

Sustainable Development Goals

Pyrocal is committed to taking action against the [Global Goals for Sustainable Development](#), as adopted by all United Nations Member States in 2015.

Our core business aligns with the following Sustainable Development Goals and Targets.

- Affordable, reliable and modern energy services.
- Increase renewable energy.
- Expand infrastructure and upgrade technology for supplying modern and sustainable energy.

- Develop quality, reliable, sustainable and resilient infrastructure in regions to support economic development and human well-being.
- Upgrade infrastructure and retrofit industries to make them sustainable, with resource-use efficiency and clean and environmentally sound technologies and industrial processes.

- Environmentally sound management of all wastes through their life cycle to minimise their adverse impacts on human health and the environment.
- Encourage companies to adopt and report on sustainable practices.
- Support developing countries to strengthen their scientific and technological capacity to move towards more sustainable patterns of consumption and production.

The outcomes of our business contribute to the following Sustainable Development Goals and Targets.

- Improve education, awareness-raising and human and institutional capacity on climate change mitigation.
- Promote mechanisms for raising capacity for effective climate change-related planning and management in least developed countries .

- Reduce the adverse per capita environmental impact of cities, including by paying special attention to air quality and municipal and other waste management.

- Achieve higher levels of economic productivity through diversification, technological upgrading and innovation, including through a focus on high-value added and labour-intensive sectors.

- Ensure sustainable food production systems and implement resilient agricultural practices that increase productivity and production, that help maintain ecosystems, that strengthen capacity for adaptation to climate change and that progressively improve land and soil quality.
