TEN ZQ MERINO COMMANDMENTS

#9. THOU SHALT

# Stay Well-Balanced

## ZQ MERINO KEEPS YOU COMFORTABLE

The chemical structure of ZQ Merino fibre means that it has the ability to gain and release heat depending on the external and internal environment – thus buffering wearers against environmental changes – properties that are not shared by synthetic fibres such as nylon and polyester.

As it absorbs moisture, ZQ Merino fibre releases a small, but perceptible amount of heat. In an apparel or hosiery application, this prevents the wearer from chilling in wet, cool conditions. In hot conditions the reverse effect occurs, affording a natural means of buffering the body's microclimate.
