Responsible Investment Policy

Definitions:

Responsible Investment: For the purposes of this policy, responsible investment is understood to be a strategy and practice to incorporate environmental, social and governance (ESG) considerations in investment decisions by making proactive investments in companies and projects that align with the Union’s principles and screening out or divesting from industries where such investments would support activities against the Union’s values.

Union: The Dalhousie Student Union

Purpose: This policy lays out the principles that guide the Union’s investing practices in order to align the organization’s financial management with its overarching objectives.

Scope: This policy shall apply to all Union investments including the DSU Health Plan Reserve Fund and the DSU Endowment Fund. It shall guide both the review of current investments and of any new investment opportunities.

1. Principles

1.1 The Union, as a representative body and a membership-based organization, has a responsibility to act in the best interests of its members with regard to investments. 1.3 The Union values a sustainable future and wishes to support clean, renewable energy. Further, the Union is committed to educating and assisting Dalhousie students, community members, and other student unions in learning more about fossil fuel divestment and the effects of climate change, renewable energy and the need to mitigate the harm of the carbon bubble.
