METHODOLOGY

The poll, which was conducted by the Harris Poll, included interviews of 1,617 adult women (18+) who self-identify as Black or African American; of Hispanic, Latina or Spanish-speaking background; or Asian American or Pacific Islander (AAPI) or of any ethnicity/national origin recognized in the Asian race category by the U.S. Census Bureau. As part of this effort, an oversample was conducted of South Asian American women. In addition to these characteristics, all women are registered voters who reported voting in the 2020 general elections. Interviews were conducted online and via telephone using live, professional interviewers from April 7 to May 16, 2021. The survey was made available in English, Spanish, Mandarin, Korean or Vietnamese.
