Twin Bucket System

Emergency Toilet

Cover each POO with bark chips, leaves, grass clippings, shredded newspaper, or sawdust.

You can make sawdust by adding 1/2 cup water to 1 cup Wood Stove Pellet Fuel. Large hardware stores sell 40 pound bags for about $6.

Volunteers Building Strong, Healthy, and Prepared Communities

After an earthquake your tap water and toilet may not work for weeks or possibly months. Many outdoor stores sell “Luggable Loo” toilet seats designed to fit on a 5 gallon bucket.

Twin Bucket System

Separating PEE lessens volume and odor, making bucket contents safer and easier to store and dispose.

Liquid waste - PEE
• Use PEE bucket.
• Place toilet paper in PEE bucket.
• Add water to contents if possible.
• Pour on Lawn, garden or ground.

Fecal waste - POO
• Line 5-gallon bucket with heavy duty 13-gallon (trash compactor) garbage bag.
• Use POO bucket.
• Cover each use with sawdust, bark chips, etc. to help dry the waste.
• Fill bucket no more than half full of waste.
• Double-bag and store waste separate from other garbage and away from food & water.
• Secure waste from pets, flies, rats, etc.

You can make sawdust by adding 1/2 cup water to 1 cup Wood Stove Pellet Fuel. Large hardware stores sell 40 pound bags for about $6.
