

The Cuda Winder was originally designed for 6-string acoustic and electric guitars, but it also works great with 12-string guitars, mandolins, or any other steel string instrument that uses standard size tuning machines and string diameters that fall within the sizes shown on this chart. Note the string diameter shown on your string's packaging and reference the chart below to determine which slot on the Cuda Winder to use for the ideal measurement.

String Diameter Range (Inches)	Cuda Notch
.010 - .013	High E
.014 - .017	B
.023 - .026	G
.030 - .035	D
.039 - .045	A
.047 - .056	E
