OCHIN Hosted Epic Electronic Health Record

OCHIN’s Electronic Health Record (EHR) is customized to meet the unique needs of safety net providers to enable our members to provide better, more patient-centered care to the communities they serve.

Why OCHIN for Your EHR?

OCHIN Epic EHR streamlines business processes, enhances coordinated, patient-centered care, and provides crucial support in the following areas:

- Clinical Quality Improvement
- Population Health
- Patient Engagement and Care Coordination
- Health Information Exchange and Interoperability
- Alternative Payment Methods
- Meaningful Use and UDS Reporting
- Patient-Centered Medical Home Certification

Our Comprehensive Solution and Support

We provide a comprehensive model, supporting our members through integration, working with vendors, managing enhancements and upgrades—and much more to support you and your patients’ needs.

- Custom configuration to support health center needs and initiatives
- Comprehensive implementation, training, and support
- Integrated Clinical, Behavioral Health, and Dental services
- Peer-to-peer learning across OCHIN’s nationwide network
- Robust data reporting, analytics, and benchmarking to support quality improvement programs
