

Stonehaven Medical's Balance 7 Section Diamond Model BAL 1090 exceeds the needs of a medical facility, while offering a great deal of versatility. The Diamond 7 Section features a lift up center section for postural elevation, and affords greater extension for lumbar flexion/extension. The Head Section includes effortless hand operated up/down armrests for variable height adjustment with the capability to swing out 90 degrees. The Head Section also pivots in 2 directions, lifts up and tilts down, allowing easy access to the upper extremities and massage chair treatment positioning. One of the superior features is the ability of the shoulder sections to raise and lower, allowing the practitioner closer proximity to their patient, thus minimizing back strain. Cushions feature 2" foam with a choice of seven attractive upholstery colors to compliment any decor.
