- Health and support
  - support in accessing services
  - information on sexual health and practice
  - counselling services
- Social issues / isolation
  - connection to community
  - other social groups
  - friendships/relationships
- Family issues
  - acceptance
  - discussing issues
- Alcohol and other drugs
  - effects, health issues and safe practices
  - stopping drug or alcohol use/abuse

World Health Organization (WHO) definition
...a state of complete physical, mental and social well-being, and not merely the absence of disease.

Sexual health requires a positive and respectful approach to sexuality and sexual relationships, as well as the possibility of having safe sexual experiences, free of coercion, discrimination and violence. For sexual health to be attained and maintained, the sexual rights of all persons must be respected, protected and fulfilled.

Mental health...is defined as a state of well-being in which every individual realises their own potential, can cope with the normal stresses of life, can work productively and fruitfully and is able to make a contribution to their community.

We host DROP-IN SESSIONS that are Confidential, Nonjudgmental, Supportive, Anonymous, and Understanding.
