

It's more than garage storage.
It's your life.

The Garage: The Underutilized Space

Thank you for inviting us into your home today.

Did you know that the garage is often the largest and most underutilized space in the home? It's an area that homeowners focus on the least and yet have the most frustration with. Things pile up and get in the way, often taking up your cars' parking space. In addition, you may have costly and inconvenient off-site storage.

Many homeowners are seeing the short and long term value that effective, well-planned, garage storage systems can bring. In addition to saving thousands of dollars a year spent on off-site storage units, you can store your vehicles inside where they are protected from the sun, hail, other damages, or theft. Items are also stored off the ground and protected from water, debris, insects, and rodents.

A well designed garage storage system will significantly enhance your quality of life. Imagine walking into a garage where everything has a place, and is in its place...

Who We Are

We are part of a national network of locally owned and insured garage enhancement professionals. We have one common goal; to help you get your garage in order through a simple and hassle-free process. Our objective is to improve your family's quality of life by providing you with the best products and solutions to fit your needs. After all, it's more than storage. **It's your life.**

Your Garage Project Comes To Life!

See how your project will really look, thanks to our 3D design software. We will draw your garage interior and program it into our software at no cost or obligation.

You will have an opportunity to see the value a professional design consultation can bring to your project. Your garage will come to life and you will see what your completed custom garage project will look like before moving forward.

We will email you a detailed quote, wall elevation drawings, and 3D renderings of your garage that you can view from various angles. If you require any design changes, we are more than happy to provide these quickly so you can envision the dream garage you have always wanted.

Once you're satisfied with the design, we will schedule the project and your dream garage will become a reality.

Unmatched Appearance & Design

An exciting feature of our storage products is their ability to live together. These products are designed to match and coordinate to provide your garage with unmatched style and functionality.

Why have a bunch of random mis-matching garage accessories installed, when you can have the industry's most functional products with the design and appearance elements that make your garage look as beautiful as any room in your home?

We are the exclusive distributor for Monkey Bars Garage Systems, the nation's leading manufacturer of garage enhancement products. Monkey Bars not only manufactures the highest quality, functional, garage storage products, but they take it to a new level with their system's beautiful appearance and design.

// garage storage system

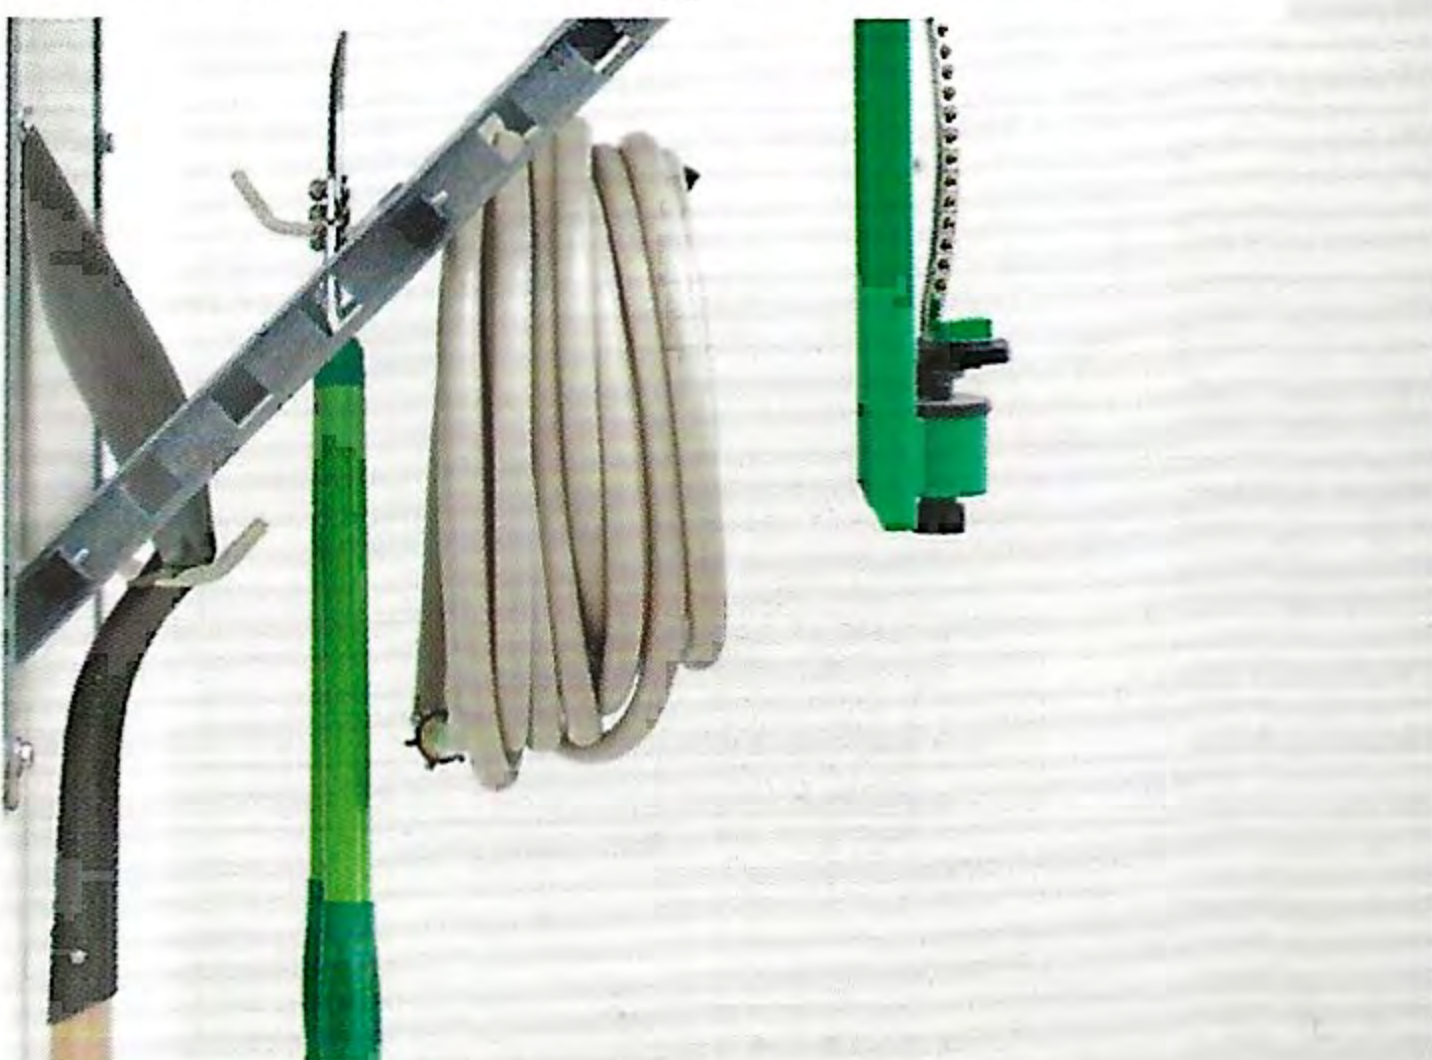

A fully adjustable, completely customizable shelving system separates long-term storage from items used more frequently. With two colors, Granite Gray and Desert Stone, the possibilities for this system are virtually endless. Plus, it comes with a lifetime warranty. With everything in its place, you'll be able to spend less time searching for your things and more time doing what you love.

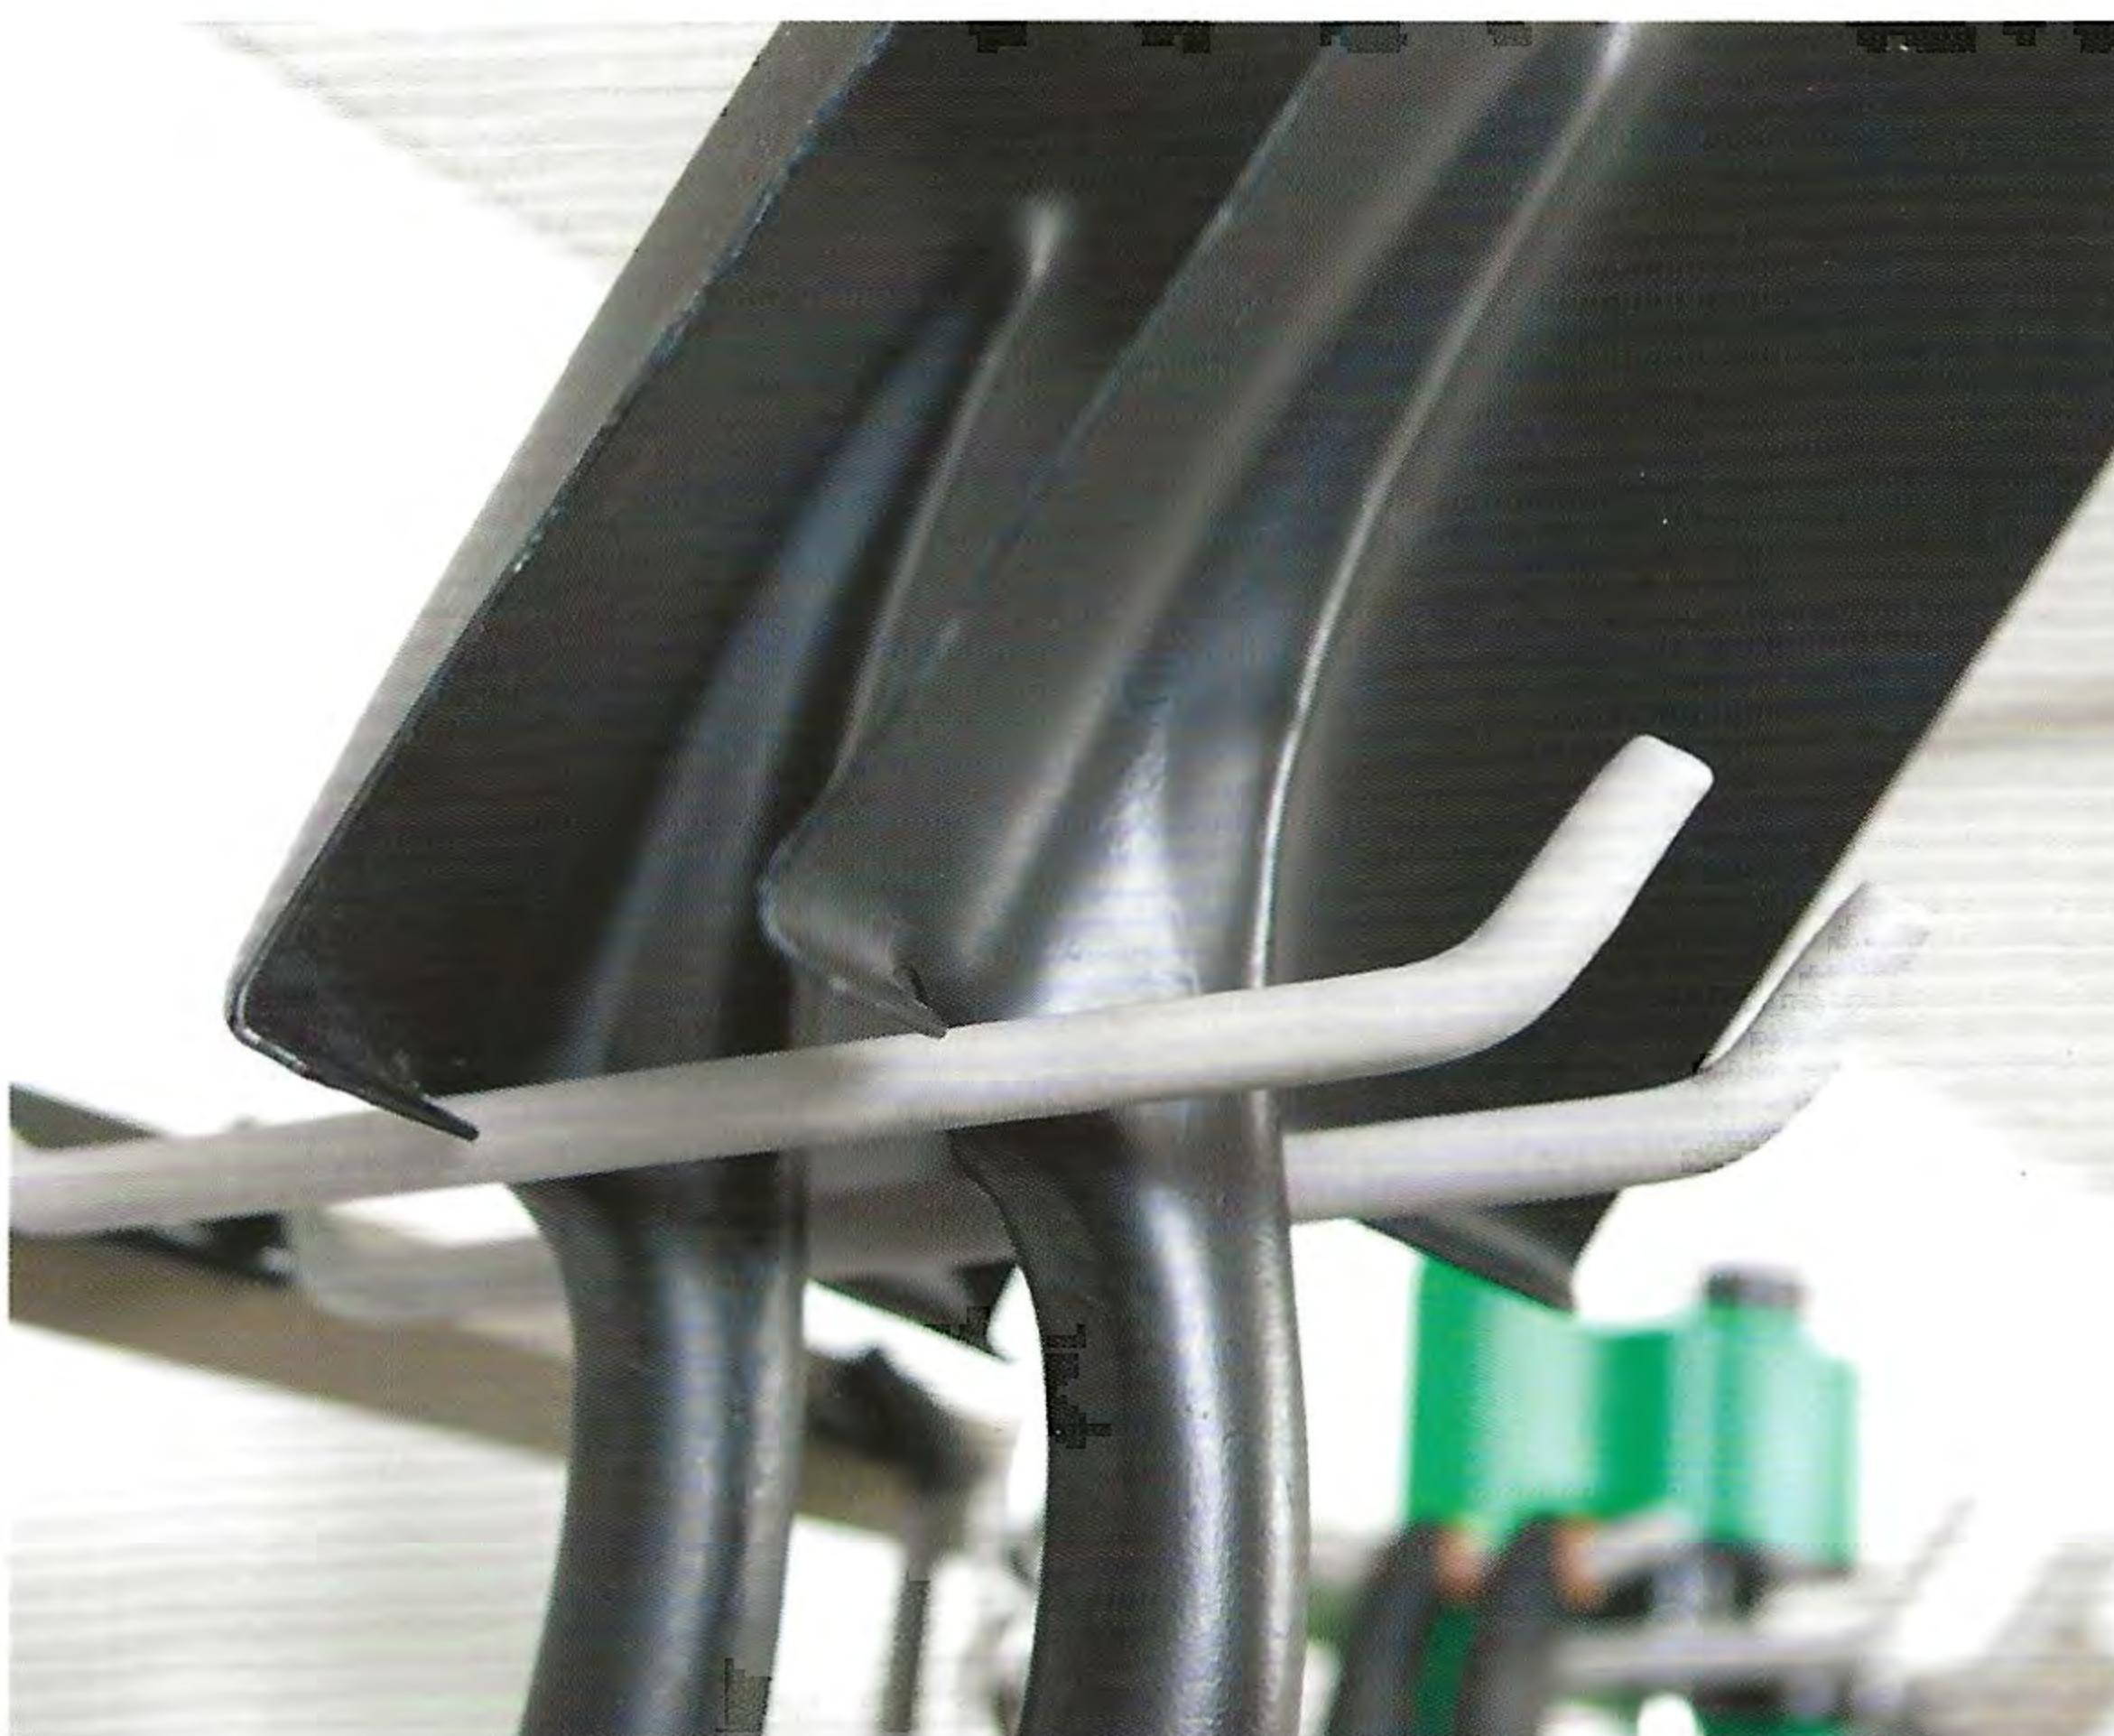

Long-term storage on shelf.

Short-term storage on rack.

Every four feet of shelving can hold 1000 pounds.

Hooks and bars are all fully adjustable making this system extremely versatile.

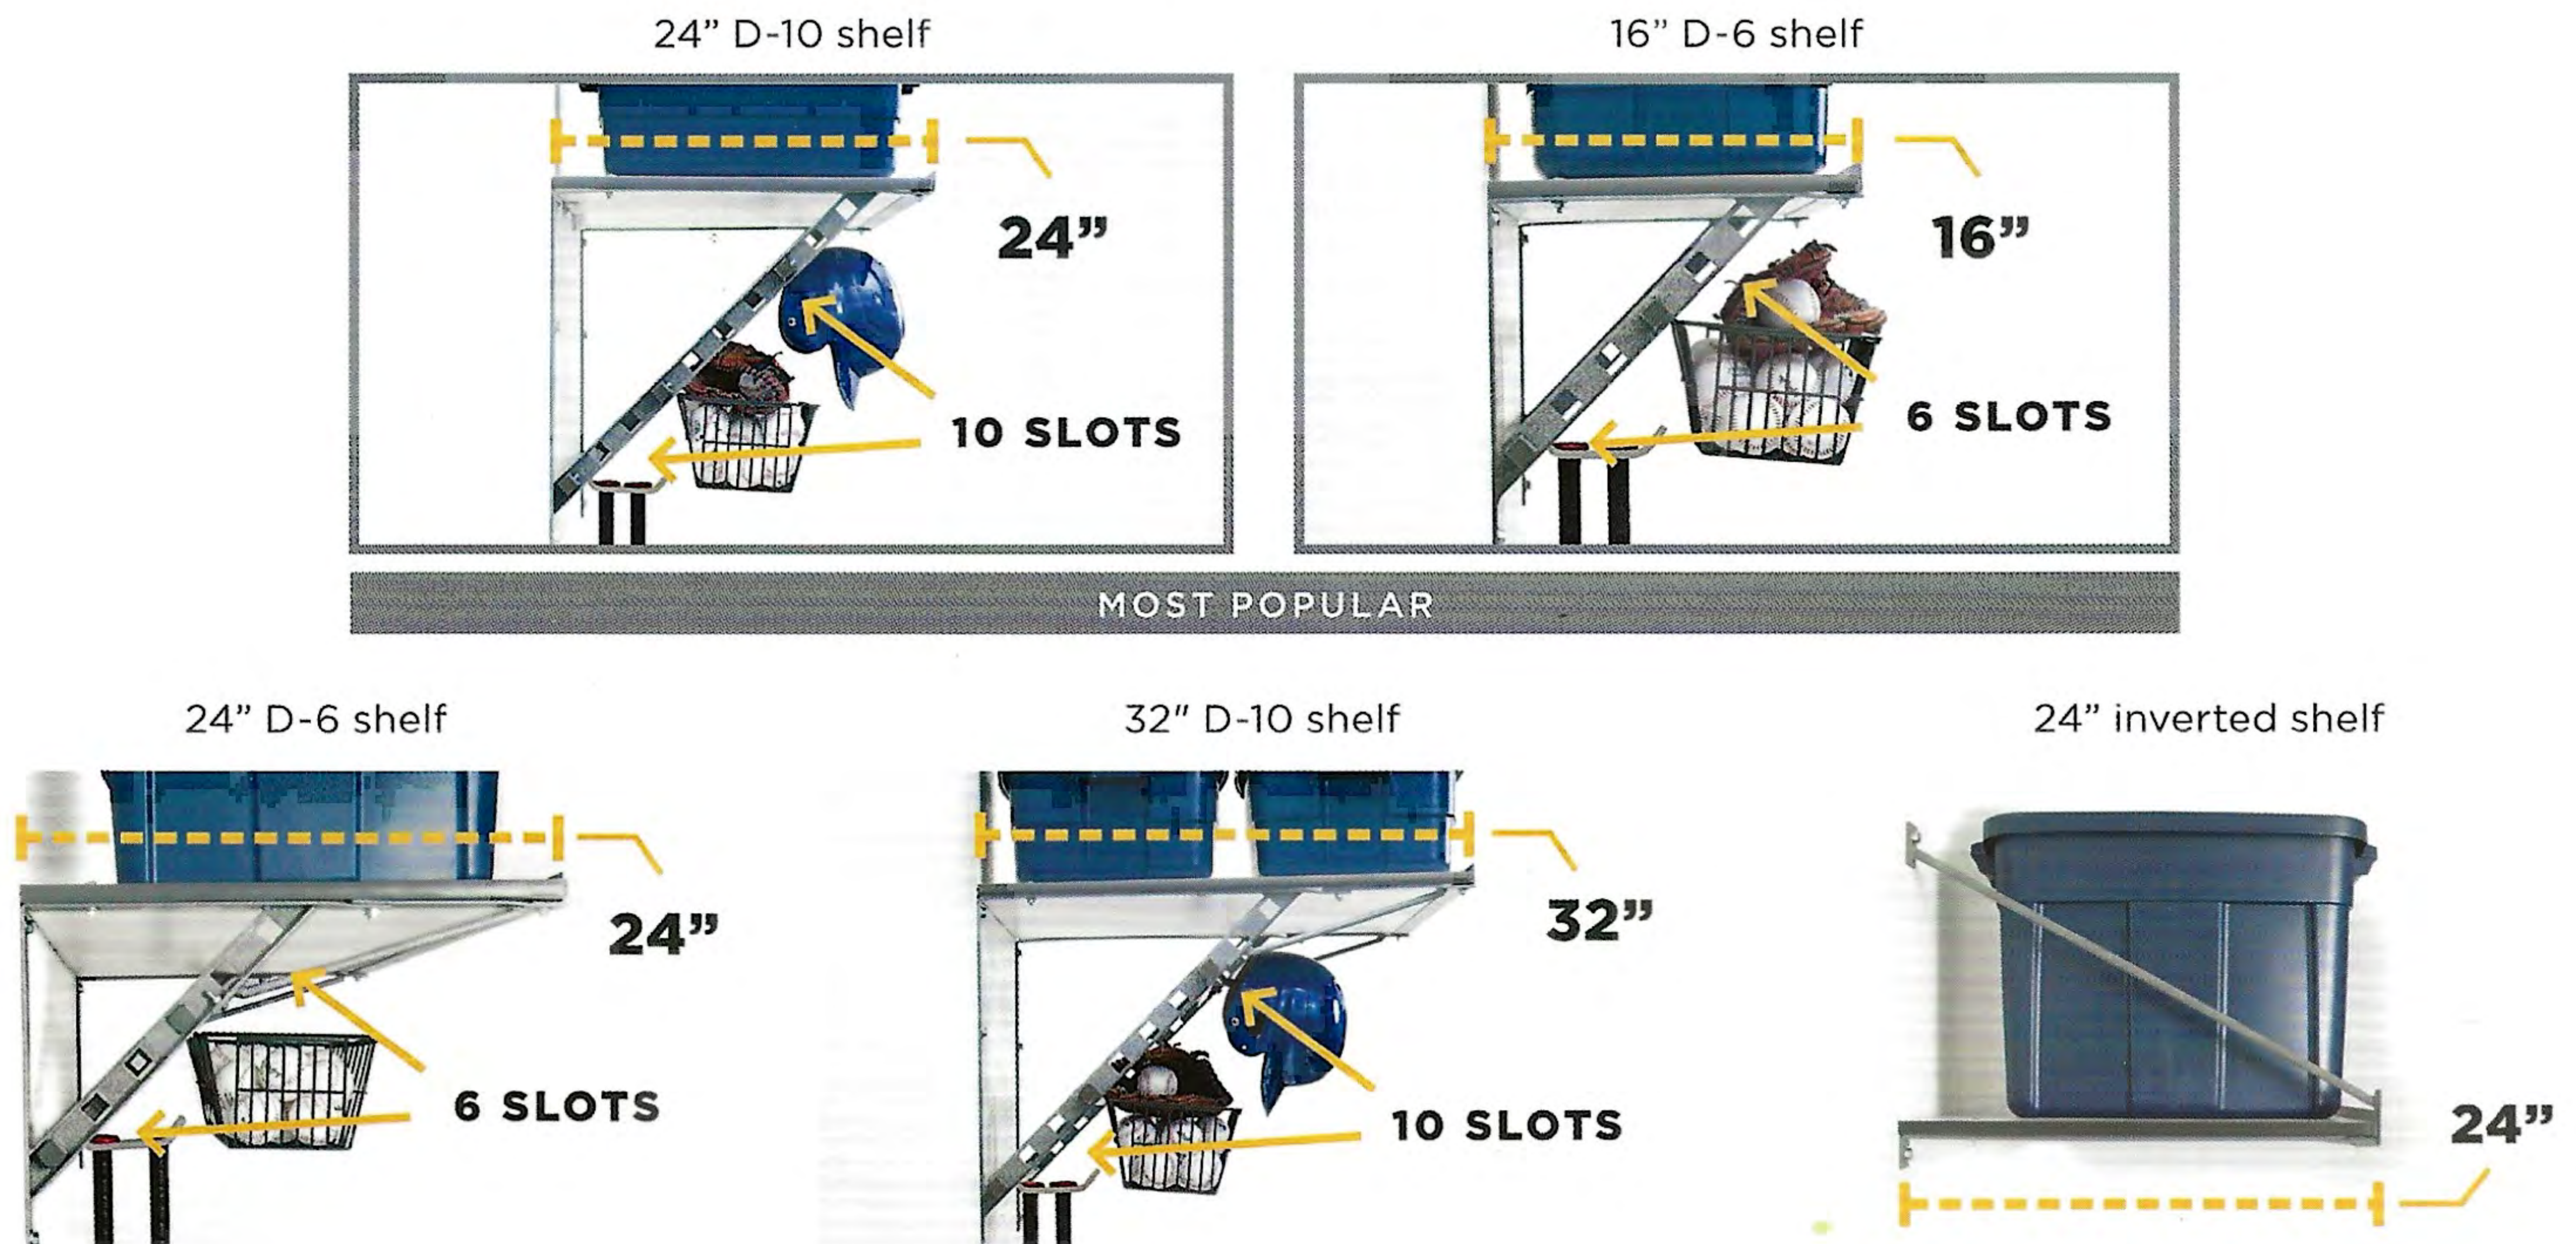

Everything off the floor for simple parking and easy access in and out of the car.

BREAK IT DOWN

We have a hook or solution to meet nearly every storage need. Our products are designed to store your belongings safely off the ground to open up floor space. All of our bars and hooks are fully adjustable, so that as your needs change, your system will change with them.

We offer five different shelf rack configurations to best utilize your available space. The 24D-10 is the most popular and versatile shelf rack. A 24D-6 can be a great solution on the sides of a garage where walking space is limited. This variety of configurations allows us to design a custom solution for your garage and storage needs.

// shelf rack configurations

// monkey bars shelf rack finishes

To ensure that the Monkey Bars shelving system matches the aesthetic of your garage, we offer a wide selection of shelf colors. Our standard shelves come in two colors, almond with brown edge banding and white with gray edge banding. Our Designer Series finishes are styled to coordinate with your garage cabinets.

Premium Hardware

In-Cabinet Bracket

Durable Workbenches

With three different series of cabinets, you'll be able to find the perfect match for your garage and your budget. Manufactured in the U.S.A., these cabinets are made from durable melamine with a heat-fused laminated finish. Each cabinet is outfitted with premium hardware, and is doweled and screwed for superior strength.

BREAK IT DOWN

Cabinets are a beautiful addition to any garage, and it's important that they match your style. Choose from Signature, Signature Elite, or Classic Series cabinets. We offer a wide range of colors and wood grains, as well as a variety of hardware choices.

Below and on the next page you will find the specs for all three series as well as colors and hardware options.

SIGNATURESERIES

Genuine Maple Butcher Block

// workbenches

Graphite Black

Faux Butcher Block

Stainless Steel

Only the best workbenches will do for the best in garage cabinets. Our Graphite Black and Faux Butcher Block countertops are made with the same heat-fused laminate construction as our cabinets. For a more unique look, we also offer Genuine Maple Butcher Block and Stainless Steel countertops which will provide a luxury look as well as a functional workstation in your garage.

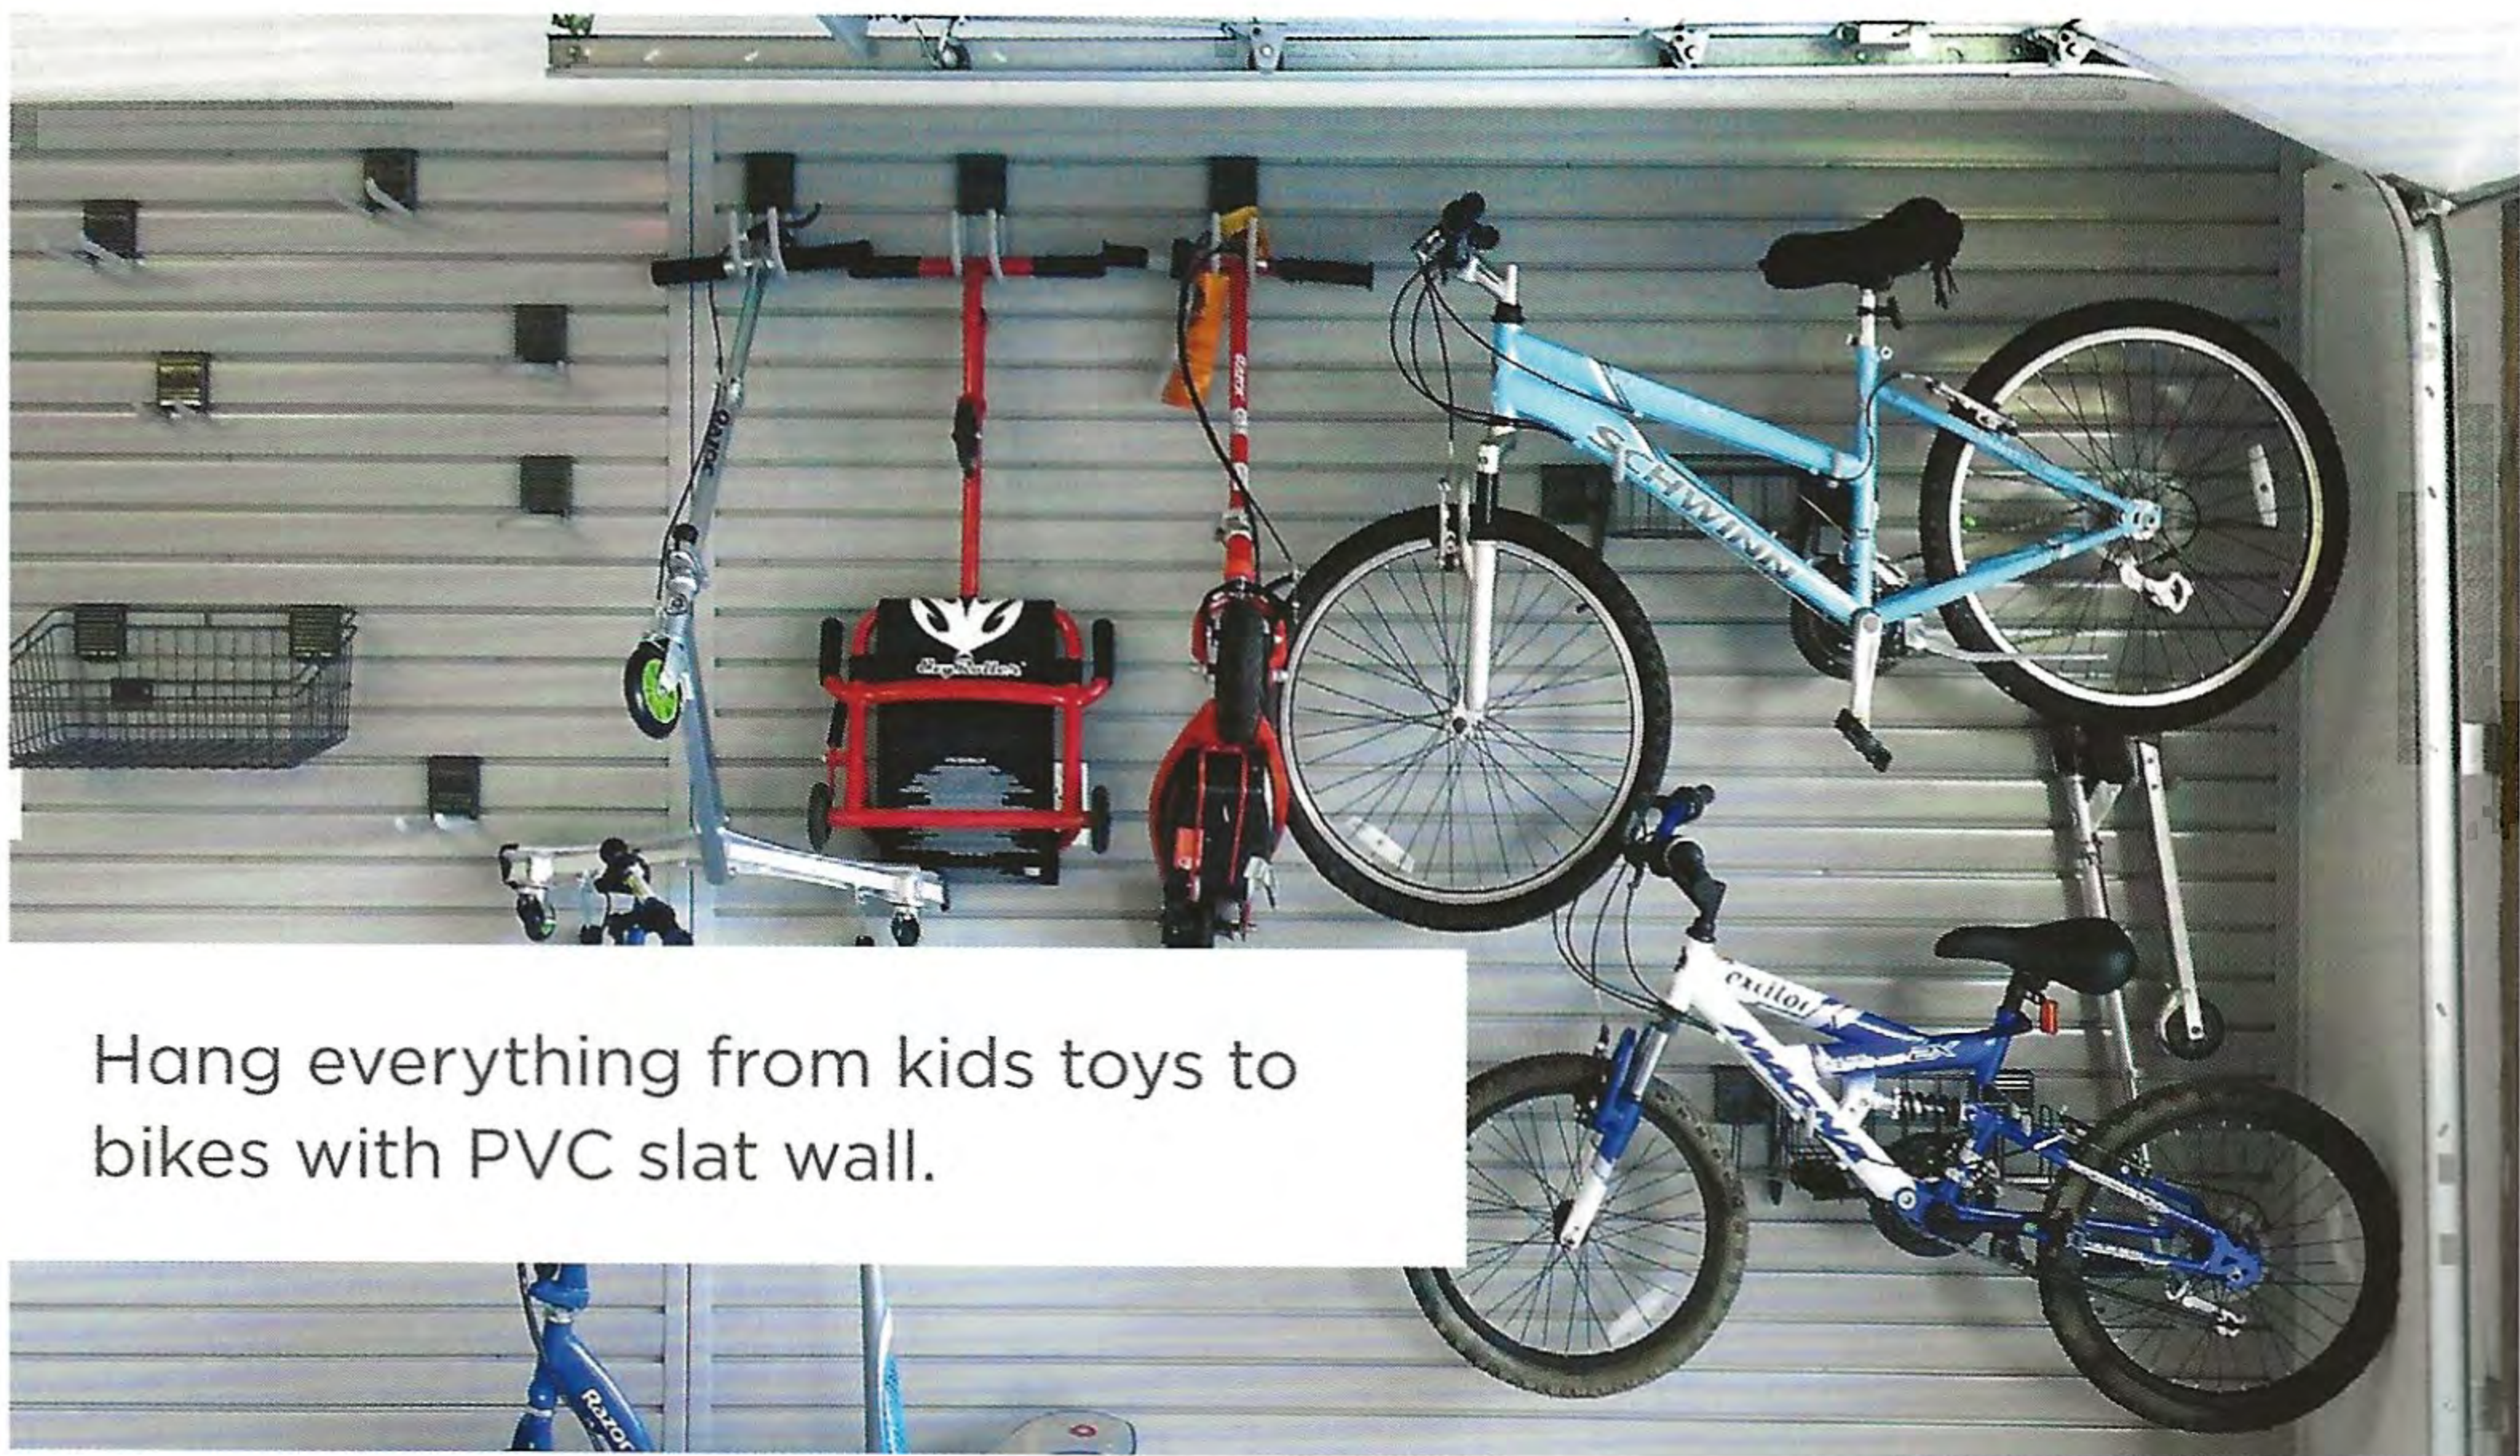

Our workbenches are available in 13 standard base cabinet configurations. Options include: 3.5", 7", and 15" high drawers, widths up to 36", and stainless steel full extension glides.

// wall organizers

Utility Racks use hooks & accessories to store virtually anything.

Hang everything from kids toys to bikes with PVC slat wall.

Our cellular PVC extruded slat wall is durable, waterproof, and stain resistant. It's available in a variety of finishes to compliment your garage. Our stocked accessories allow you to store or display your tools above your workbench. It can also be used anywhere in the garage to create adjustable wall storage.

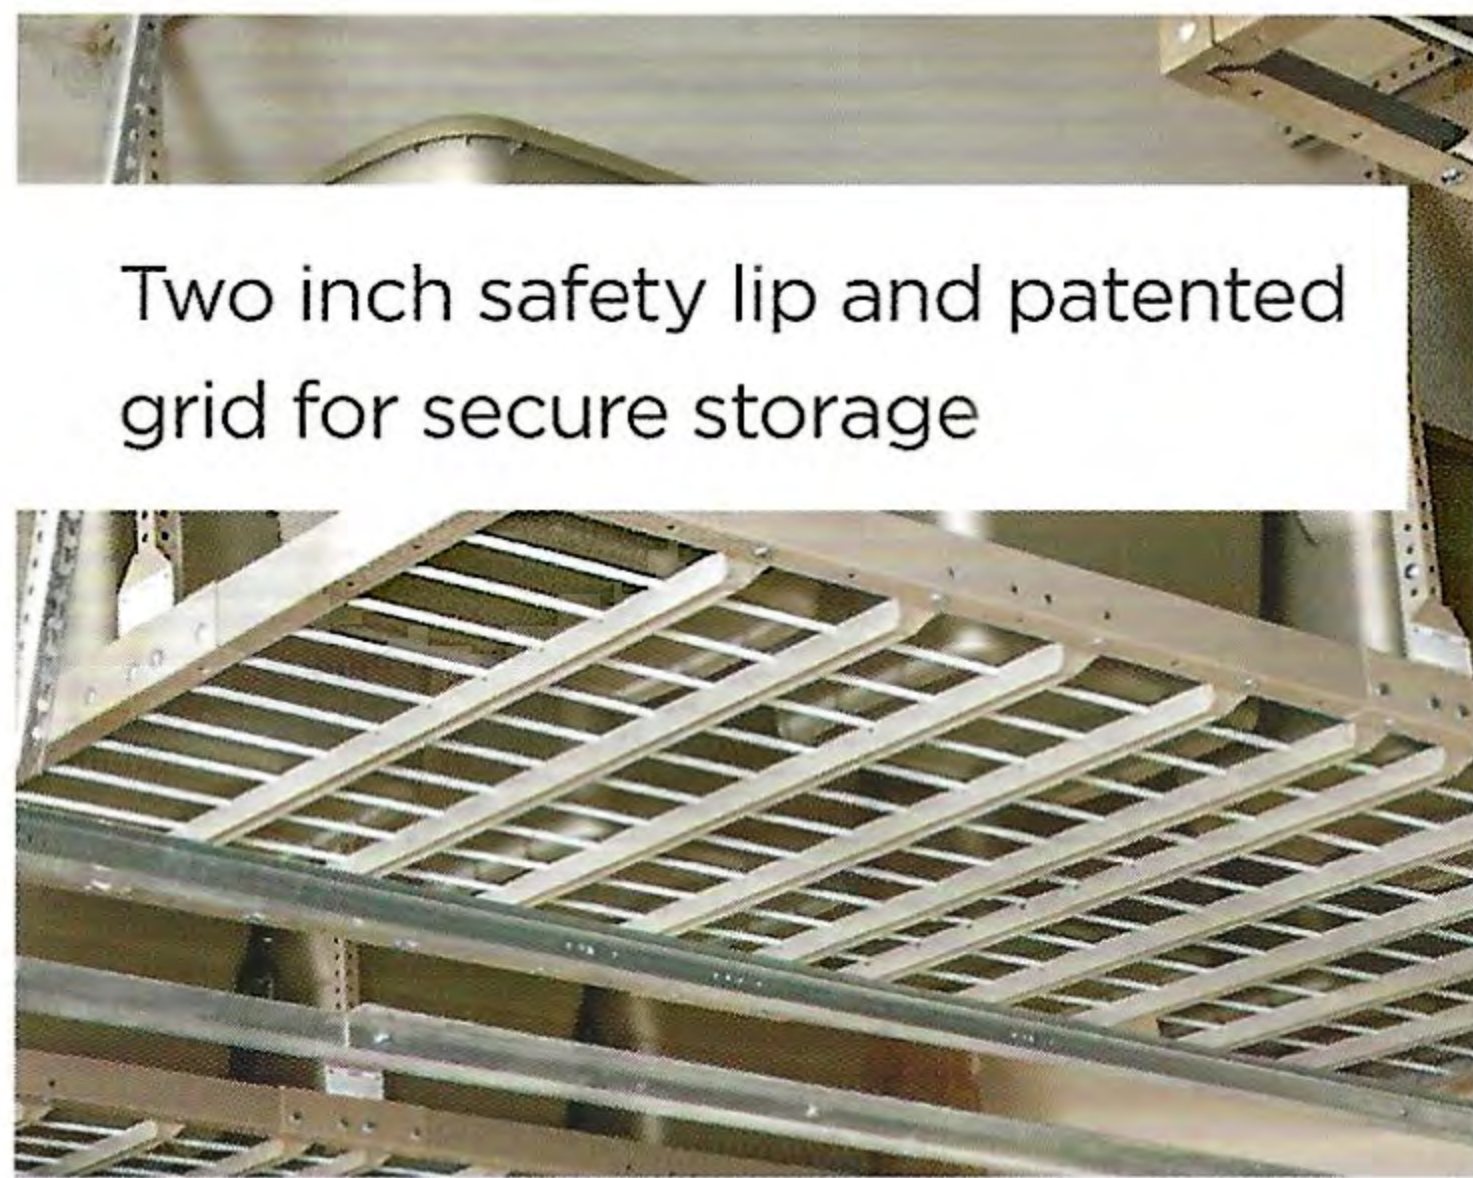

Utility Racks use the same adjustable bars from our shelving system and feature additional brackets to attach the bars to the wall. They can be used with all of the Monkey Bars hooks & accessories to store items where space is limited.

Desert Stone Ceiling Racks with Matching
Desert Stone Monkey Bars Shelving System

DESIGNERSERIES

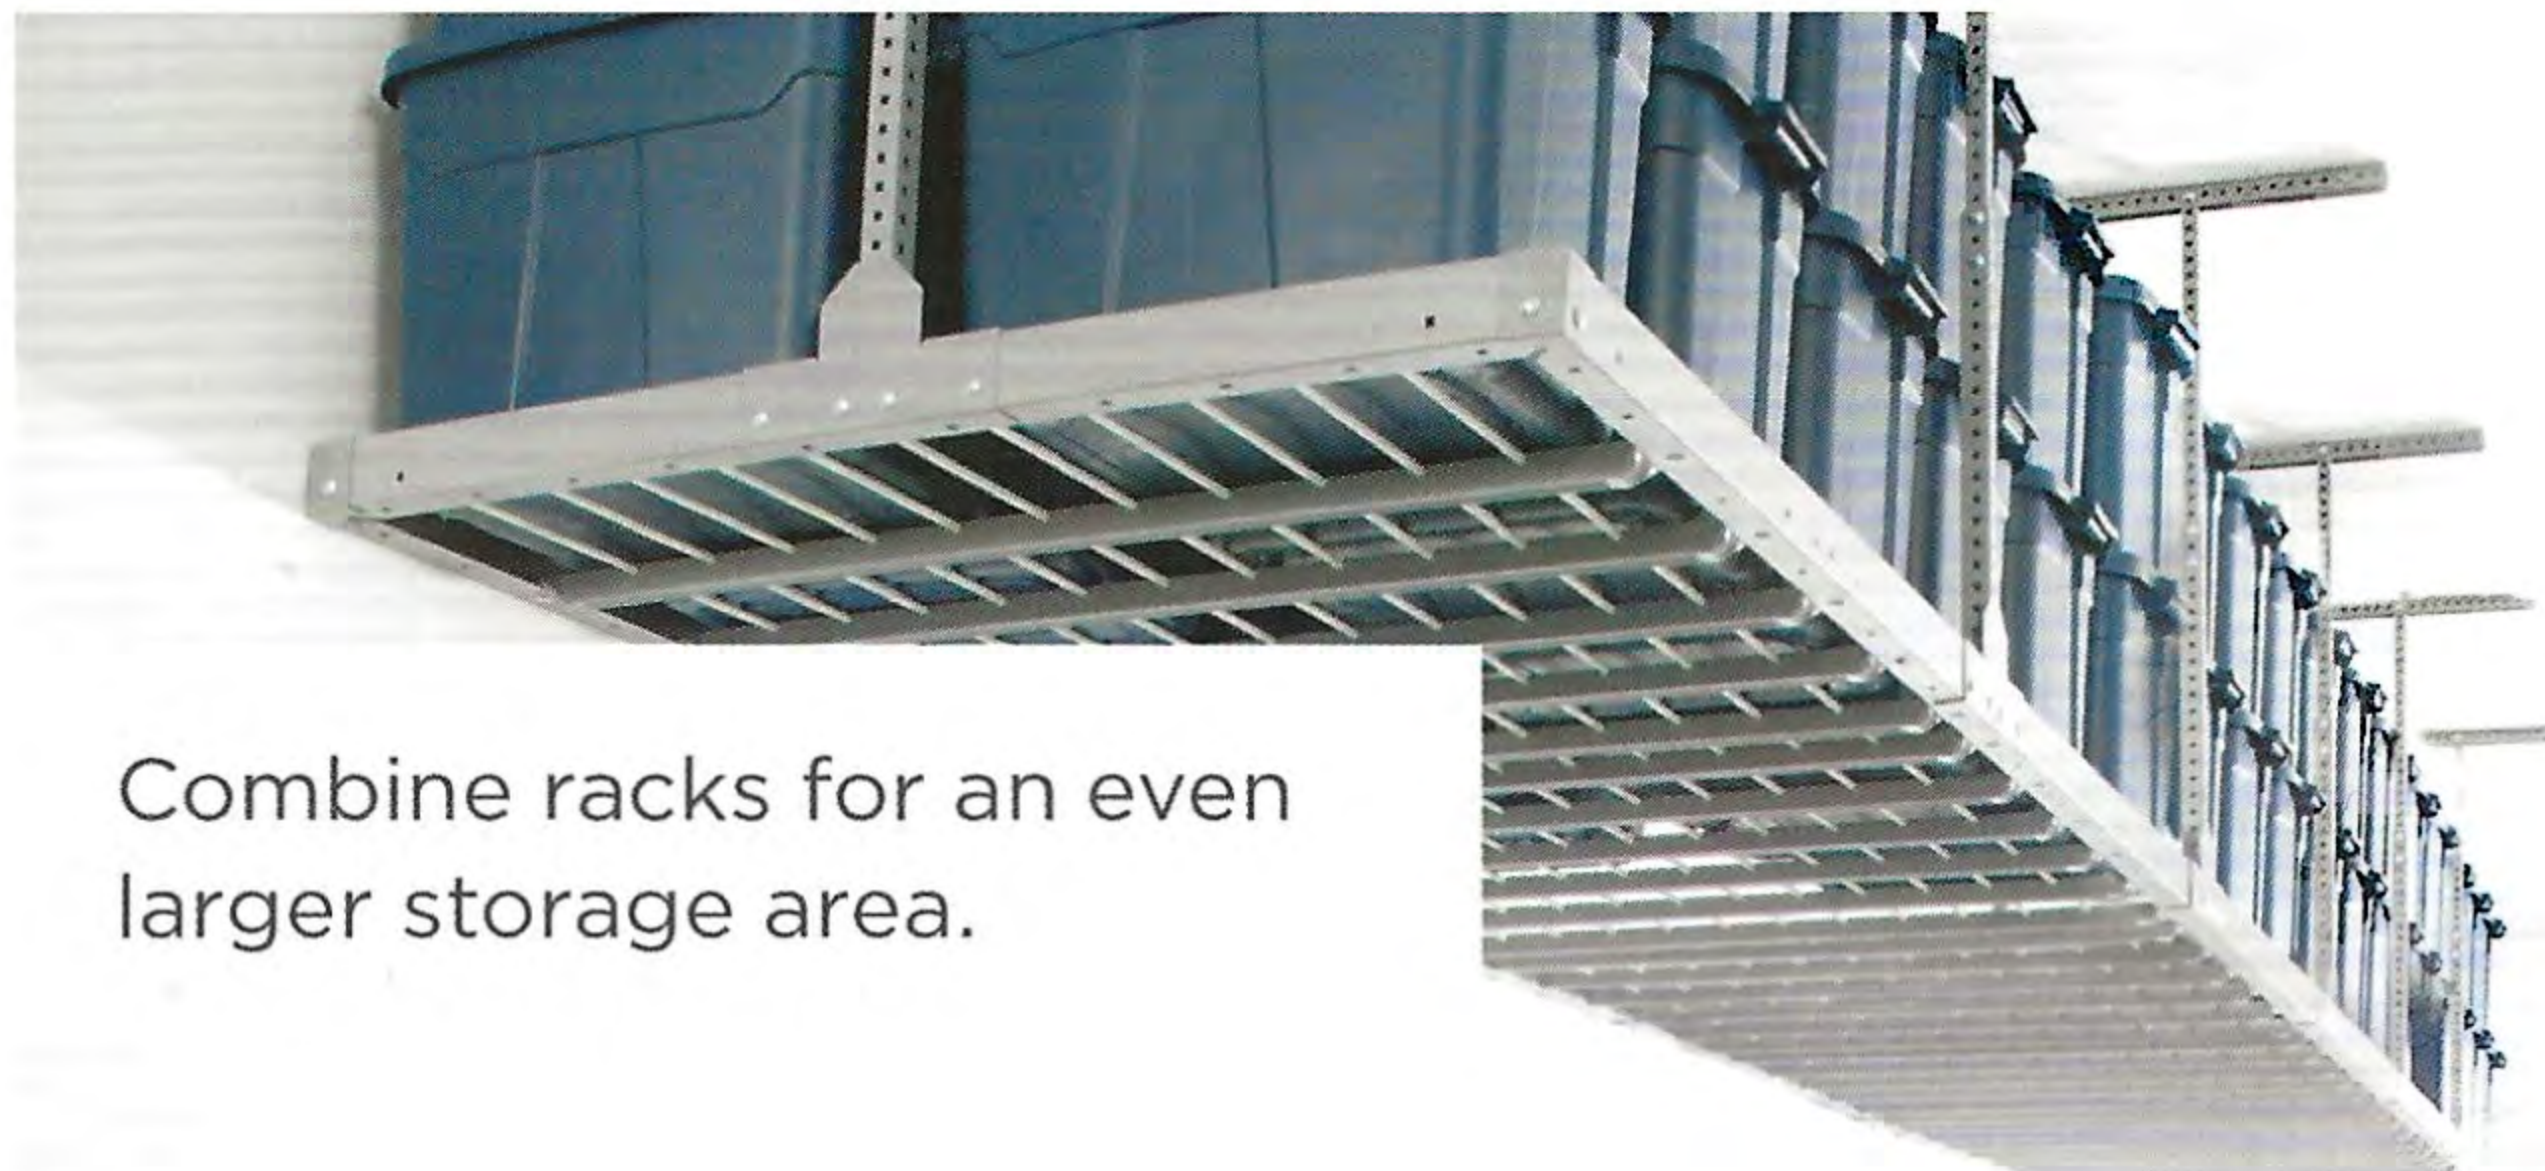

// overhead ceiling racks

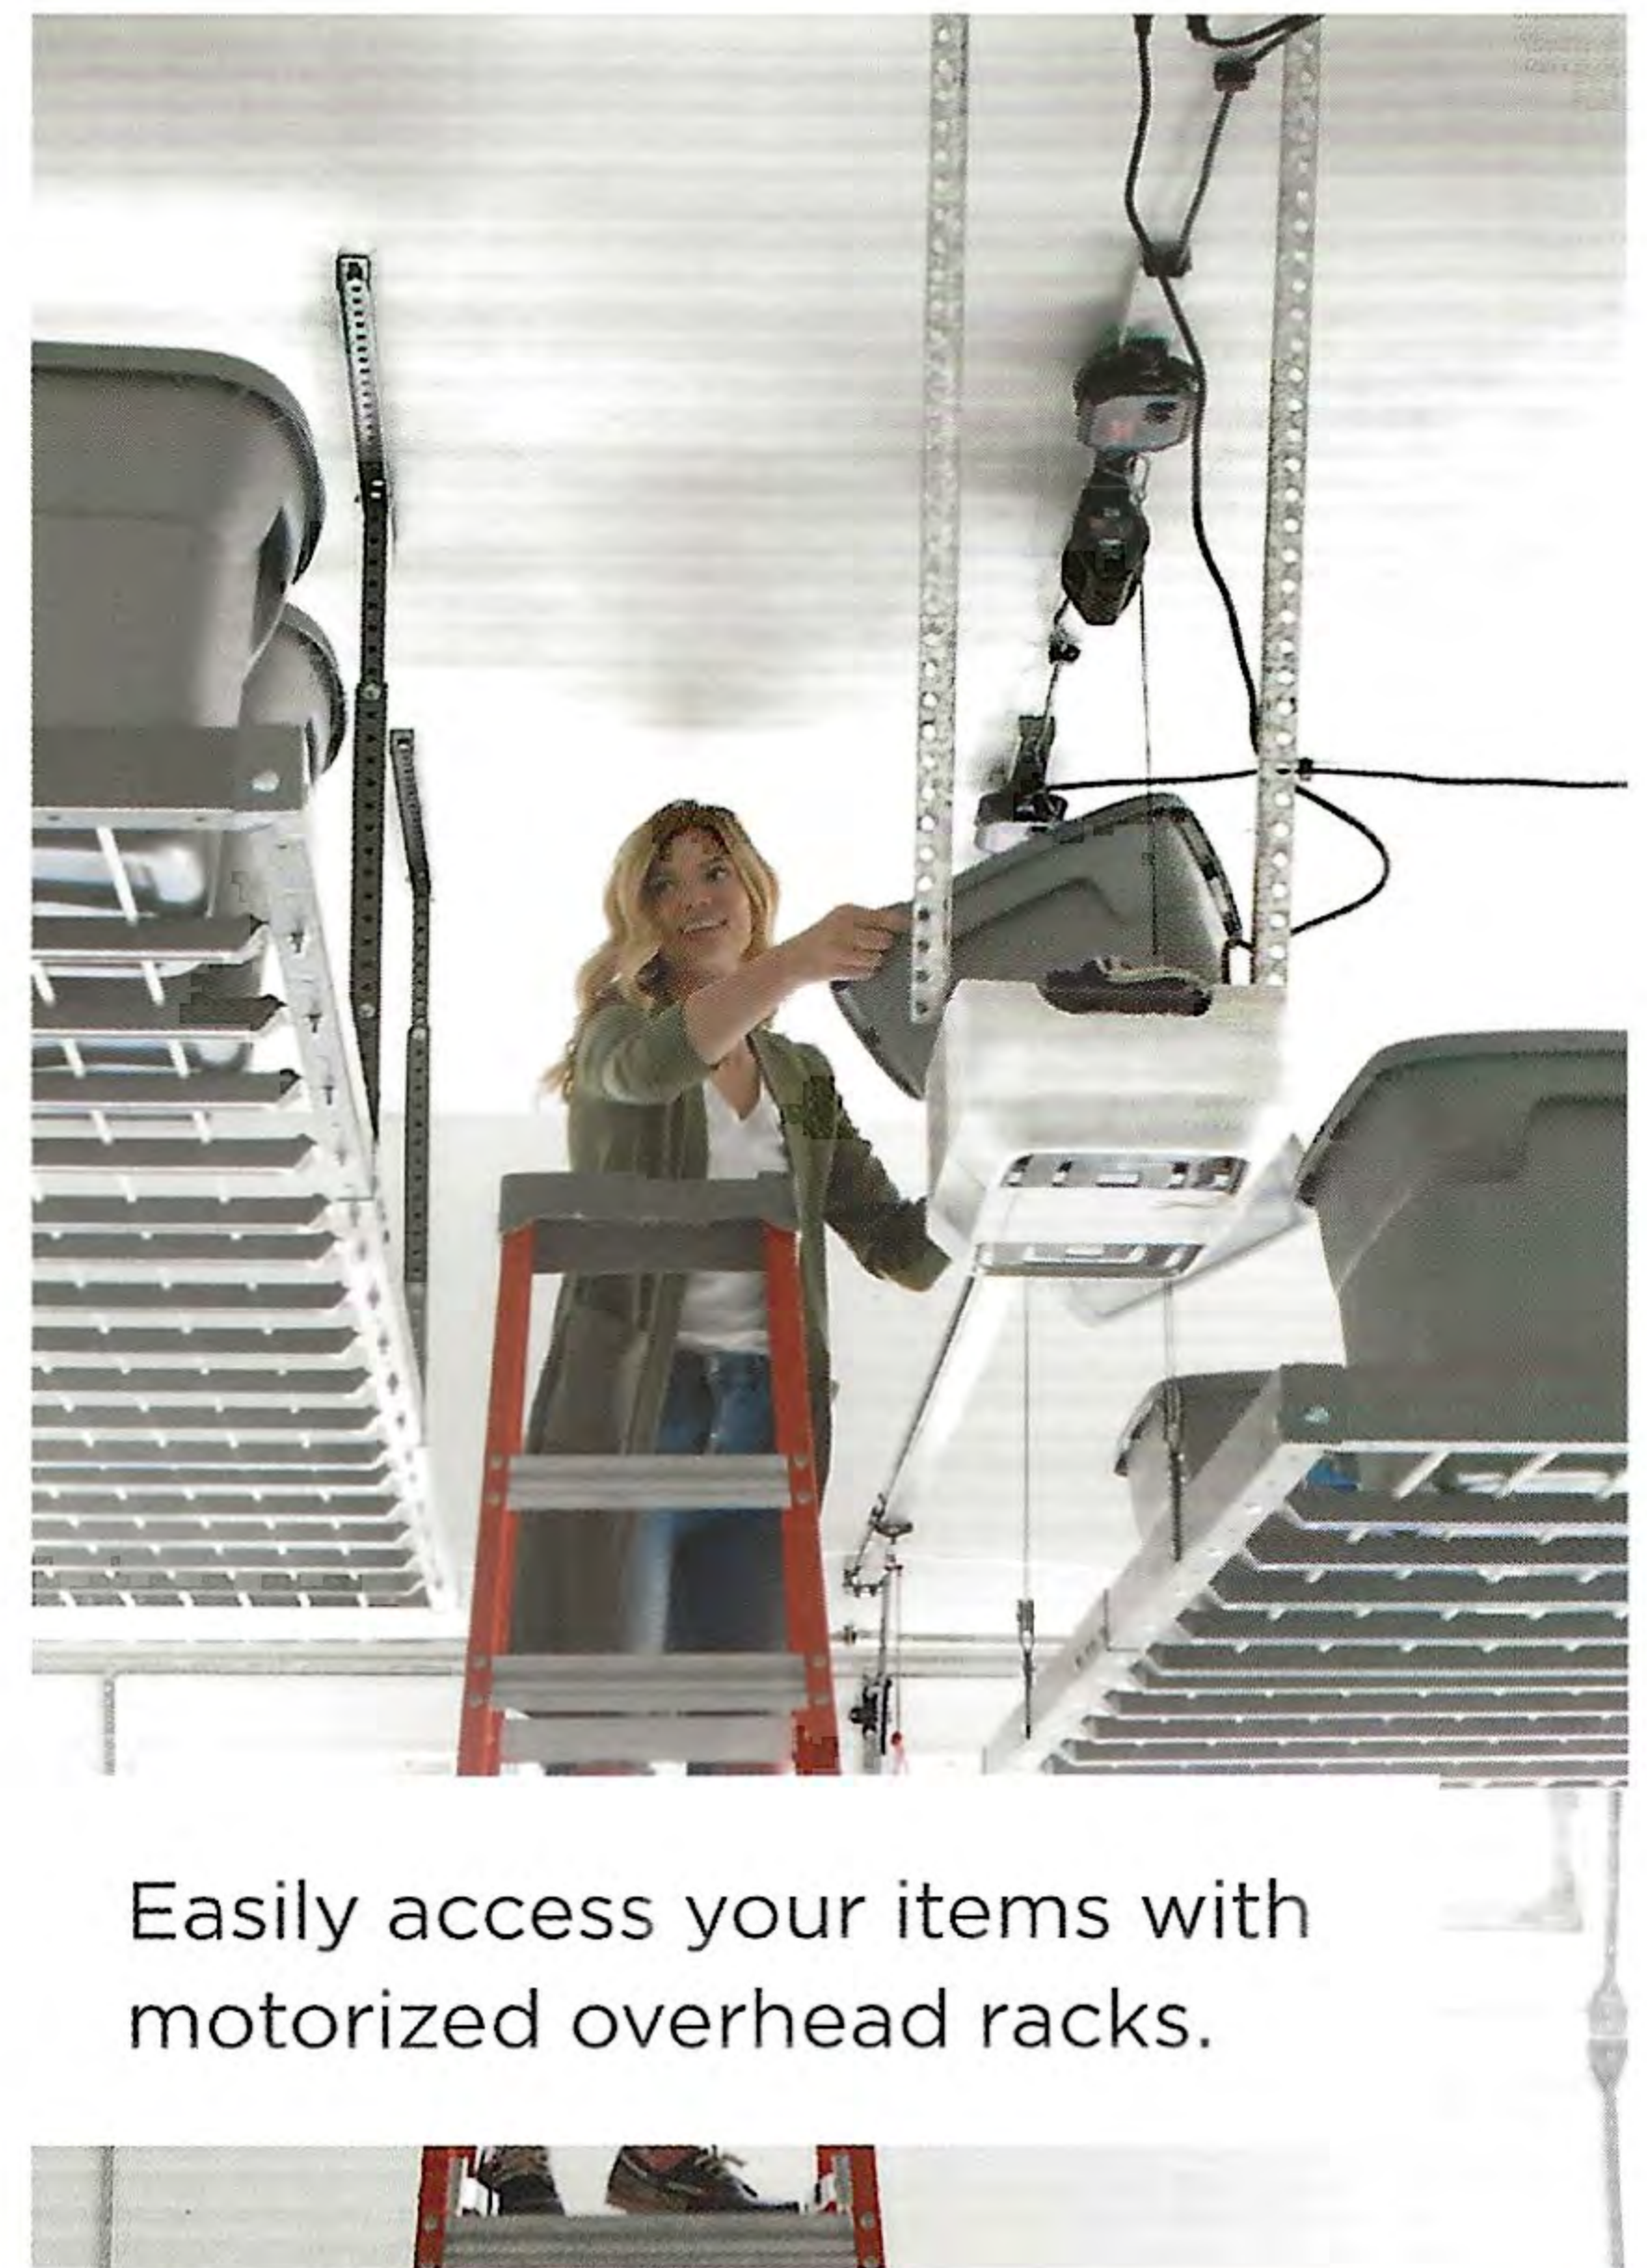

Two inch safety lip and patented grid for secure storage

Wall-mounted for 1000 lb capacity.

Combine racks for an even larger storage area.

Easily access your items with motorized overhead racks.

Keep your floor open and clear with overhead rack storage.

Overhead ceiling racks utilize the space above your garage doors for secondary long term storage. They are a great addition to the Monkey Bars shelving system and garage cabinets. The racks are available in Granite Gray, Desert Stone, or white and come in 3'x8' or, the more popular, 4'x8' size. The fixed racks can be completely suspended from the ceiling with a weight capacity of 750 lbs., or wall mounted to one side to increase the weight capacity to 1000 lbs. Supports are centered on each side to provide easy access to your items and span two ceiling joists for added safety. The motorized racks utilize Bluetooth technology to be controlled by your smart phone and can store up to 400lbs.

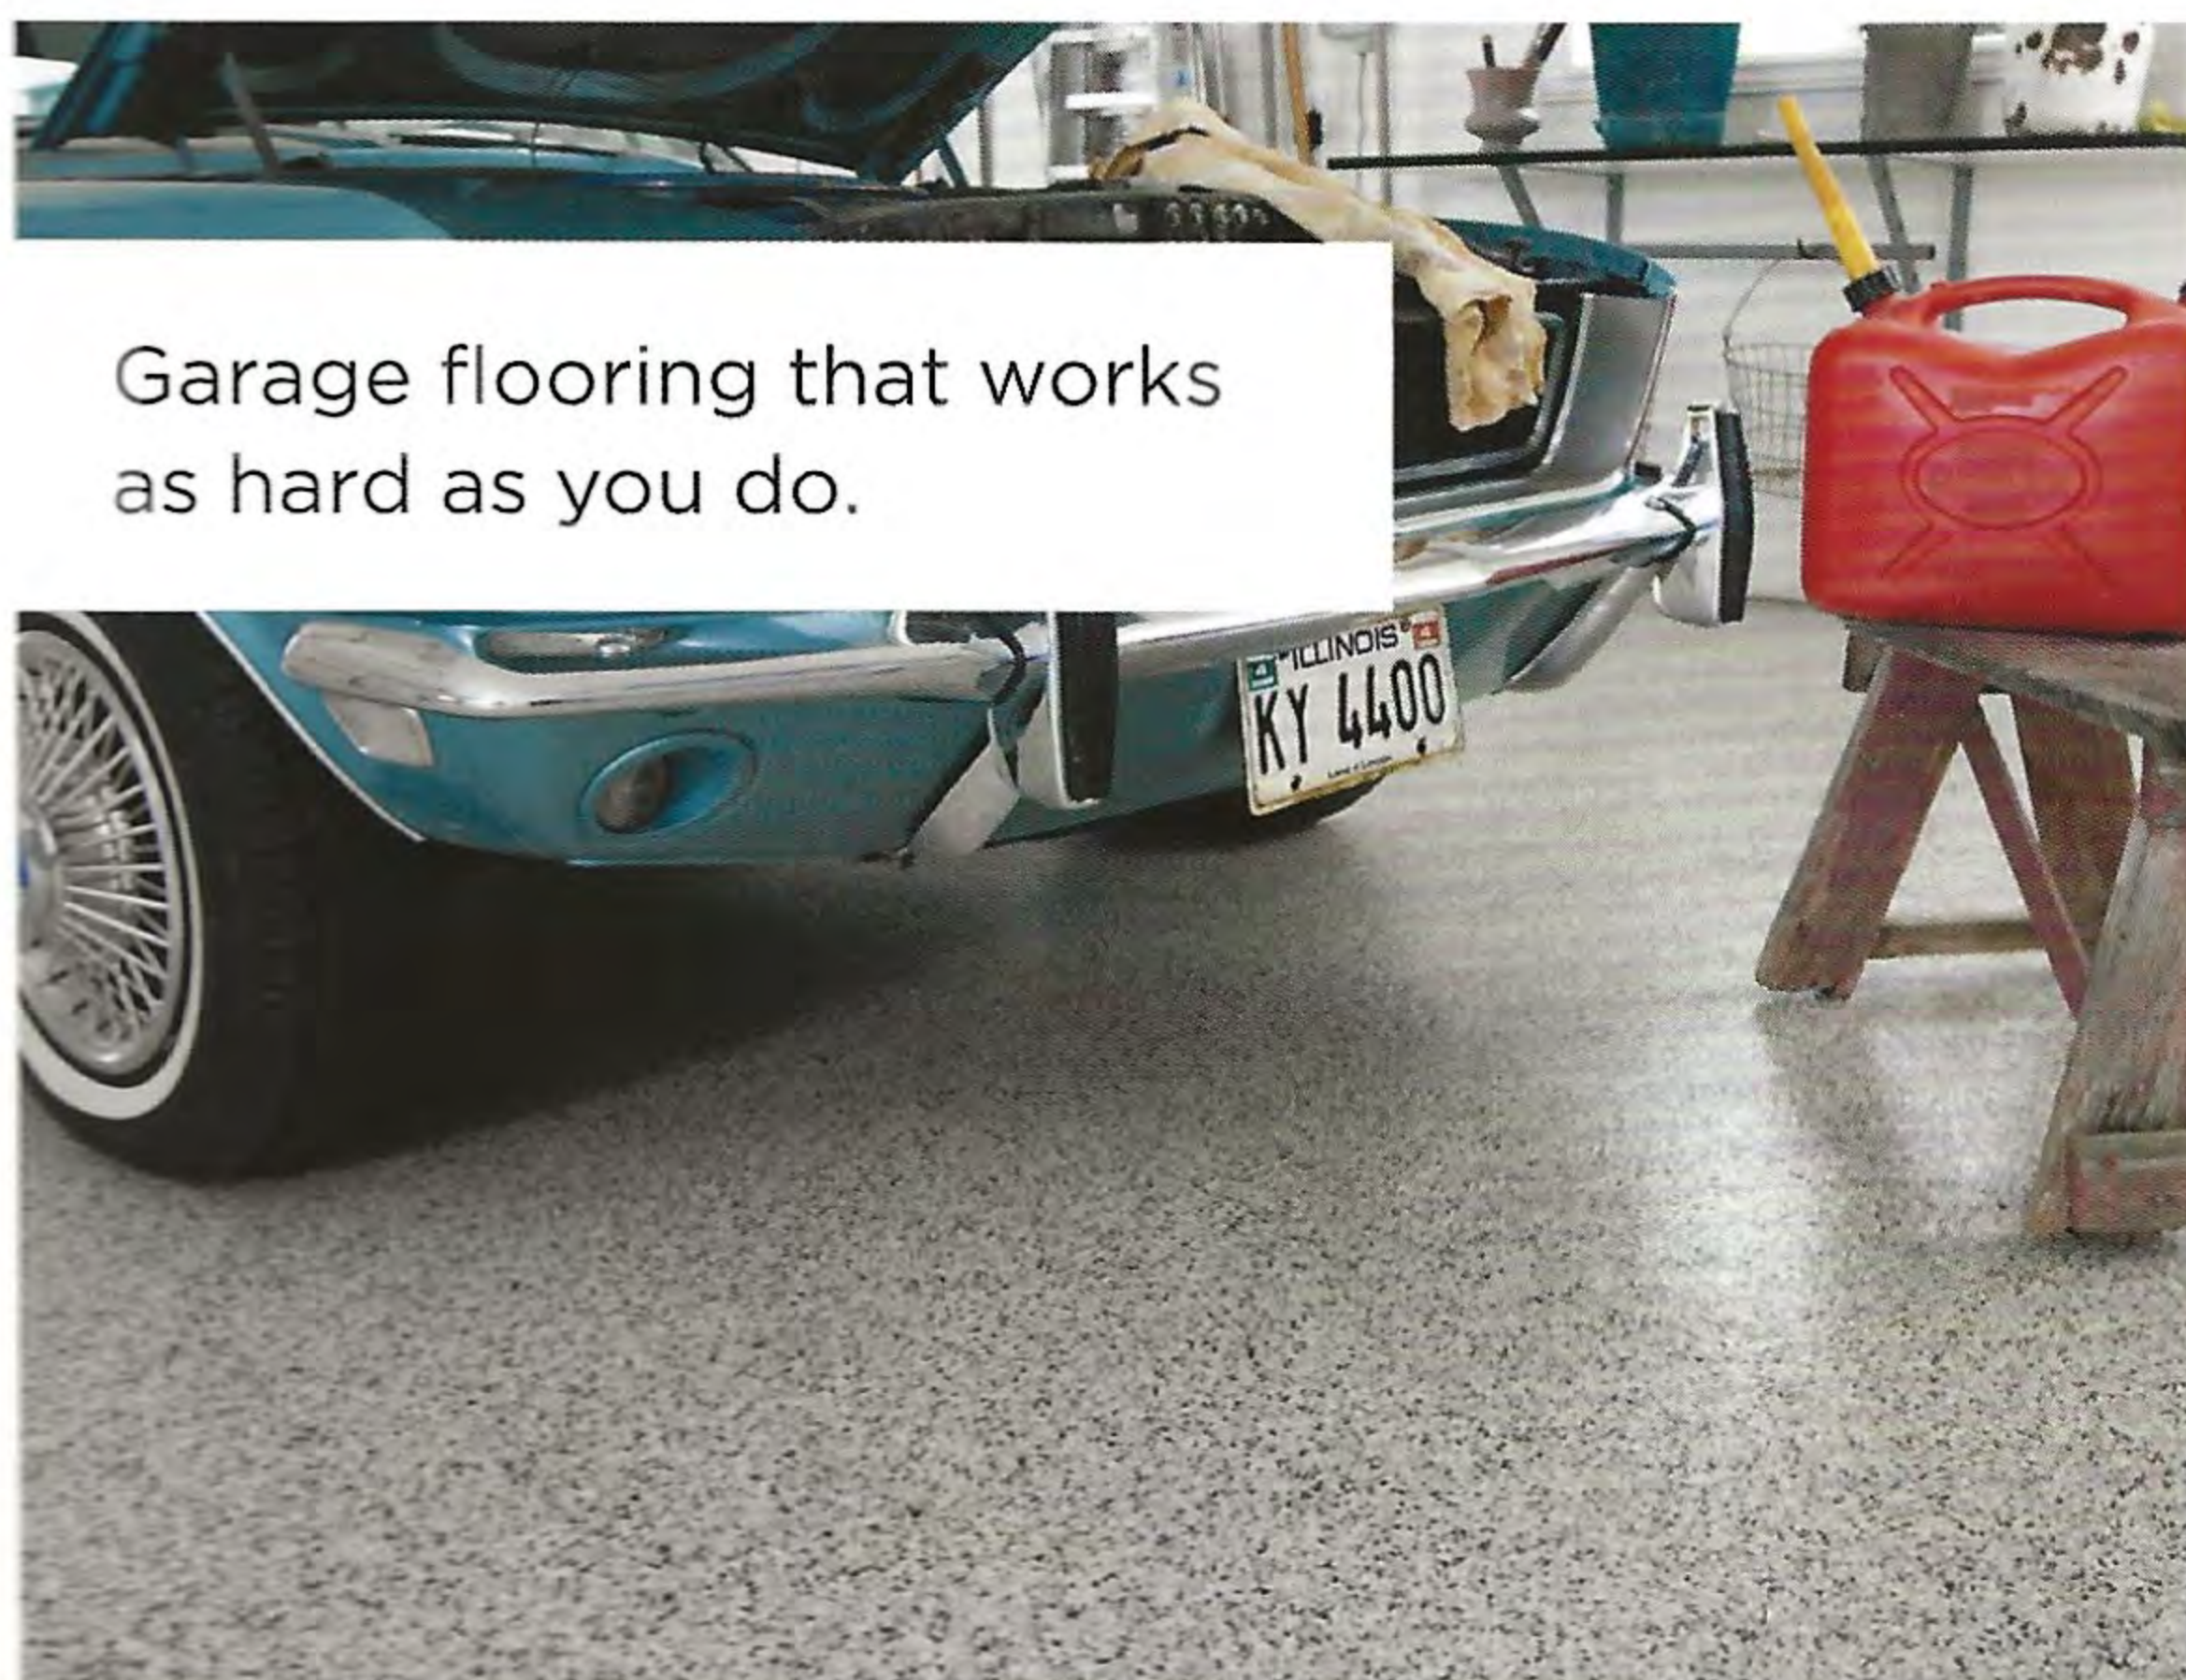

// floor coatings

Our garage floor coatings provide a lasting and attractive addition to any garage. Because of the flooring's chemical and scratch resistant properties, cleaning and maintaining your garage floor will be easier than ever. Combine flooring with Monkey Bars shelving and cabinets to get all of your things off the ground and your garage will be one to admire.

A fresh floor coating will make your garage feel brand new.

Garage flooring that works as hard as you do.

Compliment your garage and your toys.

BREAK IT DOWN

We offer a variety of durable floor coatings in both solid colors and our most popular, flake textured floor coatings. Flake sizes are 1/4" (standard) and 1/16" (micro). We offer UV stable floor coatings that will not fade or yellow.

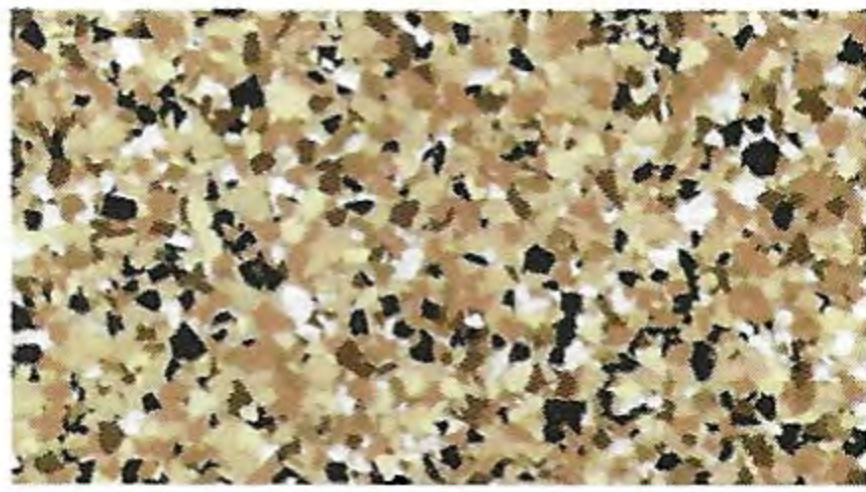

Preparation is key when installing floor coatings, especially in the garage. We diamond grind your concrete with specialized equipment to make the concrete porous. This allows the coating to permeate the concrete, which prevents "hot tire lift". In addition, we repair cracks and imperfections in your concrete surface to ensure a beautiful looking floor.

// garage floor tiles

Coming in numerous colors and styles, our garage floor tiles can instantly turn an ordinary garage from a concrete storage room into a true living space. These interlocking floor tiles are manufactured with UV stabilizers to resist fading for many years when exposed to sunlight. Tiled floors take only a few hours for our trained flooring techs to install. The quality and durability of our garage floor tiles make them the best modular flooring available.

Display your brand loyalties with custom logo tiles.

Great for motor sport parking pads.

Create a unique design with limitless color combinations.

HERE'S WHAT OUR CUSTOMERS ARE SAYING

"From the very first phone call, your team was extremely polite, expeditious in their work and had great recommendations for us to consider in organizing our garage."

- Macon & Jim J.

"My two-car garage is once again able to fit two cars! You left my garage clean and organized. I would highly recommend you to friends and family."

- Maggie K.

"Thank you so much! I just wanted to let you and your team know that we really love the final product! It's exactly what we needed and wanted. It's been a pleasure working with everyone."

- Courtney E.

"The space the Monkey Bar System generated in our garage is unbelievable. We were able to place all our garage items on this system. We now have room in our garage to do other things."

- Frank & Mary T.
