OCHIN Research

OCHIN is committed to building the nation’s foremost community laboratory for health outcomes, policy, and primary care research with vulnerable and underserved patients.

A Focus on Innovation

Our collaborative of innovative organizations is able to develop and test information technology tools and methods in primary care settings.

A Leader in Safety Net Research

Our network’s diverse population includes patients who are uninsured or publicly-insured and have limited access to health care.

An Emphasis on Engagement

Our collaborative is unique in its emphasis on both patient and clinician engagement through our various member workgroups.

The OCHIN-led ADVANCE Clinical Data Research Network is the most comprehensive database on health care and outcomes of safety net patients in the U.S.
