-Op Raised at Home program.

TV Advertising / Sponsorship

Sask Pork has partnered with Rock 102 FM Radio Personality Mark “Shack” Loshack as co-sponsor of the television program “Cooked with Shack”. This 1/2 hour show offers cooking ideas for the average guy and can be seen across western Canada on Shaw Cable Video on Demand and in Saskatchewan on Shaw TV Channel 10.

In a fun and entertaining way, Shack shows how easy it is to cook great recipes with basic ingredients you find in your own kitchen. The show also features music from Shack’s sidekick and guitarist Harreson James and spotlights music from local bands.

Print & Web Advertising

Consumer ads appeared in Planet S and Prairie Dog Magazine featuring weekly barbecue recipes throughout the summer.

An ad and nutrition information was featured in the Regina Leader Post Nutrition Month feature in March 2013.

Sask Pork and Manitoba Pork partnered on a food-service related ad in the HyLife Foods Feature in Business Review Canada - April 2014

Great Saskatchewan Bacon Festival - Pork display and consumer resources - June 2014 - Kipling, SK

Saskatchewan Big Rig Show and Shine - Favel Trucking Moose Jaw, SK - July 5-6, 2014 Silver sponsor and door prize

Agriculture in the Classroom Oilseeds Invitational Golf Classic and Fundraiser - July 2014 - Silent Auction gift basket
2013/2014 was profitable year for Saskatchewan's pork producers. Several factors contributed to this, including the ongoing Porcine Epidemic Diarrhea (PED) outbreak in the U.S., which reduced hog supplies and subsequently has increased North American Hog Pricing. Lower feed costs as a result of a bumper crop in Saskatchewan, and a record 2013 U.S. corn crop helped to provide relief on the feed cost side. Finally, the Canada/U.S. exchange rate steadily declined over the course of the year, which also boosted hog prices. In hindsight, the year can be viewed as one where pretty much everything went right for producers, including keeping PED out of the province.

Between August 2013 and July 2014, index 100 hog prices in Saskatchewan averaged $193.64/ckg. This represents the highest hog price ever recorded in the province for this 12-month period, breaking the record of $186.02/ckg set in 1996/1997. To put this into perspective, Saskatchewan's 10-year average hog price is $139.22/ckg. Significant outbreaks of PED in the U.S. during the 2013/2014 winter caused high mortality in nursing pigs which ultimately resulted in 2-5% lower hog numbers. The expectation of smaller hog supplies along with strong demand for pork strengthened prices throughout the year.

Another factor which favoured producers this year was the Canada-U.S. exchange rate, which dropped from near par at 0.993 last year to an average of 0.932 in 2013/2014. This is the lowest that the exchange rate has been since 2008. A lower exchange rate supports prices, since Canadian hog prices are derived via formulas from U.S. markets. The importance of the exchange rate cannot be understated, as this alone probably contributed nearly $15/hog to each producer's bottom line.
Feed prices declined sharply from the record levels set last year, providing significant relief to producers. The largest contributing factor was a record breaking U.S. corn crop, where 13.9 billion bushels were produced, boosting feed supplies in North America, and pushing down prices for all grains. Similarly, Saskatchewan's grain producers enjoyed a bumper crop for the 2013 harvest. As a result, Saskatchewan feed wheat prices declined sharply by 42% to $148.71/tonne while feed barley prices increased 43% to $128.24/tonne, and feed peas increased 16% to $192.29/tonne from the previous year.

* Note: These are cash spot prices that a grain producer would receive at a Saskatoon elevator.
In 2013, a total of 84 producers marketed hogs produced at 159 active premises across the province. This is a decline of 6 producers over the previous year. Saskatchewan's producer base has remained relatively stable since 2010 when 99 producers marketed hogs.

*Note: These numbers are based upon checkoff data, and represent the number of producers/companies that produced hogs, not the number of production units or premises. In 2013 there were 159 active premises in Saskatchewan.

In 2013, Saskatchewan produced a total of 2,090,054 pigs, which was an increase of 28,447 animals from 2012. Feeder pig exports were the main contributor, up 22% to 331,572 pigs. Feeder pig prices were excellent this year due to feeder pig shortages in the U.S. due to PED. U.S. Isowean prices peaked in March, 2014, averaging US $68.05. Market hog production declined by 40,836 animals, while marketings of sows and breeding stock declined by 4,951 animals.

Checkoff data indicates that Saskatchewan produced 1,758,452 market hogs, cull sows, and breeding stock in 2013. In all, 220,014 animals produced in Saskatchewan were slaughtered locally in the province. Of the remainder, 952,126 were transported to Manitoba for slaughter, while 504,372 animals were transported to Alberta for slaughter, and 81,617 were exported to the U.S.
According to Statistics Canada, as of January 1, 2014 Saskatchewan's breeding herd numbered 93,000 sows and bred gilts. This is an increase of 3,900 (4.3%) over the previous year. Repopulation of existing sow units is the main catalyst for the increase. The entire Canadian herd increased by 4,800 sows in 2014, and now totals 1,192,800 animals.

The total number of pigs produced in Canada declined significantly in 2013. Eastern Canadian production decreased by 273,900 animals and stands at just over 13.3 million pigs, while western Canada's production declined by just over a million animals and sits at just over 12.3 million pigs. Saskatchewan remains the 5th largest pork producing province in Canada behind Manitoba, Quebec, Ontario, and Alberta.
In 2013, the total Canadian slaughter declined by 361,600 animals to 20.6 million animals. The bulk of the decline was in Ontario, which slaughtered almost 200,000 fewer animals.

In 2013, live hog exports from Canada to the U.S. were down. According to Agriculture and Agri-food Canada, approximately 3.9 million feeder pigs were exported from Canada to the United States in 2013, down 18% from the previous year. Canadian Market hog exports to the U.S. were 809,025, down by 72,991 animals from the previous year.

Management’s Responsibility

To Saskatchewan Pork Producers:

Management is responsible for the preparation and presentation of the accompanying financial statements, including responsibility for significant accounting judgments and estimates in accordance with Canadian accounting standards for not-for-profit organizations. This responsibility includes selecting appropriate accounting principles and methods, and making decisions affecting the measurement of transactions in which objective judgment is required.

In discharging its responsibilities for the integrity and fairness of the financial statements, management designs and maintains the necessary accounting systems and related internal controls to provide reasonable assurance that transactions are authorized, assets are safeguarded and financial records are properly maintained to provide reliable information for the preparation of financial statements.

The Board of Directors (the "Board") is composed entirely of Directors who are neither management nor employees of the Organization. The Board is responsible for overseeing management in the performance of its financial reporting responsibilities, and for approving the financial information included in the annual report. The Board fulfils these responsibilities by reviewing the financial information prepared by management and discussing relevant matters with management and external auditors.

Twigg & Company, an independent firm of Chartered Accountants, is appointed by the Board to audit the financial statements and report directly to the members, their report follows. The external auditors have full and free access to, and meet periodically and separately with, both the Board and management to discuss their audit findings.

Management                                     Management

SASK PORK ANNUAL REPORT 2013 - 2014
To the Board of Directors of Sask Pork.

Report on the Financial Statements
We have audited the accompanying financial statements of Sask Pork, which comprise the statement of financial position as at July 31, 2014 and the statements of operations, changes in net assets, cash flows, and schedule of travel expenses for the year ended July 31, 2014, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements
Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian accounting standards for not-for-profit organizations, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatements, whether due to fraud or error.

Auditors' Responsibility
Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about amounts and disclosures in the financial statements. The procedures selected depend on our judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, we consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

continued next page
Opinion
In our opinion, these financial statements present fairly, in all material respects, the financial position of Sask Pork as at July 31, 2014 and the results of its operations and cash flows for the year ended July 31, 2014 in accordance with Canadian accounting standards for not-for-profit organizations.

1. DESCRIPTION OF BUSINESS

Sask Pork is a producer managed organization operating programs and research for the development of the Saskatchewan pork industry and the promotion of hogs and pork produced in Saskatchewan. Sask Pork was established by the Pork Industry Development Plan Regulations pursuant to The Agri-Food Act, 2004. Sask Pork is subject to supervision by the Agri-Food Council members of which are appointed by the Government of the Province of Saskatchewan.

The Pork Industry Development Plan Regulations allow Sask Pork to set and collect non-refundable check-offs from any person engaged in the marketing of hogs in Saskatchewan. As of January 1, 2003 the hog check-off is $0.75 per hog. As of January 1, 2005 a check-off of $0.20 per hog for all hogs less than 100 lbs. and $0.75 on all breeding stock exported from Canada was implemented.

Sask Pork is exempt from income taxes in accordance with Section 149 of The Income Tax Act.

2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with Canadian accounting standards for not-for-profit organizations in Part III of the CICA Handbook and include the following significant accounting policies:

(a) Financial instruments:

The Organization initially measures its financial assets and financial liabilities at fair value. It subsequently measures all its financial assets and financial liabilities at amortized cost, except for investments in equity instruments that are quoted in an active market, which are measured at fair value. Changes in fair value are recognized in the statements of operations in the period incurred.

Financial assets subsequently measured at amortized cost include cash and accounts receivable. Financial liabilities subsequently measured at amortized cost include accounts payable and deferred contributions and revenue. The fair value of the cash, accounts receivable, and accounts payable approximates their carrying value due to their short-term nature.

(b) Cash and cash equivalents:

Cash is comprised of cash on hand.

Short-term investments are composed of guaranteed investment certificates. They qualify as cash equivalents as they are short term, highly liquid investments, that are readily convertible to a known amount of cash and which are subject to an insignificant risk of changes in value. Short-term investments subject to restrictions that prevent their use for current purposes are included in restricted investments.
2. SIGNIFICANT ACCOUNTING POLICIES (continued)

(c) Capital assets:

Sask Pork capitalizes all assets with a cost over $1,500. Capital assets are stated at cost. Amortization is computed using the straight line method at rates calculated to amortize the cost over their estimated useful lives at the following rates:

- Computer equipment: 3 years
- Furniture and equipment: 3-5 years
- Leasehold improvements: 3 years

(d) Revenue recognition:

Hog check-off revenue is recognized using the accrual basis in conjunction with delivery of producer’s product.

Sask Pork follows the deferral method of accounting for contributions. Restricted contributions are recognized as revenue in the year in which the related expenses are incurred or restrictions met. Unspent amounts are included in deferred contributions. Unrestricted contributions are recognized as revenue when received or receivable if the amount to be received can be reasonably estimated and collection is reasonably assured.

Recognition of grants related to capital assets is deferred to periods when the related capital assets are amortized.

Revenues for conference fees are recognized upon completion of the conference.

Interest and investment revenue is recognized when earned.

(e) Research funding expenses:

Research funding expenses are recognized when projects are approved and the recipient has met eligibility criteria. Funds advanced to recipients prior to eligibility criteria being met are recorded as advances.
2. SIGNIFICANT ACCOUNTING POLICIES (continued)

(f) Contributions in-kind:

Contributions in-kind are recorded at fair value for goods or services used in the normal course of operations that would otherwise have been purchased.

(g) Use of estimates:

The preparation of financial statements in conformity with Canadian accounting standards for not-for-profit organizations requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. These estimates and assumptions are reviewed periodically and, as adjustments become necessary, they are reported in excess of revenues and expenses in the periods in which they become known.

The application of the Organization’s accounting policy for deferred contributions and revenue requires judgment in determining whether a particular item meets the criteria for recognition as revenue or deferred contributions.

3. CAPITAL ASSETS

The capital assets balance consists of the following:

<table>

</tr>
</tbody>
</table>
5. DEFERRED CONTRIBUTIONS AND REVENUE

Sask Pork receives funding to administer the Porcine Epidemic Diarrhea (PED) prevention and preparedness program. The PED prevention and preparedness program provides funding for the monitoring of transport trucks for contamination with PED virus, contingency planning for the Saskatchewan swine industry in the event of PED incursion into the provincial herd and to assist with response activities to prevent any spread of the disease from the first farm(s) confirmed to have PED in Saskatchewan.

Sask Pork receives funding from the Saskatchewan Ministry of Agriculture to be held, administered and distributed in accordance with the related Saskatchewan Swine On-Farm Biosecurity program funding agreement. The Saskatchewan Swine On-Farm Biosecurity program provides funding to producers in order to mitigate the risks associated with Porcine Epidemic Diarrhea (PED) to herds in Saskatchewan. The cost of equipment purchase and assessments by veterinarians (one visit) are to be paid from this funding.

</table>
6. INTERNALLY RESTRICTED NET ASSETS

Sask Pork’s Board of Directors have internally restricted net assets of $1,000,000 as a reserve for future operating expenses.

7. RESEARCH COMMITMENTS

Prairie Swine Centre Inc.

Effective January 1, 2011 Sask Pork agreed to provide an annual contribution of $275,000 to the Prairie Swine Centre Inc. The annual contribution is provided for the core funding of the Prairie Swine Centre. In addition to the annual contribution in the current year $13,750 has been paid to the Prairie Swine Centre Inc. which represents the second year of a five year funding commitment for the salary of the Chair in Animal Welfare. The amounts that Sask Pork has committed to pay to PSCI are as follows:

</tbody>
</table>

10. FINANCIAL INSTRUMENTS

The Organization as part of its operations carried a number of financial instruments. It is management’s opinion that the Organization is not exposed to significant interest, currency or credit risks arising from these financial instruments except as otherwise disclosed.

Risk management policy

The Organization, as part of operations, has established a minimization of credit risk policy as its risk management objective. In seeking to meet this objective, the Organization follows a risk management policy approved by its Board of Directors. The collection of accounts receivable is monitored by the Financial Administrator in conjunction with contacting slaughter plants to ensure collection of the hog check-off is made on a timely basis.

Credit concentration

As at July 31, 2014, four customers accounted for 74.64% (67.67% - 2013) of accounts receivable, representing the Organization’s maximum credit risk exposure. The Organization believes that there is no unusual exposure associated with the collection of these receivables. The Organization manages its credit risk by performing regular credit assessments of its customers and provides allowances for potentially uncollectible accounts receivable. Most of the accounts receivable were collected shortly after year-end.
10. FINANCIAL INSTRUMENTS (continued)

Interest rate risk

Interest rate risk is the risk that the value of a financial instrument might be adversely affected by a change in the interest rates. Changes in market interest rates may have an effect on the cash flows associated with some financial assets and liabilities, known as cash flow risk, and on the fair value of other financial assets or liabilities, known as price risk. The Organization is not exposed to significant interest rate risk on its investments.

Liquidity risk

Liquidity risk is that the Organization will encounter difficulty in meeting obligations associated with financial liabilities. The Organization enters into transactions to purchase goods and services on credit and lease office equipment and office space from creditors, for which repayment is required at various maturity dates. Liquidity risk is measured by reviewing the Organization’s future net cash flows for the possibility of a negative net cash flow. The Organization manages liquidity risk resulting from accounts payable and accrued liabilities by investing in liquid assets such as cash and short-term investments which can be readily available to repay accounts payable and accrued liabilities.

11. CAPITAL MANAGEMENT

The Organization has no formal capital management policy however the Board of Directors conducts an annual budgeting and strategic planning meeting. The Organization has no externally imposed capital requirements.

12. BUDGET

The budget for 2013/2014 was approved by the Board of Directors on June 25, 2013.

Auditors’ Report

To Saskatchewan Pork Producers:

We have made an examination to determine whether Sask Pork complied with the provisions of the following legislative and related authorities pertaining to its financial reporting, safeguarding agency resources, spending, revenue raising, borrowing and investing activities during the year ended July 31, 2014.

- The Agri-Food Act, 2004
- The Agri-Food Regulations, 2004
- The Pork Industry Development Plan Regulations, 2013

Our examination was made in accordance with the Canadian generally accepted auditing standards and, accordingly, included such tests and other procedures as we considered necessary in the circumstances.

In our opinion, Sask Pork has complied, in all significant respects, with the provisions of the aforementioned legislative and related authorities during the year ended July 31, 2014.

October 14, 2014
Saskatoon, Saskatchewan

Chartered Accountants
Independent Auditors’ Report

To Saskatchewan Pork Producers:

We have audited Sask Pork’s control as of July 31, 2014 to express an opinion as to the effectiveness of its control related to the following objectives:

(1) To safeguard agency resources. That is, to ensure its assets are not lost or used inappropriately; to ensure it does not inappropriately incur obligations; to establish a financial plan for the purposes of achieving it financial goals; and to monitor and react to its progress towards the objectives established in its financial plan.

(2) To prepare reliable financial statements.

(3) To conduct its activities following laws, regulations and policies related to financial reporting, safeguarding agency resources, revenue raising, spending, borrowing and investing.

Management’s Responsibility
The Organization’s management is responsible for maintaining effective control over the objectives stated above.

Auditors’ Responsibility
Our responsibility is to express an opinion based on our audit as to the effectiveness of its control related to the following objectives:

(1) To safeguard agency resources. That is, to ensure its assets are not lost or used inappropriately; to ensure it does not inappropriately incur obligations; to establish a financial plan for the purposes of achieving it financial goals; and to monitor and react to its progress towards the objectives established in its financial plan.

(2) To prepare reliable financial statements.

(3) To conduct its activities following laws, regulations and policies related to financial reporting, safeguarding agency resources, revenue raising, spending, borrowing and investing.

(continued on next page)
Independent Auditors’ Report

To Saskatchewan Pork Producers:

We used the control framework developed by The Canadian Institute of Chartered Accountants (“CICA”) to make our judgments about the effectiveness of Sask Pork’s control. We did not audit certain aspects of control concerning the effectiveness, economy and efficiency of certain management decision-making processes.

The CICA defines controls as comprising those elements of an organization that, taken together, support people in the achievement of the organization’s objectives. Control is effective to the extent that it provides reasonable assurance that the organization will achieve its objectives.

We conducted our audit in accordance with the standard for audits of internal control over financial reporting set out in the CICA Handbook - Assurance. This standard requires that we plan and perform the audit to obtain reasonable assurance as to effectiveness of Sask Pork’s control related to the objectives stated above. An audit includes obtaining an understanding of the significant risks related to these objectives, the key control elements and control activities to manage these risks and examining, on a test basis, evidence relating to control.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Control can provide only reasonable and not absolute assurance of achieving objectives reliably for the following reasons. There are inherent limitations in control including judgement in decision-making, human error, collusion to circumvent control activities and management overriding control. Cost/benefit decisions are made when designing control in organizations. Because control can be expected to provide only reasonable assurance, and not absolute assurance, the objectives referred to above may become ineffective because of changes in internal and external conditions, or that the degree of compliance with control activities may deteriorate.

Opinion
In our opinion, based on the limitations noted above, Sask Pork’s control was effective, in all material respects, to meet the objectives stated above as of July 31, 2014 based on the CICA criteria of control framework.
To Saskatchewan Pork Producers:

(continued from previous page)

We have also audited, in accordance with Canadian generally accepted auditing standards, the financial statements of Sask Pork, which comprise the statement of financial position as at July 31, 2014, and the statements of operations, change in net assets, cash flows, and schedule of travel expenses for the year then ended, and a summary of significant accounting policies and other explanatory information. We have issued our report dated October 14, 2014 which is the same date as the date of the report on the effectiveness of internal controls.

October 14, 2014
Saskatoon, Saskatchewan

Chartered Accountants
Independent Auditors’ Report

To Saskatchewan Pork Producers:

We have examined the financial statements of Sask Pork for the year ended July 31, 2014 and have issued our report thereon dated October 14, 2014. We have examined the system of internal control as at July 31, 2014 and have issued our report to you dated October 14, 2014. We have also made an examination to determine whether Sask Pork complied with specified legislative and related authorities pertaining to its financial reporting, safeguarding agency resources, spending, revenue-raising, borrowing and investing activities during the year ended July 31, 2014 and have issued our report to you dated October 14, 2014.

Our examinations were made in accordance with Canadian generally accepted auditing standards, and accordingly included such tests and other procedures as we considered necessary in the circumstances. In those instances, if any, that our study and evaluation of internal control disclosed conditions indicating that internal controls were inadequate or not complied with, substantive tests were performed to detect any case in which:

1) any officer or employee of Sask Pork has willfully or negligently omitted to collect or receive public money belonging to the Crown;
2) there has been a deficiency or loss to the Crown through the fraud, default or mistake of any person;
   and
3) an expenditure was made which was not properly vouchered or certified.

During the course of these examinations, nothing came to our attention that would indicate to us that:

1) any officer or employee of Sask Pork has willfully or negligently omitted to collect or receive public money belonging to the Crown;
2) there has been a deficiency or loss to the Crown through the fraud, default or mistake of any person;
   and
3) an expenditure was made which was not properly vouchered or certified.
