The Global Digital Health Monitor (GDHM) is a dynamic web-based platform and Digital Square Digital Health Public Good governed as a multistakeholder initiative by HealthEnabled with Ministries of Health, international agencies, and digital health experts to aid countries in prioritizing and monitoring their digital health investments.

The World Health Organization (WHO) is working, across all its six regions and with member-states, to amplify the use of the Global Digital Health Monitor as an official WHO maturity instrument. Under the new Global Initiative on Digital Health, we see the Monitor as an important tool to develop country plans and align limited resources towards building strong foundations. We’re really excited about this partnership and what it can do to support digital health transformation,” says Dr. Alain Labrique, Director, Department of Digital Health & Innovation at WHO.

40% of all countries in the world have completed the Global Digital Health Monitor in 2023.

What are the benefits for countries?

• Provides a platform to establish a baseline and measure year-on-year progress
• Helps policymakers to systematically identify and prioritize areas for investment to improve digital health maturity
• Enables Ministries of Health to advocate for the resources and partnerships they need to achieve digital transformation of health

What are the benefits for global stakeholders, including international agencies and private sector companies?

• International and regional agencies, such as WHO, UNICEF, Africa CDC, etc. use the GDHM to engage with countries on the development of national and regional digital health strategies and capacity building activities
• Bilateral and multilateral funding organizations, including the Global Fund and Gavi, the Vaccine Alliance, use the GDHM to prioritize and monitor areas of country investment for maximum impact
• Private sector companies de-risk investments by having visibility into the state of enablers needed for digital health interventions to be scaled and sustained within and across countries

Call to Action: Please help us mobilize all countries participating in 2024!
