Safe storage of POO
Protect Your Family’s Health

After a strong earthquake you may need to live without a working toilet for weeks or months. Disease is spread when human waste – POO – is not handled and stored safely.
Three steps to stay healthy

1. Clean drinking water
2. Hand washing
3. Safe storage of POO

Separating PEE lessens volume and odor, making bucket contents safer and easier to store and dispose.
Twin Bucket System

Liquid waste - PEE

- Use **PEE** bucket.
- Place toilet paper in **POO** bucket.
- Add water to contents if possible.
- Pour on lawn, garden or ground.
Twin Bucket System

Fecal waste - POO

- Line bucket with heavy duty 13-gallon garbage bag.
- Use POO bucket.
- Cover each use with bark chips, etc. to help dry the waste.
- Fill bucket no more than half full of waste.
- Double-bag and store the waste separate from other garbage and away from food and water.
- Secure waste from pets, flies, rats, etc.
