SECTION 1. IDENTIFICATION OF THE MIXTURE AND SUPPLIER

1.1 Product Identifier:

Product name: Adhered Masonry Stone Veneer
Product code: Various
Formula: Mixture

1.2 Relevant identified uses of the substance or mixture and uses advised against:

Relevant identified uses: Interior or Exterior Wall or Surface Covering

1.3 Details of the supplier of the safety data sheet:

Manufacturer/Supplier: Baton LLC
Street Address: 1301 West Kentucky Street
City/State/Country/Postcode: Louisville, KY, USA 40210
Customer service telephone: 502-566-6006

1.4 Emergency telephone number:

Emergency telephone number: 855-299-3845

SECTION 2. HAZARDS IDENTIFICATION

2.1 Classification of the mixture:

This product is an article as defined in the OSHA Hazard Communication Standard [29 CFR 1910.1200(c)] and is exempt from regulatory requirements when handled as a manufactured item. This SDS contains additional health hazard information related to dust generation during construction.

An SDS not is required for articles; however, this SDS is provided to communicate hazards associated where activities related to the Adhered Masonry Stone Veneer (cutting, grinding, crushing, drilling or breaking) may result in the release of a hazardous substance in DUST. AirStone is to be cut using a hand-held hacksaw to keep airborne silica levels below the PEL (Permissible Exposure Limit).

GHS Classification(s) for Adhered Masonry Stone Veneer according to OSHA Hazard Communication Standard (29 CFR 1910.1200) under normal handling conditions:

None
GHS Classification(s) for dust generated from cutting, grinding, crushing, drilling or breaking of Adhered Masonry Stone Veneer according to OSHA Hazard Communication Standard (29 CFR 1910.1200) under use conditions that may result in the release of hazardous substances:

Skin Corrosion/Irritation, Category 2 (H315)
Eye Damage/Irritation, Category 2 (H319)
Specific Target Organ Toxicity—Repeated Exposure (STOT–RE), Category 1 (H372)

Note: The AMSV dust classifications are based on (1) individual ingredient classifications (i.e., Silica Sand [SiO₂], expanded clay, expanded glass, Portland Cement, slag, etc.), (2) the final chemical composition of the AMSV (based on cement chemistry) and (3) the form of the material (dust). Further, the Specific Target Organ Toxicity—Repeat Exposure is a conservative classification based on the potential presence of respirable crystalline silica. Baton LLC has not performed analysis for the presence of respirable crystalline silica under these handling conditions.

Additional information:
For full text of GHS Hazard statements (H-statements) and associated Precautionary statements (P-statements), see below.

2.2 Label elements

The Hazard Pictograms, Signal Word and Precautionary Statements only apply to activities that may release hazardous substances from the AMSV (i.e., cutting / grinding / crushing / drilling / breaking).

No Hazard Pictograms, Signal Word or Precautionary Statements are applicable to the Adhered Masonry Stone Veneer.

Hazard Pictograms that apply to the dust generated from cutting, grinding, crushing, drilling or breaking of the Adhered Masonry Stone Veneer:

Signal Word: Danger
Hazard Statements: H315: Causes skin irritation.
H319: Causes eye irritation.
H372: Causes damage to lungs through prolonged or repeated inhalation exposure.

Precautionary Statements: P260: Do not breathe dust.
P270: Do not eat, drink or smoke while using this product.
P271: Use only outdoors or in a well-ventilated area.
P264: Wash thoroughly after handling.
P280: Wear protective gloves/protective clothing/eye protection/face protection.
P302 + P352: IF ON SKIN: Wash with plenty of water.
P304 + P340: IF INHALED: Remove person to fresh air and keep comfortable for breathing.
P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

2.3 Other hazards related to AMSV dust generated from cutting, grinding, crushing, drilling or breaking of adhered masonry stone veneer.

Listed Carcinogens: Silica dust (respirable, crystalline fraction) in the form of quartz.

IARC: Yes  NTP: Yes  OSHA: No  Other: No (European Union)

Hazardous Properties: Dust generated from cutting, grinding, crushing, drilling or breaking may cause eye damage and skin irritation. May be irritating to respiratory tract. Respirable crystalline silica may cause damage to lungs upon repeated inhalation exposures.

SECTION 3. COMPOSITION / INFORMATION ON INGREDIENTS

3.1 Description of Product:
Concrete matrix article.

Note: This product contains additional not classified substances at low concentrations that do not contribute to the hazards of this product.
SECTION 4. FIRST AID MEASURES

4.1 Description of first aid measures:

Inhalation: If dust generated from cutting, grinding, crushing, drilling or breaking is inhaled, remove person to fresh air and keep comfortable for breathing. Get medical attention if respiratory symptoms persist.

Skin contact: If dust generated from cutting, grinding, crushing, drilling or breaking is on skin, wash with soap and water. Get medical advice/attention if irritation occurs/persists.

Eye contact: If dust generated from cutting, grinding, crushing, drilling or breaking is in eyes, rinse cautiously with water for several minutes. Get medical advice/attention if irritation occurs/persists.

Ingestion: No specific first aid measures are required.

4.2 Most important health effects related to AMSV dust generated from cutting, grinding, crushing, drilling or breaking, both acute and delayed:

Acute effects: Direct exposure to dust generated from cutting, grinding, crushing, drilling or breaking may cause eye damage/irritation, skin irritation and respiratory irritation. Dust can dry and irritate the skin and cause dermatitis. Can irritate eyes and skin through mechanical abrasion.

Delayed effects: Chronic exposure to inhaled dust generated from cutting, grinding, crushing, drilling or breaking may cause lung damage from repeated exposure. Chronic inhalation of dusts containing free crystalline silica may result in silicosis.

SECTION 5. FIREFIGHTING MEASURES

5.1 Extinguishing Media:

Suitable extinguishing media: Product is not flammable. Use extinguishing media appropriate for surrounding fire.

 Unsuitable extinguishing media: Not applicable; the product is not flammable.

5.2 Special hazards arising from the substance or mixture:

Hazardous combustion products: None known.

5.3 Advice for firefighters:

Special protective equipment and precautions for firefighters: As with any fire, wear self-contained breathing apparatus, MSHA/NIOSH (approved or equivalent) and full protective gear.
SECTION 6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures associated with AMSV dust generated from cutting, grinding, crushing, drilling or breaking:

For Non-Emergency Personnel:

Protective equipment: In case of exposure to dust generated from cutting, grinding, crushing, drilling or breaking, wear specified protective equipment. (See Section 8).

Emergency procedures: Avoid the creation of dust generated from cutting, grinding, crushing, drilling or breaking. Use scooping, water/flushing/misting or vacuum cleaning systems. Wet methods of cutting, grinding, crushing, drilling or breaking are the preferred method of controlling dust.

For Emergency Responders:

Protective equipment: In case of exposure to dust generated from cutting, grinding, crushing, drilling or breaking, wear specified protective equipment. In case of fire, use self-contained breathing apparatus with full face mask.

6.2 Environmental Precautions
Discard any product or dust residue in compliance with local regulations.

6.3 Methods and material for containment and cleaning up:

For containment and cleaning up: After cutting, grinding, crushing, drilling or breaking activities, use scooping, water spraying/flushing/misting or ventilated vacuum cleaning system to clean up dust generated from cutting, grinding, crushing, drilling or breaking. Use closed containers. Do not use pressurized air to clean dust.

Other information: Take measures to avoid dust formation during cutting, grinding, crushing, drilling or breaking activities.

SECTION 7. HANDLING AND STORAGE

7.1 Precautions for safe handling:

Protective measures: Avoid contact with dust generated from cutting, grinding, crushing, drilling or breaking with skin, eyes, and clothing. Avoid breathing dust. Wash thoroughly after handling. Wet methods of cutting, grinding, crushing, drilling or breaking are the preferred method of controlling dust.

Measures to prevent fires: Not applicable; material is non-flammable.

Measures to prevent dust generation: Vacuum, scoop, or use water mist/spray/flush to remove generated dust during cutting, grinding, crushing, drilling or breaking activities. Do not use pressurized air. Wet methods of cutting, grinding, crushing, drilling or breaking are the preferred method of controlling dust.

Measures to protect the Not applicable; material is not an environmental hazard.
Advice on general occupational hygiene: Practice good housekeeping. Avoid formation of dust generated from cutting, grinding, crushing, drilling or breaking. Do not breathe dust. Use adequate exhaust ventilation, dust collection and/or water mist to maintain airborne dust concentrations below permissible exposure limits. Respirable crystalline silica dust may be in the air without a visible dust cloud. In case of insufficient ventilation, wear a NIOSH approved respirator for silica dust when using, handling, storing or disposing dust from this product. Do not permit dust to collect on walls, floors, sills, ledges, machinery, or equipment. Maintain and test ventilation and dust collection equipment. Wash or vacuum clothing that has become dusty. Avoid eating, smoking, or drinking while handling the material.

7.2 Conditions for safe storage, including any incompatibilities:
Storage conditions: Minimize dust produced during loading and unloading.

SECTION 8. EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1 Exposure Limits
The following exposure limits are based on a time-weighted full-shift exposure, unless otherwise noted

NOTES:
1. OSHA PEL (Permissible Exposure Level at 29 CFR 1910.1000)
2. ACGIH-TLV (American Conference of Governmental Industrial Hygienists-Threshold Limit Values 2015)
3. NIOSH REL (National Institute for Occupational Safety & Health Recommended Exposure Limit)
4. Canadian Provincial and other national control parameters are listed on the Supplement
8.2 Exposure controls:

8.2.1. Exposure Controls

Engineering controls: Ventilation should be adequate to maintain the ambient workplace atmosphere below the exposure limit(s). Use general and local exhaust ventilation and dust collection systems as necessary to minimize exposure to dust generated from cutting, grinding, crushing, drilling or breaking. Wet methods of cutting, grinding, crushing, drilling or breaking are the preferred method of controlling dust.

8.2.2. Personal Protective Equipment

Respiratory protection: Wear a NIOSH/MSHA approved particulate respirator if exposure to dust generated from cutting, grinding, crushing, drilling or breaking is unavoidable and where occupational exposure limits may be exceeded. If airborne dust exposures exceed the PEL or TLV, a self-contained breathing apparatus or airline respirator is recommended.

Eye and face protection: If eye contact with dust generated from cutting, grinding, crushing, drilling or breaking is anticipated, wear protective glasses with side shields. Avoid contact lenses.

Hand and skin protection: Wear gloves and protective clothing to minimize skin contact with dust generated from cutting, grinding, crushing, drilling or breaking. Wash hands with soap and water after contact with material.

Foot protection: Wear American National Standards Institute (ANSI) approved hard-toed safety shoes when handling AMSV.

8.2.3. Environmental Exposure Controls

Instructions to prevent exposure: No special requirements. Discard any product or dust residue in compliance with local regulations. Wet methods of cutting, grinding, crushing, drilling or breaking are the preferred method of controlling dust.

SECTION 10. STABILITY AND REACTIVITY

10.1 Reactivity                      Stable inert material
10.2 Chemical stability              Stable inert material
10.3 Possibility of hazardous reactions None known.
10.4 Conditions to avoid              None known
10.5 Incompatible materials          None known
10.6 Hazardous decomposition products None known

SECTION 11. TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects:

Acute toxicity: No data is available on the AMSV dust generated from cutting, grinding, crushing, drilling or breaking. No ingredients within the mixture exhibit acute toxicity.

Skin corrosion/irritation: Contact with dust may cause skin irritation.

Serious eye damage / irritation: Eye Irritant. Eye contact with dust generated from cutting, grinding, crushing, drilling or breaking may cause eye irritation.

Respiratory or skin sensitization: No data is available on the AMSV dust generated from cutting, grinding, crushing, drilling or breaking. No ingredients exhibit sensitization effects.

Germ cell mutagenicity: No data is available on the AMSV dust generated from cutting, grinding, crushing, drilling or breaking. No ingredients exhibit mutagenic effects.

Carcinogenicity: No data is available on the AMSV dust generated from cutting, grinding, crushing, drilling or breaking. Crystalline silica (respirable) has been identified as a carcinogen by IARC and NTP.

Reproductive toxicity: No data is available on the AMSV dust generated from cutting, grinding, crushing, drilling or breaking. No ingredients exhibit reproductive toxicity.

STOT single exposure: No data is available on the AMSV dust generated from cutting, grinding, crushing or drilling.

STOT repeated exposure: No data is available on the repeated inhalation of AMSV dust generated from cutting, grinding, crushing, drilling or breaking. Repeated inhalation of AMSV dust generated from cutting, grinding, crushing or breaking may cause lung damage if respirable crystalline silica is present. Crystalline silica (respirable) has been shown to cause silicosis after repeated exposure.

Aspiration hazard: Not applicable, the material is not a liquid.
SECTION 12. ECOLOGICAL INFORMATION

No data available on the AMSV dust generated from cutting, grinding, crushing, drilling or breaking.

SECTION 13. DISPOSAL CONSIDERATIONS

Considered a non-hazardous waste. Follow applicable federal, state and local regulations.

SECTION 14. TRANSPORT INFORMATION

Regulatory Entity

US DOT
Shipping Name: Not regulated
Hazard Class: Not regulated
ID Number: Not regulated
Packing Group: Not regulated

SECTION 15. TOXICOLOGICAL INFORMATION

15.1 Safety, health and environmental regulations / legislation specific to the mixture:

United States Regulations

Toxic Substances Control Act (TSCA) Inventory Status
SARA (Section 311/312) All components of this product are listed on the TSCA Inventory or are exempt from listing.
Reactive Hazard No
Pressure Hazard No
Fire Hazard No
Immediate/Acute Toxicity No
Delayed/Chronic Toxicity Yes – respirable crystalline silica

SARA Section 313 Information: This product does not contain any toxic chemicals listed under 313 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA).

Clean Air Act (CAA) This product does not contain any toxic chemicals listed under the CAA at concentrations greater than 0.1%.
VOC Content (weight %). 0 wt. %
Product: Adhered Masonry Stone Veneer (AMSV)

SDS No: 010 Preparation Date: 08/01/2015
Version No.: 1.0 Supersedes Date: 05/01/2010

United States Regulations
Volatile Organic Compounds (VOCs)
State Right-to-Know Status
Remarks: Estimated
California Prop. 65: Crystalline Silica.
Silica, Crystalline-Quartz; Calcium oxide; Calcium carbonate (Limestone); Portland cement; Iron oxide dust.

Massachusetts: Silica, Crystalline-Quartz; Calcium oxide; Calcium carbonate (Limestone); Portland cement; Iron oxide dust.

New Jersey: Silica, Crystalline-Quartz; Calcium oxide; Calcium carbonate (Limestone); Cement, Portland, Chemicals; Iron oxide.

Pennsylvania: Quartz (silica dioxide); Calcium oxide; Calcium carbonate (Limestone); Cement, Portland, Chemicals; Iron oxide.

SECTION 16. OTHER INFORMATION

16.1 Indication of changes:
Initial SDS prepared on 04-07-2015; Revised 12/07/2015

16.2 Abbreviations and acronyms:
AMSV Adhered Masonry Stone Veneer
ANSI: American National Standards Institute
CAA: Clean Air Act
Cal/OSHA: California Department of Industrial Relations - Division of Occupational Safety and Health
CAS: Chemical Abstract Service Registry Number

Component Related Regulatory Information
This product may be regulated, have exposure limits or other information identified as the following: Silica, crystalline (general form).

Component Information/Information on Non-Hazardous Components
As provided, this product is expected to produce minimal if any hazards. However, if dust is generated, this product would be considered hazardous under 29 CFR 1910.1200 (Hazard Communication).

As provided, this material is in a cured form and the above listed components are not readily available, however if dusts are generated, these components may be present.

— End of Safety Data Sheet (SDS) —
SECTION 3 - HAZARDS IDENTIFICATION

Appearance and Odor: Cured concrete product of various shapes, sizes and colors.

Emergency Overview:
- No unusual conditions are expected from this product.
- Inhalation of dusts produced during cutting, grinding or sanding of this product may cause irritation of the respiratory tract.

Potential Health Effects

Inhalation:
Dusts of this product may cause irritation of the nose, throat, and respiratory tract. This product contains silica as a contaminant. Prolonged and repeated inhalation of respirable crystalline silica can cause silicosis, a chronic lung disease characterized by fibrosis and scarring of the lung tissue resulting in a decrease in lung function, breathlessness, wheezing, coughing and sputum production. Short term overexposures to extremely high concentrations of respirable crystalline silica can produce acute silicosis. Acute silicosis is a disease that can rapidly progress within months of initial overexposure and reportedly has caused death within 1 to 2 years.

Skin Contact:
Dust from this product may cause itching and short term irritation.

Eye Contact:
Dust from this product may cause slight irritation to the eyes, including redness, tearing and blurred vision.

Ingestion:
Ingestion of this product is unlikely. However, ingestion of product may produce gastrointestinal irritation and disturbances.

Medical Conditions Aggravated by Exposure:
Chronic respiratory or skin conditions may temporarily worsen from exposure to dust from this product.

SECTION 4 - FIRST AID MEASURES

Inhalation:
- If inhaled, immediately remove the affected person to fresh air.
- If irritation persists, get medical attention.

Skin Contact:
- For skin contact, flush with large amounts of water.
- If irritation persists, get medical attention.

Eye Contact:
- Immediately flush eyes with plenty of water for at least 15 minutes.
- If irritation persists, get medical attention.
Material Safety Data Sheet

Ingestion:
• Ingestion of this material is unlikely
• If it does occur, watch the person for several days to make sure that partial or complete intestinal obstruction does not occur.
• Do not induce vomiting unless directed to do so by medical personnel.

SECTION 5 - FIRE FIGHTING MEASURES

<table>

</tbody>
</table>

Extinguishing Media:
Use any extinguishing media appropriate for the surrounding fires.

Unusual Fire & Explosion Hazards:
None identified.

Fire-Fighting Instructions:
Use self-contained breath apparatus (SCBA) and protective clothing ensemble as defined in NFPA 1500.

Hazardous Combustion Products: None.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Containment Procedures:
• Scoop up material and put into a suitable container for disposal as a non-hazardous waste.
• Dust from cutting or drilling this material will settle out of the air. If concentrated on land, it can then be scooped up for disposal as a non-hazardous waste.

Clean-Up Procedures:
• Sweep up or gather material and place in appropriate container for disposal.
• Wash spill area thoroughly.
• Wear appropriate protective equipment during cleanup.
• Avoid the generation of dusts during clean-up.

Response Procedures:
• Isolate area.
• Keep unnecessary personnel away.

Special Procedures: None
SECTION 7 - HANDLING AND STORAGE

Handling Procedures:
- No special procedures are required for this material.
- Avoid breathing dusts from this material.
- Avoid dust contact with eyes and skin.
- Minimize generation of dusts.

Storage Procedures:
No special procedures are required for this material.

SECTION 8 - EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure Guidelines:

General Product Information
Follow all applicable exposure limits if dusts are generated.

Component Exposure Limits
ACGIH and OSHA exposure limit lists have been checked for those components with CAS registry numbers.

Iron oxide (1309-37-1)
ACGIH: 5 mg/m³ TWA (welding fumes, dust, total particulate as Fe)
OSHA: fume: 10 mg/m³ TWA

Ventilation:
- General dilution ventilation and/or local exhaust ventilation should be provided as necessary to maintain exposures below occupational exposure limits.
- Dust collection systems may be necessary in some operations.

Personal Protective Equipment - Respiratory Protection:
- A properly fitted NIOSH approved dust respirator or equivalent should be used under the following conditions:
  1) any dust environment
  2) when mechanically altering product (sawing, cutting, drilling or other similar dust generating process).
- Use respiratory protection in accordance with your company’s respiratory protection program, local regulations and OSHA regulations under 29 CFR 1910.134.

Personal Protective Equipment - Skin Protection:
Wear leather or other appropriate work gloves, if necessary for type of operation.

Personal Protective Equipment - Eyes/ Face Protective Equipment:
Wear safety glasses with side shields.
Material Safety Data Sheet

SECTION 9 - PHYSICAL & CHEMICAL PROPERTIES

Appearance: Cured concrete product of various shapes, sizes and colors
Odor: Not applicable
Physical State: Solid
pH: Not applicable
Vapor Pressure (mmHg @ 20 C): Not applicable
Vapor Density (Air=1): Not applicable
Boiling Point: Not applicable
Solubility (H2O): Not applicable
Specific Gravity (Water=1): Not applicable
Freezing Point: Not applicable
Evaporation Rate (n-Butyl Acetate=1): Not applicable
Viscosity: Not applicable

Physical Properties

Additional Info: No additional information available.

SECTION 10 - CHEMICAL STABILITY & REACTIVITY INFORMATION

Stability:
This is a stable material.

Conditions to Avoid:
Avoid dispersion of dust in air.

Incompatible Materials:
None expected.

Hazardous Decomposition Products:
None identified

Hazardous Polymerization:
Will not occur.

SECTION 11 - TOXICOLOGICAL INFORMATION

Acute and Chronic Toxicity: General Product Information
- Dusts from cutting and drilling may cause mechanical irritation to eyes and skin.
- Ingestion may cause transient irritation of throat, stomach and gastrointestinal tract.
- Inhalation may cause coughing, nose and throat irritation, and sneezing.
- Higher exposures may cause difficulty breathing, congestion, and chest tightness.

Component Analysis - DL50/CL50
No LD50/LC50’s are available for this product’s components.
Material Safety Data Sheet

Carcinogenicity:

General Product Information
CRYSTALLINE SILICA: The International Agency for Research on Cancer (IARC) recently reviewed existing epidemiological data and concluded that crystalline silica inhaled in the form of quartz from occupational sources is known human carcinogen (Group 1). In making the assessment, the IARC noted that carcinogenicity was not detected in all industrial circumstances studied. However, IARC reported that a majority of studies indicated an elevated mortality for lung cancer among silica-exposed workers. IARC noted that increased rates of lung cancer were reported among some workers in ore-mines, quarries, foundries, ceramics, granite and stone cutting industries. The workers in some of these occupational studies were exposed to other potential respiratory carcinogens such as arsenic, radon, diesel exhaust, polycyclic aromatic hydrocarbons or cadmium. The IARC reviewed animal studies and concluded that there is sufficient evidence in experimental animals for the carcinogenicity of quartz.

Silica-crystalline quartz has resulted in liver, blood, and lung tumors in rates by inhalation, intraperitoneal and intravenous injection, intratracheal and intrapleural administration.

Component Carcinogenicity
ACGIH, IARC, OSHA, and NTP carcinogen lists have been checked for those components with CAS registry numbers.

Iron oxide (1309-37-1)
ACGIH: A4 – Not Classifiable as a Human Carcinogen (dust and fume, as Fe)
IARC: Supplement 7, 1987; Monograph 1, 1972 (Group 3 (not classifiable))

SECTION 12 – ECOLOGICAL INFORMATION

Ecotoxicity: No data available for this product.

Environmental Fate: No data available for this product.

SECTION 13 – DISPOSAL CONSIDERATIONS

US EPA Waste Number & Descriptions:

General Product Information
No components are identified

Component Waste Numbers
No EPA Waste Numbers are applicable for this product's components.
Disposal Instructions:
Consult appropriate authorities before disposing of this material.

SECTION 14 – TRANSPORTATION INFORMATION

US DOT Information:
Shipping Name: Not regulated for transport.
Hazard Class: None
UN/ NA #: None
Packing Group: None
Required Label(s): None
Additional Info: None

TDG Information
Shipping Name: Not regulated for transport
Hazard Class: None
UN/ NA #: None
Packing Group: None
Required Label(s): None
Additional Info: None

Additional Transportation Regulations: No additional information available

SECTION 15 – REGULATORY INFORMATION

US Federal Regulations:
General Product Information - No information available for the product.

Component Analysis
None of this product’s components are listed under SARA Section 302 (40 CFR 355 Appendix A), SARA Section 313 (40 CFR 372.65), or CERCLA (40 CFR 302.4).

SARA 311/312
Acute Health Hazard: Yes (if dusts are generated)
Chronic Health Hazard: Yes (if dusts are generated)
Fire Hazard: No
Sudden Release of Pressure Hazard: No
Reactive Hazard: No

Clean Air Act
None of this product’s components are listed on the Clean Air Act – 1990 Hazardous Air Pollutants List.

State Regulations:
General Product Information - No additional information available

Page 7 of 9
Issue date: May 2010
Material Safety Data Sheet

Component Analysis - State
Iron Oxide appears on the hazardous substance list for the States of CA, MA, MN, NJ, PA. Glass, Oxide appears on the hazardous substance list for MN.

The following statement(s) are provided under the California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65):
WARNING! This product contains a chemical known to the state of California to cause cancer.

Other Regulations:
General Product Information - No additional information available.

Component Analysis - Inventory
In a component analysis of iron oxide and glass, oxide, TSCA, DSL & EINECS were detected.

Component Analysis - WHMIS IDL
The following components are identified under the Canadian Hazardous Products Act Ingredient Disclosure List:

<table>
<thead>
<tr>
<th>Component</th>
<th>CAS #:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Iron oxide</td>
<td>1309-37-1</td>
</tr>
<tr>
<td>% item 762</td>
<td>1327</td>
</tr>
</tbody>
</table>

WHMIS Status: Controlled

WHMIS Classification: D2A - Carcinogenicity (if dusts are generated)

SECTION 16 - OTHER INFORMATION

HMI S and NFPA Hazard Ratings:
