THE WAYNE MESSENGER

Carol Steck, Editor

Dec. news is due by Nov. 15th
editorwcc@gmail.com.

Pause, look, and give thanks to God

"Make sure that nobody pays back wrong for wrong, but always strive to do what is good for each other and for everyone else. Rejoice always, pray continually, give thanks in all circumstances; for this is God's will for you in Christ Jesus. Do not quench the Spirit". (1 Thessalonians 5.15-19)

Besides being a month that brings us a spectacular autumn view, November also brings us "Thanksgiving Day". This is a day that, independently of its history and origins, has been spread to many countries (like Brazil, our country) as a day to pause, look around, and recognize all gifts, grace, love, opportunities, health, friends, family, and an uncountable number of blessing that we have received from God.

When we were coming back from vacation in October, we were talking about the privilege of having a place to return to and thanking God for coming home. Wayne is now our home, and you are our neighbor, and it is a good thing. We really thank God for it.

While thinking about "Thanking God" we chose this short text at the beginning, hoping that it can inspire us in this special season of gratitude. God's word combines the invitation to be grateful with the guidance to do good to all people. This leads us to think that gratitude and kindness go hand in hand. One inspires the other and supports it.

We are invited to go beyond what has begun to look normal in today's world. People are not patient, and because of political and ideological differences families are broken, because of intolerance, old friends become enemies, because of individualism we can't feel love, and so on. Also, sometimes we become overwhelmed with so many activities that we forget to notice how many good things we have all around us.

We would like to invite you to take a pause. Take a deep breath and re-read the text cited in the beginning again. Do not do wrong but always do good for everyone. Enjoy life and all its differences. Look around, it is beautiful! Live your life with gratitude. Give thanks to God in all circumstances. Do not be insensible to God's Spirit. God is working around us, and everything is for our good.

During this month let us slow down, take some time to notice our surroundings, and become aware of everything that we are seeing and feeling, and we certainly will see the Goodness of God. Then, let us give thanks to God for all that God has done for us.

God bless you,

Pastors Marcos Juliao and Mauren

How to Identify and Remove Oriental Bittersweet

If you haven't noticed there maybe, and probably is, a very invasive woody vine growing out of your rock walls and forest edge, and onto nearby shrubs and trees. This is Oriental (Asiatic) Bittersweet, introduced from Asia for ornamental purposes, which is rapidly spreading and dominating the landscape in sections of Wayne. It can be found sprawling over rock walls, forest edges, and old fields. Its woody stem winds up nearby tree trunks and shrubs, and once in the overstory invades the crown, choking its host from sunlight, often resulting in the death of the tree. The spiraling woody vine, often over one inch in diameter, also chokes the flow of essential fluids moving up and down the tree. Younger pioneering plants simply sprawl over nearby ground vegetation. If left unchecked, it eventually becomes a dominant feature of the landscape, and completely disrupts many natural functions.

Control over this very invasive plant is difficult, and eradication is often impossible. It requires concentrated attention to infested areas and may take several years to get things under control. Cutting the woody stems at ground level, will kill the vine above. However, it will quickly sprout new shoots. If you can pull the roots out, all the better, but this is often not possible. Cut stems at ground level and young plants can be treated with a herbicide such as Round-Up. The only other way to starve the roots is to routinely remove any sprouts and pioneering plants as best you can and keep sprouts from growing up into nearby trees and shrubs. Smaller plants coming up elsewhere need to be cut, pulled up, or frequently mowed to bring under control the annual regeneration and starve the roots.

If you have newly established plants, remove them as quickly as possible, including the roots. Repeated mowing will help keep things under control. If you have widespread occurrence of vines in trees, focus on these, especially in areas considered high priority. Don't expect complete eradication, and focus on keeping the vines out of trees, shrubs, and stone walls as much as possible.

The Bittersweet vine may at first appear to be a pretty addition to the landscape, with its colorful red/orange fall berries which are sought after for holiday decorations. However, its very invasive nature will eventually have a significant impact on the landscape. Long-term perseverance is the only way to control this pest. There are no quick fixes.

RECIPE CORNER

Lemon Meringue Pie

Lemon Pie

- | | |
|------------------------------|-------------------------|
| 1 1/2 C. sugar | 3 T. butter |
| 1/3 C. cornstarch | 1/4 c. lemon juice |
| 1 1/2 C. water | 1 T. grated lemon rind |
| 3 egg yolks, slightly beaten | 1 9-in. baked pie shell |

Mix sugar and cornstarch in saucepan. Gradually stir in water. Cook over medium heat, stirring constantly, until mixture thickens and boils. Boil 1 minute. Slowly stir at least half the hot mixture into egg yolks. Then blend into hot mixture in saucepan. Boil 1 minute longer, stirring constantly. Remove from heat. Continue stirring until smooth. Blend in butter, lemon juice and rind. Pour into baked pie shell. Cover with meringue.

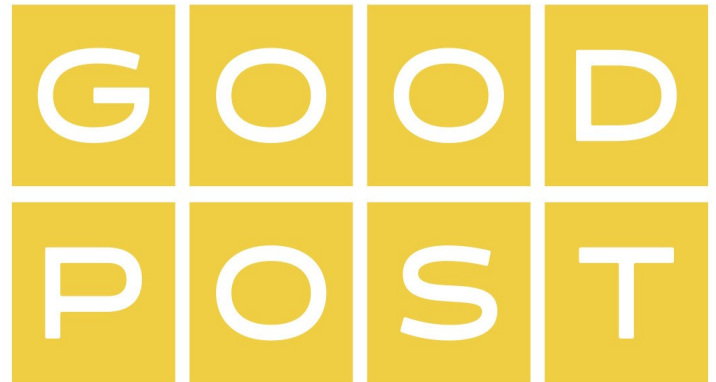

Pie Meringue

- | | |
|--------------------------|---------------------|
| 3 egg whites | 1/2 tsp. flavoring |
| 1/4 tsp. cream of tartar | (vanilla or almond) |
| 6 T. sugar | |

Heat oven to 400 degrees. Beat egg whites with cream of tartar until frothy. Gradually beat in sugar, a little at a time, until dissolved. Continue beating until stiff and glossy. Do not beat! Beat until sugar is dissolved. Beat in flavoring. Pile meringue onto hot pie filling, being careful to seal the meringue to the edge of the crust to prevent shrinking. Swirl or pull up points for decorative top. Bake 8-10 mins. Until delicately browned. Cool away from drafts.

Note: When I baked my first lemon pie, the lemon filling was very "runny" prompting my husband to say, "Tastes great! Pour me another piece!" Turns out there is a difference between corn starch and corn syrup! Be sure to use corn starch.
