Admiralty Audubon Pipings
AAS Birding May & June 2022

Please note that Trip Leaders set their own requirements with regard to reservations, number of attendees, masking, or vaccination status for participation. Contact the Trip Leader of each walk for more information.

First Friday at Fort Townsend State Park
May 6, 2022, 8:30 AM -11:00 AM
Beverly McNeil is offering bird walks at Fort Townsend State Park. These walks will take 2 to 3 hours and include walking approximately 1.5 miles to look for shorebirds and birds in the woods along the bluffs. Please wear sturdy shoes/boots and extra jacket in case of weather changes. Bring binoculars and your own water. Group size is limited to five, and you need to email Beverly to register. We meet at the parking area just down to the left of where you register to camp. Meeting time is 8:30AM. You will need your Discover Pass. Please also notify Beverly if you cannot make it to the outing so that someone else can take your place. Social distancing and full vaccinations are required. Contact Beverly at Bevybirds53@gmail.com.

Bird walk at Cape George road trailhead parking - Larry Scott trail
Saturday, May 14, 2022, 9:30 AM -11:30 AM
The Spring migrants will be singing. Bring your binoculars and dress for the weather. Limit of 10; you must be vaccinated. Reserve your space with Paula Vanderheul at 360-774-2479 or pvanderheul@gmail.com.

Third Friday at Anderson Lake State Park
Friday, May 20, 2022
8:30 AM -11:00 AM
Limit of 5 for each outing and you must be vaccinated. Meet at the very first parking area as soon as you leave the pavement off of Lake Anderson Road before the white gate. Meeting time 8:30 AM. Wear clothing for changeable weather, sturdy shoes/boots, binoculars, water, snack optional. Expect to walk about 1.5 miles, including a little uphill, for 2 to 3 hours depending on sightings. We normally go around the whole lake on Trail B. Anderson Lake State Park (map). You will need a Discover Pass. Reserve your space at Bevybirds53@gmail.com. Beverly McNeil, Audubon Trip Leader, Nature Photographer.

Biriding by Ear Along the Larry Scott Trail
Saturday, May 21st, 2022, 8:30 AM - 11:30 AM
Meet at the Milo Curry Parking Lot near Four Corner - off of Discovery. This will be a stumble-free slow walk along the paved Larry Scott Trail deciphering all the myriad bird songs. We should get good views as well. This is such a rich time to bird as the full contingent of resident and migratory birds are busy with their lives and oblivious to birders and their peering binoculars. Limit of 12 people; vaccinations required. Contact Monica Fletcher: monicaflet@gmail.com or by phone 360-379-3136.

First Friday at Fort Townsend State Park
Friday, June 3, 2022, 8:30 AM -11:00 AM
Beverly McNeil is offering bird walks at Fort Townsend State Park. A Hidden Gem of Bird Richness
Saturday June 4, 2022, 8:30 AM - 12 PM
Meet at the Port Townsend Park and Ride on Sims Way to carpool if willing. We will go birding in the varied landscape of the Morningtide Open Space on Marrowstone Island. This little gem of wetland, grassland, and forest has produced many a happy bird sighting in the few years it has been open to the public. There is rough terrain on narrow trails. We will meet at the Park and Ride and carpool over together if folks are willing to do that. I will provide directions if not. Limit of 12 people; vaccinations required. Contact Monica Fletcher: monicaflet@gmail.com or by phone 360-379-3136.

(continued on page 2)
Meet at the parking area near the restrooms. Bring your binoculars as we'll be looking for spring migrants such as warblers, flycatchers, swallows, Osprey and more. Discover Pass required. Limit of 10; you must be vaccinated. Reserve your space with Paula Vanderheul at 360-774-2479 or pvanderheul@gmail.com.

Third Friday Bird Walk at Anderson Lake State Park
June 17, 2022, 8:30 AM -11:00 AM
Limit of 5 for each outing and you must be vaccinated. Meet at the very first parking area as soon as you leave the pavement off of Lake Anderson Road before the white gate. Meeting time 8:30 AM. Wear clothing for changeable weather, sturdy shoes/boots, binoculars, water, snack optional. Expect to walk about 1.5 miles, including a little uphill, for 2 to 3 hours depending on sightings. We normally go around the whole lake on Trail B. Anderson Lake State Park. You will need a Discover Pass. Reserve your space at Bevybirds53@gmail.com. Artemis Celt died on Easter weekend, 2022. That statement still seems impossible. The photo files for our chapter have hundreds of photos by Artemis from her very first ones in 2014 to January 2022. Birds, yes, but also landscapes, flowering plants and trees and mushrooms and butterflies and more. She photographed the first confirmed sighting of an American Pipit at Kah Tai.

Her obituary in the Leader said nothing and everything about her. We received no mundane life details (born, raised, educated) but much about who she was and how she interacted with the world. To quote its final paragraphs:

*Artemis was great fun with a great laugh. She was a loyal sister, cousin, and friend, speaking her truth and wanting to know yours. She was a gift-giver par excellence. She had dreams of peace and harmony on earth, tried hard not to be shattered when they seemed so far away.*

*Lots of us have recently had exquisite experiences with birds and other animals which we can’t help but think were Artemis’s way of saying goodbye (and hello!) and that she is free and capable of great magic. We are grateful for that, but boy do we miss her!*

Plants for Birds

Our chapter participation in National Audubon’s Plants for Birds effort led to a modest grant to develop the native gardens along the front walk at Salish Coast Elementary. If you would like free advice about native plants for our area, please contact Ron Sikes, b1rdbrush@gmail.com. Ron is our chapter representative for the program. You can learn more at https://www.audubon.org/PLANTSFORBIRDS.

Volunteers Needed for Pigeon Guillemot Surveys in East Jefferson County June-August 2022

Become a guillemot guardian! We are looking for bird- and beach-loving volunteers to help monitor breeding colony status in a region-wide survey of Pigeon Guillemots sponsored by the Salish Sea Guillemot Network (http://www.pigeonguillemot.org/).

Prior bird-watching experience preferred; you must be willing to follow established survey protocols using your own binoculars. A minimum commitment of 1 hour per week for 10-12 weeks is required. Training will be provided virtually and in the field where appropriate. Please email Dr. Brenda Johnson at bsjohnson1@icloud.com if interested, using “Pigeon Guillemot Surveys” in subject line.

photos p.4 from top: Native honeysuckle, tall mahonia and serviceberry, all welcome plants for birds.

p.5: Two of five Purple Martins at the Point Hudson nest boxes on April 28, 2022. Earlier in the day, only a starling had been there.

May and June herald the arrival of spring migrants who set up territories and nest, and also the departure of many seabirds and ducks that breed much farther north. Some birds are merely passing through on their way north — turkey vultures have been a common sight last month and will continue to be seen. Our winter companion seabirds such as Ancient Murrelet, Common Murre, and Pigeon Guillemot become much less numerous as most head north to breeding grounds. Our huge winter diversity of ducks - wigeon, bufflehead, etc. head north to Canada’s welcoming wetlands. We still retain breeding Mallard and Ruddy Duck and we welcome back Wood Ducks from further south. We also have Pied-billed Grebe nesters at Kah Tai Lagoon. The month of May still has some late fly-overs of Cackling, Canada Geese and Greater White-fronted Geese so keep listening for them and looking skywards. If you want Brant Geese in your life, Point Hudson may still have a few stragglers in May.

The real news of course in these months is the arrival of migrant smaller birds, some from tropical climes, some from just south of us. We’ve already seen the return of most species of our summer swallows and the Rufous Hummingbird. We will be getting Purple Martin in noticeable loud return and the similar looking Vaux’s Swift that will be flying very high in small numbers across the county.

The noticeable noise of territorial bird song comes to our woods as these winter-quiet places host nesting neo-tropical migrants that have arrived from their Central American wintering grounds. New songs abound from the Warbling Vireos, House Wrens, Townsend’s Solitaires, Swainson’s Thrush, MacGillivray’s Warbler (Larry Scott Trail near Four Corners is a good locale) Black-throated Gray Warbler, Wilson’s Warbler, Olive-sided Flycatcher, Western Wood-pewee and Pacific and Hammond’s Flycatchers. In the grasslands at Point Wilson, or the farm country west of Port Townsend along Hastings Avenue, are Savannah Sparrows nesting and buzzing their calls. Wetland area birds, in addition to five species of swallow and Wood Ducks, include the Willow Flycatcher and Yellow Warbler at places like Anderson Lake.

There may be a few more sightings of shorebirds as they continue to pass through. North Beach and East Beach on Marrowstone Island host Whimbrel and Dunlin; Oak Bay and Point Hudson can serve good numbers of Black Turnstone, Western Sandpiper, and Sanderling. Semi-palmated Plover hangs at the beach wrack south of the Boat Haven. Rarer visitors in May can be Pectoral Sandpiper at Marrowstone Point wetlands, and even a rare bird alert for Solitary Sandpiper can be expected. These shorebirds will clear out by June.

A secretive, rare bird is the Sora - a rail of wetland lakes in the area. Listen for their extraordinary cascading call. The Sora breeds in our area, so will be around in spring and summer.

A really interesting armchair activity right now is to consult the Ebird website out of Cornell University. Here is a sequence of to-be-clicked headings at that site that will take you to wonderful, colorful, date-tied maps of where birds are, and in what abundance, on their migrational routes: On the homesite of Ebird (ebird.org) click “Science,” choose “Ebird Status and Trends,” click the link in the “Bird Abundance-mapped” paragraph “Learn more about abundance maps,” scroll all the way down to the link “Explore abundance maps” and click that. The page shows a chart of all the birds, and in the top right is a search symbol that allows you to choose the migratory bird of interest, e.g black-headed grosbeak. Arrayed there are wonderful visuals that let you predict when you will be seeing our regular avian tourists. And these visitors do not take up any parking spaces downtown.

Donation Receipts for Tax Purposes

Just a reminder to our very generous members: who include additional donations with their dues. Remember that your dues also count as a donation. The IRS does not require taxpayers to submit a receipt with their taxes for individual donations under $250.

If you are one of our members and you want a receipt for your donation of any amount, please email or call Ron Sikes, our chapter secretary, and he will send one by email or postal mail. Ron will automatically send a tax receipt for donations of $250 or more as required by the IRS. Please contact Ron at b1rdbrush@gmail.com or 360-385-0307.
