Dear Town of Deseronto,

We are very eager to be opening a second site for our practice at our Deseronto office, effective June 15th, 2020. The situation with COVID-19 has caused many changes within the community and surrounding areas. While we are very fortunate to be in an area with great community leaders and frontline workers who continually work to have flattened the curve, this has not prevented the impact COVID-19 has had with the planning for our office in Deseronto, causing the unexpected delay of our official opening. We had initially hoped to open our doors to the community in March, however, at the peak of COVID-19, this certainly was not possible.

We have been and continue to be available to our patients in the community virtually and by phone. In person, we are excited to start seeing essential visits in the Deseronto community starting June 15th. We are excited to be a part of the community, working alongside our allied health and community team members.

As always, we are so grateful for the ongoing support, patience, and understanding of our community partners and the people in Deseronto and immediate region.

Sincerely,

Dr. Khey Beldman, Dr. Hart, and Dr. Garcia Popov
