The BMW X5 has been setting milestones in its class – a class of which it was the founding member. The third generation X5 has again surpassed its own benchmarks – as a Sports Activity Vehicle (SAV) that delivers outstanding luxury and unparalleled comfort in every regard and never fails to exceed expectations.

It features a huge array of intelligent technologies that take efficiency and dynamism (not to mention comfort and safety) to a whole new level – even when it goes off-road. Whether you want to make a powerful impression, or prefer a look of understated sophistication, there are plenty of design options for expressing your own personal style through the exterior and luxurious interior. The striking curves on the BMW X5 signify a personality that never fails to announce its one overriding attribute: supremacy.

Note: The exterior specifications of these models are not available for the UK market.

Specification of model shown:
BMW X5 xDrive50i SE with Pure Experience Exterior Design and Pure Excellence Interior Design package.

Engine: BMW TwinPower Turbo eight-cylinder petrol
Power output: 449hp (330kW)
Wheels: 19” light alloy Star-spoke style 449
Exterior colour: Sparkling Brown metallic
Upholstery: Exclusive Nappa leather
Interior trim: American Oak, High-gloss

Specification of model shown:
BMW X5 xDrive30d SE with Pure Excellence Exterior Design and Pure Experience Interior Design package.

Engine: BMW TwinPower Turbo six-cylinder in-line diesel
Power output: 258hp (190kW)
Wheels: 19” light alloy Multi-spoke style 448
Exterior colour: Mineral White metallic
Upholstery: Exclusive Nappa leather
Interior trim: Fineline Pure textured wood

Editorial

DESIGNED TO OUTDO ITSELF. YET AGAIN.

Since its launch, the BMW X5 has been setting milestones in its class – a class of which it was the founding member. The third generation X5 has again surpassed its own benchmarks – as a Sports Activity Vehicle (SAV) that delivers outstanding luxury and unparalleled comfort in every regard and never fails to exceed expectations.

It features a huge array of intelligent technologies that take efficiency and dynamism (not to mention comfort and safety) to a whole new level – even when it goes off-road. Whether you want to make a powerful impression, or prefer a look of understated sophistication, there are plenty of design options for expressing your own personal style through the exterior and luxurious interior. The striking curves on the BMW X5 signify a personality that never fails to announce its one overriding attribute: supremacy.

www.bmw.co.uk/X5

In 2016 the BMW brand celebrated its 100th anniversary. Find out more at www.next100.bmw
LUXURY
WITH
PERSONALITY.
Every day presents different challenges. The BMW X5 has what it takes to tackle just about anything: versatility. Its two-part tailgate provides easy access to smaller items of luggage and the lower section opens up to create a platform capable of supporting up to 250kg. The rear seat backrest can be split in a 40:20:40 configuration and when it’s completely folded down the luggage compartment capacity is increased to a massive 1,870 litres. The optional third row of seats can accommodate two additional passengers, so there’s room for up to seven people. In short: the BMW X5 has a clever solution for whatever challenge comes its way.

Just as impressive as the BMW X5 is the latest incarnation of the iconic BMW R 1200 GS travel enduro motorcycle. Tough, dynamic and unmistakable – this machine’s innovative design and cutting-edge technologies make it the most reliable companion for biking adventures on all kinds of terrain.
The very first moment you come face-to-face with the BMW X5, your eyes will be instinctively drawn to its compelling design. Its expressive front with optional Adaptive LED Headlights and the athletic side contours generate a masculine look that’s beyond compare. No matter when and where you encounter the BMW X5, one thing is certain – its exclusive appearance will take your breath away.

REIGN SUPREME.

Exterior specification not available for the UK market.
All the expectations aroused by the masterly presence of the BMW X5 will be confirmed and surpassed when you see it in action. From supremely sporty or comfortable, three Adaptive suspension options ensure optimal contact with the road in every driving situation. When combined with the intelligent BMW xDrive all-wheel-drive system, the BMW X5 delivers an unforgettable driving experience regardless of the road surface or weather conditions, all while providing outstanding safety and the ultimate in driving pleasure. And it doesn’t matter which direction you’re headed, as the BMW X5 knows one way to go: its own.
In the cockpit of the BMW X5, all the controls, such as the iDrive Touch Controller, are fully geared towards the driver and the overall clarity of the design is a pleasure to behold. The various BMW ConnectedDrive Driver Assistance systems are clearly focused on one overriding goal: your comfort and safety. Should you find yourself stuck in a traffic jam, for instance, optional Traffic Jam Assist assumes control of the vehicle, automatically moving forward, maintaining a safe distance to the car in front whilst actively providing steering input. After all, sometimes you just need to sit back and relax to really take charge.

SIT DOWN AND RISE ABOVE IT ALL.
Wind resistance is no match for the sophisticated aerodynamics of the BMW X5. The car’s designers came up with innovative features that greatly improve the air flow. For example, wind turbulence at the front wheel arches is significantly reduced thanks to the Aero Curtain on the front apron and the Air Breather in the front wheel arches. Aerodynamically enhanced exterior mirrors and Air Blades on the rear also play a role in delivering the lowest drag coefficient (Cd) value in its class. Technologies such as these have enabled the BMW X5 xDrive50i to rewrite the rulebook when it comes to EfficientDynamics – with a Cd value of 0.34.
When you take a seat in the BMW X5, one thing becomes instantly clear: perfection is the culmination of an unerring attention to detail. The overall sense of spaciousness in the BMW X5 is particularly impressive, as are the meticulously selected premium materials and excellent craftsmanship. Furthermore, the BMW X5 is also available with an optional third row of seats. Opulence has found a new home: where the aroma of exquisite leather meets the haptic pleasure of elegant wood. Combined with the striking atmosphere generated by the standard ambient lighting, you’ll enjoy a supremely exclusive interior. And the optional B&O Advanced audio system takes perfection to a whole new level. The BMW X5 offers a feast for the senses, no matter where you decide to sit.
As a plug-in hybrid model, the BMW X5 xDrive40e iPerformance affords equal prominence to athletic design and sustainability. Its intelligent drive concept combines a BMW TwinPower four-cylinder petrol engine with BMW eDrive components: The interplay between the electric motor, high-voltage lithium-ion battery and intelligent energy management ensures efficient driving pleasure which produces zero local emissions when powered exclusively by electricity. The intelligent BMW xDrive all-wheel drive continuously provides the optimal traction and agility, even when driven in the electric mode. To ensure that it’s always fully powered-up, conveniently charge your BMW at home with the charging cable provided via any domestic power socket or using your very own BMW Wallbox. And while on the go, public charging points allow you to quickly fill it up with new energy. Experience a whole new dimension in the fusion of breathtaking dynamics and ultimate efficiency – in the BMW X5 with eDrive.
BMW ConnectedDrive

**MORE THAN 20 SERVICES IN THE BMW CONNECTED DRIVE STORE.**

Enjoy the greatest convenience and the highest level of safety with BMW ConnectedDrive. For driving, parking and visibility, the BMW ConnectedDrive driver assistance systems are there when you need them, reliably, in every situation. The most cutting-edge systems, such as radar, ultrasound and cameras, dependably register the vehicle’s surroundings, forming the basis for intelligent driver assistance systems. Whether activated when desired, or as emergency assistance in the background – the assistance systems from BMW ConnectedDrive make every drive in your BMW safer and more convenient.

Focused on the future – from the very beginning. By the 1970s, BMW had already made headway in connected mobility. Another milestone of the digital future was surpassed in 1999 with vehicles with built-in SIM cards. Then came the first online services, Google Services and innovative driver assistance systems such as BMW Head-up Display. Throughout this process, the desires of the customer have always taken centre stage. As the first premium automobile manufacturer, BMW makes it possible to book and pay for services flexibly via the BMW ConnectedDrive Store, in the vehicle or on a computer at home. With the introduction of BMW Connected and the Open Mobility Cloud, BMW is taking the next steps into the future of mobility.

**CONNECTED FOR OVER 40 YEARS.**

ConnectedDrive Services forms the basis for intelligent BMW ConnectedDrive functions, as well as for the integration of selected smartphone apps. This equipment also provides access to the BMW ConnectedDrive Store, in which services and apps can be ordered or extended any time and anywhere to suit the user’s individual requirements – for example with Concierge Service or Drive Entertainment, which can turn every drive into a convenient and entertaining experience.

**FOR OVER 360 DEGREES OF THE VEHICLE’S SURROUNDINGS.**

BMW ConnectedDrive will inform users of recommended departure times via a compatible smartphone or smartwatch to ensure they arrive at their next destination on time. The system calculates the suggested departure time based on real-time traffic data.

**TIME-TO-LEAVE NOTIFICATION**

BMW Connected is a personal mobility assistant which facilitates your everyday mobility and aids you in reaching your destinations relaxed and on time. With the BMW Connected app, mobility-relevant information such as recommendations for optimal departure times are available via a smartphone or smartwatch and can be seamlessly transmitted to the car.

**BMW HEAD-UP DISPLAY**

The full-colour BMW Head-up Display projects information relevant to the journey directly into the driver’s field of vision, thereby allowing them to fully concentrate on driving. The display includes information such as the current speed, navigation directions, Speed Limit Info including no-overtaking indicator, along with telephone and entertainment lists. (Image shows additional optional equipment).

**IN TOUCH 24/7 WITH BMW CONNECTED.**

What would it be like if you were never late again? What if your BMW already knew your preferred destinations? How would you like reliable navigation, whether you’re sitting in your vehicle or not? BMW Connected provides you with the information you need, when and where you want it. BMW Connected is a personal mobility assistant which facilitates your everyday mobility and aids you in reaching your destinations relaxed and on time. With the BMW Connected app, mobility-relevant information such as recommendations for optimal departure times are available via a smartphone or smartwatch and can be seamlessly transmitted to the car.

**CONCIERGE SERVICE**

Concierge Service connects the driver to a BMW Call Centre agent at the push of a button. The agent can locate a particular restaurant, the nearest cash dispenser or an emergency pharmacy and send the address details directly to the BMW Navigation System.

**DRIVING ASSISTANT PLUS**

Driving Assistant Plus includes camera-based features Forward Collision Warning, Lane Departure Warning, City Collision Mitigation and Preventive Pedestrian Recognition, along with the radar-based Active Cruise Control with Stop and Go function. Driving Assistant Plus enhances driving safety and comfort when driving on motorways and in town with its range of intelligent driver assistance features.

**IN TOUCH WITH BMW CONNECTED.**

BMW EfficientDynamics includes not only the engine and drivetrain, but rather the whole vehicle concept, including intelligent energy management. Provided as standard in every BMW, a variety of innovative technologies contribute to continuously improving efficiency. Via engine efficiency measures, electrification, lightweight construction methods and optimised aerodynamics, BMW has managed to reduce the CO₂ emissions of its fleet by 33% since 2000.

MORE POWER FROM LESS FUEL.

More power from three to twelve cylinders. Consume less, experience more – the BMW TwinPower Turbo engines offer the greatest possible dynamic performance with the greatest possible efficiency thanks to the newest injection systems, variable output control and sophisticated turbocharger technology. Whether diesel or petrol, and no matter how many cylinders, the engines from the BMW EfficientDynamics engine family allow more agile power delivery and outstanding responsiveness even at low rpms, while being fuel-efficient and low in emissions.

MORE DRIVING PLEASURE, LESS EMISSIONS.

BMW EfficientDynamics includes not only the engine and drivetrain, but rather the whole vehicle concept, including intelligent energy management. Provided as standard in every BMW, a variety of innovative technologies contribute to continuously improving efficiency. Via engine efficiency measures, electrification, lightweight construction methods and optimised aerodynamics, BMW has managed to reduce the CO₂ emissions of its fleet by 33% since 2000.

MORE SPEED, LESS WEIGHT.

Lower weight with intelligent lightweight construction. Special consideration for every last detail – intelligent lightweight construction means that the optimal material is found and implemented for each part of the vehicle. With extremely light high-tech materials such as aluminium and carbon fibre, BMW EfficientLightweight is pursuing the goal of minimising vehicle weight. That leads to even more dynamic performance, increased stability and heightened vehicle safety and comfort.

MORE ENERGY, LESS PETROL.

100% driving pleasure with 0% local emissions: BMW eDrive technology makes this dream come true. Energy for electric driving is supplied by a high-voltage lithium-ion battery and maximised by numerous efficiency measures such as Brake Energy Regeneration. The completely new synchronous electric motor BMW has developed for BMW eDrive provides plentiful torque for acceleration, available all the way to the car’s maximum speed, to combine sustainable mobility with outstanding agility and dynamic performance.

BMW EfficientLightweight

An array of high-tech materials are used to construct the BMW X5, including light materials such as aluminium in the suspension and front of the car, high-strength steel in the car body, as well as state-of-the-art plastics and magnesium. These solutions from BMW EfficientLightweight lower the weight of various parts and make the car body incredibly rigid, improving passive safety for the driver and passengers. The balanced weight distribution between the front and rear axles also enhances driving dynamics.

AERODYNAMICS

Thanks to optimised aerodynamic features, every BMW boasts an excellent drag coefficient. This has a positive impact on efficiency and driving stability, and reduces the level of noise in the interior. The features responsible for this include air vent control, the flat underbody cover and the Air Curtain in the front apron.

AUTOMATIC START/STOP FUNCTION

The Automatic Start/Stop function switches off the engine when the vehicle comes to a temporary standstill (e.g. at traffic lights or in a traffic jam), which can reduce overall fuel consumption. When the driver presses down on the clutch (manual) or takes their foot off the brake (automatic), the engine automatically starts up again in a fraction of a second.

BMW eDrive technology combines the best of both worlds in a plug-in hybrid model (such as the BMW X5 xDrive40e iPerformance): purely electric, locally emission-free driving (e.g. in urban areas) along with a dynamic driving performance and a great possible range. Intelligent energy management controls the interaction between the electric motor and the combustion engine, deploying them with the ultimate efficiency.

www.bmw.co.uk/efficientdynamics
BMW TwinPower Turbo. The innovative BMW TwinPower Turbo petrol engines are among the core elements of the BMW EfficientDynamics strategy and have already been honoured with numerous awards. They combine the latest fuel injection systems with fully variable power distribution and innovative turbocharger technology.

The BMW TwinPower Turbo V8 engine combines two turbochargers with Double-VANOS and High-precision direct injection. The result is a massive maximum torque of 650Nm at engine speeds of between 2000–4500rpm. With an output of 449hp (330kW), it can accelerate from 0 to 62mph in an incredible 4.9 seconds. Depending on which wheel you choose the fuel consumption is 29.1–29.4mpg (9.6–9.7l/100km) with CO2 emissions of 224–226g/km.

BMW TwinPower Turbo. In diesel engines, BMW TwinPower Turbo technology includes state-of-the-art fuel injection technologies for enhanced efficiency, as well as fully variable power distribution and innovative turbocharging technology for a more dynamic ride. All diesel models feature lightweight aluminium construction and are equipped with a zero-maintenance particle filter.

BMW X5 xDrive50i.

Powerful and efficient – the BMW X5 xDrive50i with BMW TwinPower Turbo technology.

PEAK PERFORMANCE UNDER PRESSURE.
BMW TWIN POWER TURBO TECHNOLOGY.

BMW X5 xDrive25d/xDrive25d.

This BMW TwinPower Turbo four-cylinder diesel engine with a 2.0 litre capacity and an output of 170kW (231hp) combines Common-rail direct injection and a two-stage turbocharger with Variable Vane Geometry, making it the most efficient engine in the range. The BMW X5 xDrive25d comes with a rear-wheel-drive as opposed to an all-wheel-drive. The resulting weight distribution plays a major role in delivering particularly low fuel consumption and emission figures. The maximum torque of 500Nm is generated at an engine speed of just 2000–2500rpm. Both the BMW X5 xDrive25d and the xDrive25d accelerate from 0 to 62mph in 7.7 seconds and reach a top speed of 136mph (220km/h). Average fuel consumption: 52.3–53.3mpg (5.3–5.4l/100km), CO2 emissions: 139–141g/km (xDrive25d: 146–148g/km).

BMW X5 xDrive30d.

The BMW TwinPower Turbo six-cylinder in-line diesel engine with a 3.0 litre capacity combines Common-rail direct injection and a turbocharger with Variable Vane Geometry. At engine speeds as low as 1500rpm, this 258hp (190kW) powerplant delivers an impressive 560Nm of torque and takes just 6.8 seconds to achieve 0 to 62mph with a top speed of 142mph (225km/h). It consumes an average of just 47.1–47.3mpg (5.9–6.0l/100km), with CO2 emissions of 156–158g/km.

BMW X5 xDrive40d.

This diesel engine features impressive BMW TwinPower Turbo technology that combines Common-rail direct injection and a two-stage turbocharging system with Variable Vane Geometry to generate an output of 318hp (233kW) and a maximum torque of 630Nm at just 1500rpm. The BMW X5 xDrive40d delivers an outstanding performance while keeping fuel consumption and CO2 emissions astonishingly low at 47.1mpg (6.0l/100km) and 157–159g/km, respectively. It takes just 5.9 seconds to power from 0 to 62mph and has a top speed of 147mph (236km/h).

Fuel consumption and CO2 emissions are affected by chosen wheel and tyre sizes.
The BMW X5 xDrive40e combines the highly efficient eDrive plug-in hybrid drive with the intelligent and variable BMW xDrive all-wheel drive system. It thereby incorporates purely electric, locally zero-emissions driving on short trips, along with a dynamic driving performance with optimal traction. The drive’s core components include a powerful 245hp (180kW) four-cylinder petrol engine with BMW TwinPower Turbo technology, an 113hp (83kW) electric motor, a high-voltage lithium-ion battery with a capacity of 9.2 kilowatt hours, as well as the intelligent BMW xDrive all-wheel drive, which guarantees confident traction, optimised stability and increased agility in all weather and road conditions even when the vehicle is running exclusively on its electric drive. Intelligent energy management efficiently controls the interactions of the electric motor, combustion engine and the all-wheel drive system. Depending on the power output used by the driver and the state of battery charge, the electric motor can propel the vehicle alone, or it can support the combustion engine. During braking, it even transforms kinetic energy into electrical energy, which is saved in the high-voltage battery for use by the electric engine. When running on electricity alone, the vehicle has a range of approx. 19 miles (31km) and an electric top speed of 75mph (120km/h). Its combined fuel consumption is 83.1–85.6mpg (3.4–3.3l/100km) with CO2 emissions of 77–78g/km. Fuel consumption and CO2 emissions are affected by chosen wheel/tyre size.

The eDrive button allows the driver to choose between three different drive modes. The AUTO eDrive mode is active by default. The MAX eDrive mode supports driving that is particularly efficient. The battery is charged and the battery charge level is maintained during the SAVE BATTERY mode.

The charging port for the external charging of the high-voltage battery can be found behind a flap on the vehicle’s front side panel on the left. The charging port is protected from harmful environmental effects by a special gasket ring. The LED light ring provides information regarding the various charging procedure statuses.

BMW 360° Electric. The BMW i Wallboxes offer safe and convenient charging. Both are technically optimised to make charging your BMW X5 xDrive40e quick and easy. (The design of the charging cable may vary from images shown).

BMW 360° Electric. On the outside, this vehicle can be told apart from its conventional equivalent by the xDrive40e designation on the front side panels and eDrive badge on the rear, all highlighting the vehicle’s innovative drive technology.

The flat loading floor has only been raised by a few centimetres in comparison with non eDrive BMW X5 models. This means the luggage compartment remains virtually unchanged and can still be easily accessed. The flexibility associated with the divisible rear seat backrest is also maintained.

The My BMW Remote app supports remote monitoring of the charging procedure, it also provides information about the BMW’s current electric range and the battery charge status. Charging can be controlled remotely via the weekly timer.

Exterior specification not available for UK market.
THE BMW X5 M50d. M GENE INCLUDED.

The BMW X5 M50d has greatly benefited from the combined experience of the engineers of BMW M, whose expertise has ensured precision tuning between the drive, suspension and steering. Behind the wheel, you will enjoy precise, sporty handling for an exceptionally intense driving experience. The M Performance TwinPower Turbo engine has immensely satisfying acoustics and delivers a powerful output of 381hp (280kW) and a maximum torque of 740Nm. The force is transferred directly to the road with optimal traction thanks to the intelligent xDrive all-wheel-drive system with fully variable torque split. Its highly exclusive interior and exterior details are guaranteed to turn heads, such as the special air intakes in the front apron, Chrome fronted kidney grille with Titanium vertical slats and exterior mirror caps in metallic Ferric Grey. These are perfectly complemented by optional 20” Double-spoke style 468 M light alloy wheels with mixed tyres. The distinctive interior includes features such as door sill finishers, instrument cluster and gearshift lever all with an ‘M50d’ designation, Sport seats upholstered in Dakota leather, Aluminium Hexagon interior trim and Anthracite Headlining.

Powerhouse: The M Performance TwinPower Turbo six-cylinder inline diesel engine can hit 62mph in just 5.3 seconds. It consumes on average of 42.6 miles per gallon with CO₂ emissions of 173g/km, for an outstanding blend of efficiency and dynamism.
The intelligent BMW xDrive all-wheel-drive system adapts perfectly to even the most challenging road surface conditions and always provides outstanding traction. With xDrive and Dynamic Stability Control (DSC), your car remains directionally stable and controllable. xDrive flexibly distributes drive power to the front and rear wheels, performing lightning-fast adjustments to ensure optimum ground contact at all times. This allows xDrive to combine the advantages of all-wheel-drive – traction, directional stability and safety – with typical BMW agility.

Servotronic. The standard Servotronic feature adjusts the power steering to suit the current speed and ensures a direct, precise steering response at high speeds. It also provides superior comfort by minimising the physical effort required when steering, while increasing agility when parking, manoeuvring, or navigating narrow or twisting roads.

Active Steering. The Active Steering option is synonymous with precision, agility and comfort in every driving situation. At low speeds – such as urban driving or parking – Active Steering increases the steering angle. This way, you can precisely manoeuvre the vehicle by slightly rotating the steering wheel, meaning that you no longer have to keep turning it to produce the desired result. This makes your BMW significantly more agile and takes the stress out of parking. For greater control in the upper speed range, Active Steering produces a more indirect steering ratio, thereby reducing the degree to which the wheels are turned. This means you can more precisely control the wheels using larger turns of the steering wheel, for greater convenience and stability. Active Steering also intervenes to support you in the event of critical situations such as oversteering or braking on different road surfaces – it reacts even faster than the most experienced drivers (available with xDrive50i models only).

Adaptive suspension packages. Suspension control systems for the BMW X5 are available in optional packages. This makes selecting your preferred driving dynamics option easier than ever before.

Adaptive Comfort suspension combines Variable Damper Control with air cushioning on the rear axle for the ultimate in driving comfort. And whenever you want a sportier chassis set-up, you can use the Drive Performance Control switch to activate one of the two more dynamic modes.

Adaptive Dynamic suspension allows you to further boost your car’s potential. Encompassing both Dynamic Performance Control and Dynamic Drive, this package is guaranteed to deliver driving dynamics that are intrinsically sporty – as evidenced by the extremely neutral steering response and minimal body roll in bends.

Adaptive M suspension extracts even more driving dynamics potential from your vehicle. The Variable Damper Control and self-levelling air suspension on the rear axle are tuned to deliver exceptionally sporty driving characteristics.
UNPARALLELED SAFETY WITH THE LATEST BMW TECHNOLOGIES.

The BMW X5 is equipped with cutting-edge technologies for every eventuality. Superb handling and innovative equipment come standard. Drivers benefit from the very latest technologies that provide optimal support at all times. You’ll feel safe and protected, no matter where your journey takes you.

Dynamic Stability Control (DSC) with extended functionality including Cornering Brake Control (CBC), Hill-start assistant, brake drying and brake fade compensation. DSC recognises an imminent skid and stabilises your car within milliseconds. The Dynamic Traction Control (DTC) permits increased wheel slip to improve forward travel depending on the situation and to allow for a more sporty driving style.

Run-flat tyres: Reinforced side walls prevent the tyres from completely collapsing or loosening from the rim if the air pressure drops allowing you to drive up to 50 miles after a puncture, at maximum speeds of 50mph (80km/h).

Tyre Pressure Monitoring minimises the danger caused by a defective tyre. The system detects changes in the air pressure in a tyre from differences in wheel speeds and warns the driver through a Check Control light.

524 Adaptive Headlights including cornering lights and High-beam Assistant, illuminate bends at greater distances by optimally adjusting the swivelling headlights as soon as the driver turns the steering wheel. To improve short-range visibility, the turning lights integrated into the foglights are automatically activated, even when the vehicle is at a standstill, as soon as the indicator is switched on or the steering wheel is turned.

5AL Dynamic Safety, as part of the optional Active Security package, ensures all safety components are designed to complement each other perfectly. Dynamic Safety initiates protective measures for occupants if an accident situation is imminent by tensioning seatbelts, it also moves the seats to an optimal position (in conjunction with electric seat adjustment) and automatically closes open windows or the optional panoramic glass sunroof. Dynamic Safety also includes an attentiveness assistant.

Passenger cell. The system of members and nodes in the functional body structure combined with the strategic deployment of high-strength materials delivers maximum passive safety in front, side or rear crashes. Defined deformation zones mean that the body structure can absorb impact energy, increasing passenger protection.

Hill Descent Control (HDC) is available with xDrive models. When activated, it enables your BMW to automatically take even the steepest downhill gradients safely and reliably, without the driver having to brake. Using the cruise control with braking function, vehicle speed can also be controlled via a lever to the side of the steering column.

Driving Assistant combines the Lane Departure Warning and Approach control warning systems. When travelling at speeds between 10 and 60 km/h, the Approach control and person warning with light city braking function issues a warning if there is a risk of collision with vehicles or pedestrians, and brakes the vehicle in the event of an emergency. At speeds above approx. 70 km/h, the Lane Departure Warning draws the driver’s attention to an unintentional lane change by means of slight vibrations of the steering wheel.

1 This function can be limited by darkness and fog.

Passenger cell.

### Exterior equipment:
- 20" light alloy M Double-spoke style 469 M with run-flat tyres
- Adaptive M suspension
- Exhaust tailpipes, single, quadrilateral, left and right, Chrome
- Exterior trim, High-gloss Shadowline
- M aerodynamic bodystyling
- M designation on front side panels, left and right
- Remote control, including integrated key, with M designation
- Roof rails, High-gloss Shadowline

### Interior equipment:
- Door sill finishers with M designation
- Headlining, Anthracite
- Interior trim, Aluminium Hexagon
- M leather steering wheel with gearshift paddles
- Sport automatic transmission
- Sport seats, front

#### M Sport Plus package:
- Digital Cockpit
- Head-up Display
- Loudspeaker system - harman/kardon
- Speed-limit display
- Sun protection glass

Ask your BMW Retailer for further information.

---

- Sport seats featuring optional Alcantara/Dakota leather upholstery, shown above with M leather steering wheel, lend the interior a particularly sporty feel. Dakota leather upholstery comes as standard on M Sport models.
- 22" light alloy M Double-spoke style 599 M with run-flat tyres.
  - Front: 10J x 20 with 275/40 R21 tyres.
  - Rear: 11J x 20 with 315/35 R21 tyres.

---

The BMW X5 xDrive50i M Sport in exclusive Carbon Black metallic paint.
Driving a BMW is, in itself, a mark of character. There are those who still, however, want their vehicles to be even more individual reflections of their personality. The BMW Individual Collection and the BMW Individual Manufaktur meet these needs by opening up seemingly limitless opportunities for differentiation. 

Precisely in tune with each model, the BMW Individual Collection offers a highly exclusive selection of equipment options. Fascinating paint finishes either refracting the light or with a matt effect. Leathers, unique in colour and scope of application, perfected with clever contrasts and decorative stitching. Interior trims in the most exclusive fine woods, the immaculate Piano finish and the finest leather.

And yet even this can be surpassed – thanks to the BMW Individual Manufaktur. Here, there is only one goal: realising almost any request, even the most personal, with stylish, hand-crafted perfection.

---

These colour samples are intended as an initial guide to the colours and materials available for your BMW. However, experience has shown that printed versions of paint, upholstery and interior trim colours cannot in all cases faithfully reproduce the appearance of the original colour. Please discuss your preferred colour choices with your BMW Retailer. There you can also see original samples and be assisted with any requests.
Please note that even normal long or short-term use can lead to unrecoverable upholstery damage. This can be caused in particular by non-colourfast clothing.

#### Rear lights with LED light elements
- Instantly recognisable, even at long distances, thanks to distinctive horizontal light strips.

#### Air Breather
- Located in the front wheel arches, channels the air flow at the front wheels. This decreases air turbulence, thereby reducing the vehicle’s fuel consumption and CO₂ emissions.

#### Roof rails, Black
- Matched harmoniously to the car’s design and provides the foundation for BMW’s multi-functional roof rack system for transportation of bicycles, luggage etc. (Standard on SE models).

#### Roof rails, Matt Aluminium
- Complements the exterior design and serves as the base for a multi-functional BMW roof rack system.

#### 3AT Roof rails, High-gloss Shadowline
- For a truly striking aesthetic. (Standard on M Sport and M50d models).

#### 323 Soft-close doors
- Provides added convenience when getting in and out of the BMW X5.

#### 328 Running boards, Aluminium
- With a brushed aluminium finish and raised rubber dot grip pattern. Available for SE models, this stylish design element provides added convenience when getting in and out of the BMW X5.

#### 3AC Towbar
- Concealed and permanently installed behind the bumper and includes Trailer Stability Control. Enables a braked trailer of up to 3,500kg to be towed. (xDrive25d, xDrive25d and xDrive40e up to 2,700kg).

#### 322 Adaptive LED Headlights
- With cornering lights and adaptive lights. Their bright colour approximates daylight for optimum illumination of the road, improved visibility and reduced tiredness when driving at night. The four LED light rings present an unmistakable impression at night. Includes High-beam Assistant.

#### 524 Adaptive Headlights
- Offer improved visibility by following the steering angle of the front wheels, giving better illumination through corners of the road ahead. Includes High-beam Assistant.

#### 760 Exterior trim, High-gloss Shadowline
- Side window trim, window recess finishes, window guides, trim on the B and C pillars and mirror bases feature in High-gloss Black. (Standard on M Sport and M50d models).

#### 3MB Exterior trim, Matt Aluminium
- Complements the exterior design and serves as the base for a multi-functional BMW roof rack system.

#### 420 Sun protection glass
- Darkened glass for rear screen and rear side windows reduces the degree to which the interior heats up in the sun, ensuring a pleasant interior temperature.

#### 328 Running boards, Aluminium
- With a brushed aluminium finish and raised rubber dot grip pattern. Available for SE models, this stylish design element provides added convenience when getting in and out of the BMW X5.

#### 3AC Towbar
- Concealed and permanently installed behind the bumper and includes Trailer Stability Control. Enables a braked trailer of up to 3,500kg to be towed. (xDrive25d, xDrive25d and xDrive40e up to 2,700kg).

#### 322 Adaptive LED Headlights

Eight-speed automatic transmission with Steptronic makes changing gears and driving significantly more convenient, thanks to fast engine speed transitions and shorter shift times. It ensures outstanding comfort with palpable dynamics and increased fuel efficiency.

Parking brake with auto-hold function allows the brake to be applied and released via a button on the centre console. Auto-hold assists the driver in stop-start traffic, or during hill starts by preventing the car from rolling forwards or backwards when at a standstill.

XL4 BMW Individual leather steering wheel with wooden inlays which match the respective BMW Individual interior trim.

Sport leather steering wheel, with multi-function buttons and Pearl Grey Chrome inlay.

1 Image also shows optional Speed-limit information.

Head-up Display, full colour, projects relevant driving information into the driver’s field of vision thereby allowing the driver to always remain focused on the road ahead. Head-up Display shows information such as current speed, navigation directions, Speed Limit Info (if optionally fitted) including no-overtaking indicators, along with Check Control messages and Infotainment information.

Digital Cockpit, with Black panel technology and 10.25" display, provides an impressive visualisation of the driving experience. Three different modes and their specific characteristics – each of which have their own colour scheme and graphic style – can be shown in the display: Comfort, ECO PRO and Sport modes.

Standard / Optional equipment.

- **SAC Night Vision with Dynamic Light Spot.** A thermal imaging camera in the kidney grille detects people and animals up to a distance of 300 metres. The infrared images are shown in the Control Display and the driver is alerted to potential hazards using a visual and acoustic warning. In addition, an innovative Dynamic Light Spot uses the foglight beam to clearly illuminate the hazard enabling the driver to recognise potential dangers sooner and take more timely action.

- **Driving Assistant.** A range of camera-based driver assistance systems provide enhanced safety and reduce the risk of potential collisions, at both high and low speeds. Lane Departure Warning detects lane markings and alerts the driver with steering wheel vibration. Forward Collision Warning monitors vehicles ahead alerting the driver by optical and acoustic alerts of a potential rear-end collision. City Collision Mitigation proactively engages braking for rapid reaction ahead alerting the driver by optical and acoustic alerts of a potential rear-end collision. End Collision Warning provides enhanced safety and reduces the risk of potential collisions. Lane Departure Warning detects lane markings and alerts the driver with steering wheel vibration. Forward Collision Warning monitors vehicles ahead alerting the driver by optical and acoustic alerts of a potential rear-end collision. City Collision Mitigation proactively engages braking for rapid reaction ahead alerting the driver by optical and acoustic alerts of a potential rear-end collision.

- **ECO PRO mode.** Depending on individual driving style, this mode can reduce fuel consumption by up to 20% (determined in an internal BMW fuel consumption evaluation).

- **SDL Surround-view comprises Top-view and Side-view.** This system provides support in confined situations and provides an early view of approaching traffic for pulling away from side roads and areas where visibility is limited.

- **SDP Park Assist for easy parallel parking.** Activated at speeds below 20mph, the system uses sensors to identify a suitable sized parking space. Steering, brakes and accelerator are controlled by the car.

- **Reversing Assist camera enhances visibility when reversing and parking.** It shows the area behind the car on the Control Display.

- **Satellite Navigation System - BMW Professional Multimedia.** With high-resolution 10.2" colour display and new Intel processor for fast screen loads and page transitions. Includes the new generation iDrive Touch Controller, DVD drive, integrated 20GB hard disk for storage of audio files, MP3 players or USB sticks, as well as Intelligent Route-ahead Assistance for efficient driving by anticipating road conditions, Real Time Traffic Information for up-to-date traffic flow information, ECO PRO Route, 3D city models and split-screen function.

- **Navigation System - BMW Professional Multimedia.** With high-resolution 10.2" colour display and new Intel processor for fast screen loads and page transitions. Includes the new generation iDrive Touch Controller, DVD drive, integrated 20GB hard disk for storage of audio files, MP3 players or USB sticks, as well as Intelligent Route-ahead Assistance for efficient driving by anticipating road conditions, Real Time Traffic Information for up-to-date traffic flow information, ECO PRO Route, 3D city models and split-screen function.

- **Driving Experience Control.** ECO PRO Fuel-efficient setting

- **xDrive Status** provides information relevant for off-road driving on the instrument panel and the Control Display. In addition to the compass function, the car’s angle of inclination (both visually and in degrees) is also shown.

- **5DP Park Assist** for easy parallel parking. Activated at speeds below 20mph, the system uses sensors to identify a suitable sized parking space. Steering, brakes and accelerator are controlled by the car.

- **Reversing Assist camera enhances visibility when reversing and parking.** It shows the area behind the car on the Control Display.

Standard / Optional equipment.

The top is in Black with Amaro Brown, Nutmeg or Criollo Brown upholstery and in Dark Scotch with Smoke White or Taupe upholstery. The upper and lower parts of the instrument panel and the door panels feature contrast stitching. Only available in conjunction with corresponding BMW Individual Merino leather upholstery.

- **6F2 B&O Advanced audio system**, with 16 loudspeakers providing 1200W amplifier power. Dirac signal processing ensures outstanding acoustics and features two sound modes: Studio and Expanded. Optical display via partially illuminated speaker covers, extending centre speaker with acoustic lens and B&O speaker cover design.

- **402 Panoramic glass sunroof**, with one-touch function and remote opening/closing. Also includes automatic integral wind deflector, sun protection glass and independently sliding headliner panel. Dual tilt function slides both panes and sliding function slides front panel and headliner fully inside the roof cavity.

- **Ambient interior lighting with colour selection** including ‘welcome’ mode, as well as pre-set lighting designs featuring tricolour LEDs. This feature also includes countless additional light sources positioned throughout the interior for a particularly pleasant atmosphere. Safe vehicle entry and exit at night is made safer thanks to the ‘welcome’ lighting and exit lights.

- **6F2 B&O Advanced audio system**, with 16 loudspeakers providing 1200W amplifier power. Dirac signal processing ensures outstanding acoustics and features two sound modes: Studio and Expanded. Optical display via partially illuminated speaker covers, extending centre speaker with acoustic lens and B&O speaker cover design.

- **402 Panoramic glass sunroof**, with one-touch function and remote opening/closing. Also includes automatic integral wind deflector, sun protection glass and independently sliding headliner panel. Dual tilt function slides both panes and sliding function slides front panel and headliner fully inside the roof cavity.

- **XT1 BMW Individual Instrument panel, leather.** The top is finished in Nappa leather while the bottom is in Merino leather to match chosen upholstery colour.

- **4MS Instrument panel, leather** with top of instrument panel and door upper arm trim panels in Black Nappa leather for a luxurious interior aesthetic.

- **688 Loudspeaker system - harman/kardon** includes a powerful 600W digital amplifier, 16 loudspeakers, individually adjusting equalizer for truly outstanding sound quality and harman/kardon designation.

- **4NB Air conditioning, automatic with four-zone control** (shown above), same features as two-zone automatic air conditioning, with additional air vents in the B pillars and separate controls for rear seat passengers. Air conditioning, automatic with four-zone control features separate air volumes and temperature controls for the driver and front passenger. Includes microfilter, fogging sensor, automatic air recirculation (AAR), as well as stationary cooling and residual heat functions.

- **402 Panoramic glass sunroof**, with one-touch function and remote opening/closing. Also includes automatic integral wind deflector, sun protection glass and independently sliding headliner panel. Dual tilt function slides both panes and sliding function slides front panel and headliner fully inside the roof cavity.

- **Ambient interior lighting with colour selection** including ‘welcome’ mode, as well as pre-set lighting designs featuring tricolour LEDs. This feature also includes countless additional light sources positioned throughout the interior for a particularly pleasant atmosphere. Safe vehicle entry and exit at night is made safer thanks to the ‘welcome’ lighting and exit lights.

- **6F2 B&O Advanced audio system**, with 16 loudspeakers providing 1200W amplifier power. Dirac signal processing ensures outstanding acoustics and features two sound modes: Studio and Expanded. Optical display via partially illuminated speaker covers, extending centre speaker with acoustic lens and B&O speaker cover design.

- **402 Panoramic glass sunroof**, with one-touch function and remote opening/closing. Also includes automatic integral wind deflector, sun protection glass and independently sliding headliner panel. Dual tilt function slides both panes and sliding function slides front panel and headliner fully inside the roof cavity.

- **XT1 BMW Individual Instrument panel, leather.** The top is finished in Nappa leather while the bottom is in Merino leather to match chosen upholstery colour.
Standard / Optional equipment.

- **456 Comfort seats**, front, with electrical adjustment of fore and aft position, height, tilt, recline and head restraint height. The seats also feature lumbar support and programmable memory positions for front seats, steering wheel and door mirror positioning. Additionally includes automatic dipping of passenger door mirror for kerbside parking.

- **4FF Comfort seats**, rear can be individually adjusted in numerous ways. The two outer seats can be reclined by ten degrees in six stages. In addition, the comfort seats have fore and aft adjustment by 80 millimetres and the rear seat backrest can be completely folded down in a 40:20:40 split. With an easy-entry function, cupholders and storage compartment with lid in the centre armrest, rear seat passengers are assured of a particularly comfortable experience (not available on xDrive40e models).

- **481 Sport seats**, front provide optimum lateral support with higher seat bolsters. The seat length, height, backrest incline and seat surface can all be electrically adjusted and manually adjustable height support (standard with M Sport and M50d models).

- **483 Seat ventilation**, front, ventilation of front seats via perforated Dakota leather.

- **543 Seat ventilation**, front, ventilation of front seats via perforated Dakota leather.

- **4UB Third row seating**, enables the interior space to be used more flexibly. Includes two individual fold-down seats facing forward with easy-entry function. In addition, a centre console with two cupholders is included, as well as heating and ventilation controls with fixed airflow outlets (not available on xDrive40e models).

- **413 Luggage compartment separating net**, can be secured behind the second row of seats and contains loose items within the luggage compartment.

- **403 Storage options**, includes a glasses compartment in the headlining, glovebox net to contain small items and netting, hooks, straps and lashing rails with lashing eyes in the luggage compartment.

- **54 Storage options**, includes storage compartment with a two-part lid and 12V power socket within the front armrest, lockable and illuminated glove compartment, further storage compartments in the interior door panels and two further 12V power sockets located in the rear centre console and luggage compartment.

- **448 Standard seats**, for driver and front passenger with electrically adjustable backrest angle and seat height, as well as manual adjustment of the lengthways position and headrest height. Driver also has electric seat angle adjustment.

- **450 Seat heating**, front heats the seat surfaces and backrests in three thermostatically controlled stages.

- **465 Seat adjustment**, front, electric with driver memory features two programmable settings for driver seat, steering wheel column and exterior mirror. Automatic dipping of passenger door mirror for kerbside parking. Shown here in combination with Comfort seats. (Standard on M Sport, M50d and xDrive40i SLE).

- **447 Extended storage**, includes a glasses compartment in the headlining, glovebox net to contain small items and netting, hooks, straps and lashing rails with lashing eyes in the luggage compartment.

- **452 Rear seat backrest**, can be folded down in a 40:20:40 split for more transport options and a customizable seat and luggage-compartment configuration, as well as a rear centre armrest with two cup holders.
Standard / Optional equipment.

1 iDrive Touch controller may vary from image shown.

- 4UY Through-loading ski bag for clean and safe transportation of up to four pairs of skis or three snowboards with two people comfortably seated in the rear. Practically, the bag can be removed and used outside of the vehicle. When not in use, it can be stored in the sleeve under the luggage compartment floor to save space (not available in conjunction with Third-row seating or on xDrive40e models).

- Cupholders, two in the centre console with a sliding cover and two in the rear centre armrest.

- 417 Sunblinds manual blinds for rear side windows and quarterlights. For protection against intense sunlight, as well as increased privacy.

- 322 Comfort Access, keyless opening of the two front doors, the back doors and the luggage compartment.

- Bottle holders for storing 1.5 litre bottles in the front side pockets and 1.0 litre bottles in the rear side pockets.

THE BMW SERVICE CONCEPT:

When you buy a BMW, you can look forward to superb service and comprehensive customer care. BMW Service Inclusive approaches the world of service for BMW owners in a unique way. For each model, a combination of service and maintenance work is carried out on your BMW, so you can be sure that it will only be done by fully qualified BMW Service Approved Technicians at one of over 100 BMW Service Authorised Workshops around the country. Furthermore, only Genuine BMW Parts are used – each covered by a two year warranty. BMW Service Inclusive and Service Inclusive Plus are transferable to subsequent owners within the time and mileage period, which can enhance the resale value of your car.

BMW SERVICE INCLUSIVE.

BMW Service Inclusive: Wouldn’t it be good to know your comprehensive servicing costs in advance? Well, that’s exactly what BMW Service Inclusive provides and for a low one-off payment.

BMW Service Inclusive lasts for 5 years or 50,000 miles (whichever occurs first) and covers all your vehicle’s comprehensive servicing requirements. Alternatively, you can choose BMW Service Inclusive Plus which in addition to servicing also covers maintenance items such as brake pads, brake discs and windscreen wipers. And whenever

BMW EMERGENCY SERVICE.

BMW Emergency Service. BMW Emergency Service is the only roadside and assistance programme designed specifically for BMW vehicles offering an exceptional range of benefits and services. It is available 24 hours a day, 7 days a week and utilizes a dedicated fleet of BMW Approved Technicians, equipped with Genuine Parts and tools, ensuring that you and your vehicle receive the best possible care in the event of any motoring emergency.

BMW CONNECTED DRIVE SERVICES.

BMW ConnectedDrive Services. A function using the built-in BMW SIM card to provide telematic and online services that are fully integrated into your BMW vehicle. All services require connection to a UK mobile network. Some services are available in other European countries. The range of ConnectedDrive Services that are available depends on the specification of the vehicle. The service duration varies depending on the ConnectedDrive Service.

BMW Magazine: Every new BMW customer receives a complimentary subscription to BMW Magazine. This publication features all the latest news and developments from BMW, together with a variety of driving and lifestyle features.

The BMW World and BMW Museum in Munich, Germany.

In 2016, the BMW Group was once more listed in the Dow Jones Sustainability Index as the most sustainable automotive company worldwide. This makes BMW Group the only company in the automotive industry to be listed without interruption since the Index was established. The development of efficient vehicle concepts and environmentally friendly production processes, including recycling, is an integral part of our philosophy. BMW EfficientDynamics and electric vehicles have enabled us to cut CO₂ emissions from our European new-vehicle fleet by more than 40% since 1995. We have also reduced the amount of resources used in production, such as water and energy, by 34% between 2006 and 2016, with a reduction to 45% of previous levels aimed for 2020. In terms of other resources (such as volatile organic compounds, process wastewater and waste) our 45% target was met in 2014, and we will continue to work on further improvement. Production at our engine plant in Styria has been waste-water free since 2007. And of course, at the end of its service life, every one of our vehicles can be easily and economically recycled. To return your end-of-life vehicle, please contact your BMW Retailer. For more information on this issue please visit our website.
