Making Play Dough Grammar Symbols

This week, your job is to make the Grammar Symbols out of clay, Play-Doh, or homemade play dough.

I made a Zoom video recording for you to watch that shows the Grammar symbols chart and a person making the three dimensional geometric shapes.

If you would like to print out the chart so you have a handy reference, the link for the chart is included in the email.

And, if you don't have any clay or play-doh at home, here is the recipe Dorothy shared for making your own play dough. (Suggestion: if you divide the dough, you might be able to make all of the shapes with this recipe and once dry, paint them!)

- 12 Tablespoons flour (3/4 cup)
- 4 Tablespoons salt (1/4 cup)
- 6 Tablespoons water
- 3 Tablespoons oil, separated
- food coloring (3 colors)
  - For the first week we'll need black, red, and light blue

1. Mix flour and salt in a bowl
2. Mix water and oil together
3. Scoop the flour and salt into the water and oil
4. Stir with a spoon
5. Wait 5 minutes for the salt to absorb the water
6. Knead the dough with your hands until it is soft

Note: If the dough is too sticky, add 1 teaspoon of flour and stir it again.
Save the play dough in resealable bags and refrigerate.

Have Fun!!
~ and please SEND PICTURES of your Grammar Symbols as you are making them!

And this is the video I thought might help get you started that you saw the pyramid shape being made:
