

Questions to ask your candidate at the door

"We know that support for local economies is critical to recovery from the pandemic. How would you propose to bring more local food into Nova Scotian schools?"

"Are you supportive of establishing a universal healthy school food program, cost shared with other levels of government, that will enable all students in NS to have access to healthy meals at school every day?"

"The federal government made a commitment in the 2019 budget to co-create a National School Food Program for Canada alongside provinces and territories. No steps have been taken towards its creation. If elected, what will you do to hold the federal government accountable to this commitment?"

"Nova Scotia has the highest poverty rates in Atlantic Canada, with almost one in four children experiencing these circumstances. Food insecurity is highly correlated with poverty. How does your party plan to increase access to healthy food for Nova Scotian children?"
