PERSONAL PROTECTIVE EQUIPMENT
MADE IN DETROIT
ISAIC.ORG
When it comes to protecting your employees, customers and clients you shouldn’t have to worry about waiting weeks – or even months – for supplies to arrive. Manufactured in Detroit, ISAIC’s PPE is a reliable, cost-effective solution that is ethically made close to home. Most importantly, it’s available when you need it.

At ISAIC we believe that sustainability starts with people. The PPE purchased from ISAIC is not made off the backs of workers overseas, rather it invests in the development of an equitable, local workforce. And by purchasing domestically, you have more control and less risk of interruptions in supply chains.

Join us in supporting better jobs, better products and better solutions for protecting your people.

Join us at ISAIC.

Jen Guarino
CEO, ISAIC

- Our regional and national network has ensured a reliable supply chain with less risk of disruption to clients
Purchasing PPE from ISAIC not only protects your clients and employees, it also furthers ISAIC’s mission of building and sustaining a talentforce that breaks the apparel industry mold.

A national non-profit institute based in Detroit, ISAIC is reinventing the apparel and sewn good industries by providing resources for those who are committed to responsible domestic production.

The ISAIC learning and contract factory defies stereotypes. It was designed with people in mind, with skylights, windows, plants, music and areas for collaboration and training.

Why is this important? Because a fairly paid, well-trained, valued work force is the foundation for a robust domestic manufacturing industry – one that can be relied upon to provide protection when it’s needed most.
ISAIC currently offers both disposable and reusable gowns.

Disposable gowns are made from spunbond polypropylene and are available in L1, L2 and L3 fabrics.

The reusable gown is made from L3 passing material and is effective through 75 washes.

Contact support@isaic.org for current pricing, specifications and ordering.
The 3-ply pleated masks are made with SMS materials and sonic welding construction. Available in L1 and L3.

Reusable sewn masks are made on demand from antimicrobial knit material with either ear loops or ties.

Contact support@isaic.org for specifications, pricing and ordering.
PEOPLE POWER ISAIC.
PROTECT LIVES.
PROTECT JOBS.
