SunServe

Transgender Services’ mission is to provide a safe, comfortable, and friendly space where Trans & Non-binary individuals can blossom into their true authentic selves. We have a wraparound case management program, with a flexible, holistic, creative approach. Meaning we help with whatever our clients may need, Mental, Medical, Physical, Emotional, Financial, Behavioral, etc. We have a client lead program focusing on their strengths, and goals while helping their overall quality of life from their point of view. We meet our clients where they are today, intending to help them get where they want to be tomorrow. We are willing to assist our clients by any means possible, through a variety of services and resources. Sunserve’s Transgender Services welcomes you no matter where you fall on the Transgender spectrum. If you are about to start your journey or if you are a seasoned veteran. Either way, we are here to help you during any stage of your transformation.

Transgender Services focuses on two aspects for each and every client. The first thing we focus on is their Physical Health. Depending on their journey this may or may not include Hormone Replacement Therapy. Regardless of desire for HRT or not, we then focus on HIV Education, Testing, and then Linkage to HIV Care or HIV Prevention. Our second focus is on their Mental Health. Our goal is to help the client realize that they are beautiful and worthy of healthy supportive relationships. We often link our clients to Therapy, Support Groups, Social Support etc. It is important that our clients know that they are not alone on this journey. There are others going through similar situations as them.

HEART Study at University of Miami
Health & Resilience of Transwomen in Miami

Compensation up to $75 + transportation reimbursement (parking, public transit, Uber, Lyft)

The purpose of this study is to explore the physical and mental health of transfeminine people in Miami. Specifically, because HIV is affecting the community right now (especially in Miami), we want to find out what things make transfeminine people in Miami at risk for HIV and also what makes it hard to be connected to HIV care. Also, because of the coronavirus (COVID-19), we want to see how many people test positive for COVID-19 and how COVID-19 is affecting the physical and mental health of transfeminine individuals in the Miami area.
