EarthEye is a great compliance tool that...

- saves time and money
- audits your downstream remotely
- ensures the honesty of vendors
- serves as a powerful marketing tool
- adds a layer of security

Be Sure.

Devastating outcomes with your e-waste can place your company, its resources and reputation at risk. For the first time, EarthEye provides the ability to see precisely where electronic assets are at anytime and to take corrective action before lawsuits, legal actions, or the wrong kind of headlines cost you significantly.
A Comprehensive Integrated Global Tracking System providing:

1. **Data Security**
   
   Ensure all confidential data is being securely handled and destroyed.

2. **Environmental Protection**
   
   Know that your IT assets are being disposed of ethically without harm to our planet.

3. **Accountability**
   
   Ensure all of your recycling contracts are being fulfilled in the proper and legal manner as advertised.

**How it Works**

**CHOOSE**
Choose the number of trackers to be deployed over a year as well as the installation and deployment options best suited to your needs.

**INSTALL**
EarthEye’s trained technicians program, install, and activate the tracking units. They can also train your team on this process.

**DEPLOY**
The technicians work undercover to deploy the GPS-enabled devices to your downstream. They can also train your team on this process.

**WATCH**
A secure and customized user interface allows 24/7 access to data. GPS trackers send signals every 24 hours to the account.

**REPORT**
EarthEye subscribers receive an annual report showing all tracked activity, expertly assessed for compliance.
