A Driving Force for Health Equity

OCHIN is one of the largest and most successful health information and innovation networks, serving over 500 organizations and 12,000 clinicians across the U.S. with the technology, research, and expertise to improve health care delivery and integration.

Leveling the Playing Field for Community Health Centers Nationwide

Our focus is to ensure low-income, vulnerable, and underserved patients have access to high-quality health care. We prepare primary care for the future with state-of-the-art solutions.

- Hosted Epic EHR
- Data Exchange and Interoperability
- Information Security, Storage, and Disaster Recovery
- Analytics and Reporting
- Telehealth, Virtual Care, eConsult
- Medical Grade Broadband Network Connectivity

Improving Outcomes and Efficiencies with Comprehensive Services

We help practices of all sizes improve operations, clinical performance, revenue cycle, and patient care to meet the triple aim in health care.

- Best-practice-based quality improvement coaching, workflow engineering, billing and revenue cycle services, provider credentialing, and more to help clinics improve performance and efficiency, and reduce costs
- Compliance services to help clinics and hospitals assess and reduce risks
- Focus on usability to improve provider satisfaction and reduce burnout

Informing Care Delivery and Policy through Safety Net Focused Research

We are building the nation’s foremost community laboratory for health outcomes, policy, and primary care research on vulnerable and underserved populations.

- Research focused on health policy, practice transformation, social determinants of health, opioids, and more to improve the health of less-advantaged communities
- Collaborating with top research institutes, foundations, academic centers, and mission-driven health care organizations across the U.S.
- Advocating in Congress and state legislatures for policies that reflect what we’re learning about the best science and the best care
